

CONTENTS

Preface	v
1. Atoms and Nuclei	
1.1. Laser Light, Atoms, and Nuclei <i>V. S. Letokhov</i>	3
1.2. Single-Atom Oscillators <i>H. Walther</i>	43
1.3. Laser Optics of Neutral Atomic Beams <i>V. I. Balykin</i>	62
1.4. Laser Spectroscopy and Nuclear Structure <i>H. H. Stroke</i>	79
1.5. The Rates of Elementary Atomic Processes and Laser Spectroscopy <i>Z. Rudzikas, P. Serapinas, and B. Kaulakys</i>	99
1.6. Peculiarities of Heavy Atoms Highly Excited States Decay <i>E. P. Vidolova-Angelova</i>	113
2. Molecules and Laser Induced Processes	
2.1. Laser Spectroscopic Studies of Highly Excited Vibrational States of Molecules <i>T. Kuga, Y. Ueda, and T. Shimizu</i>	133
2.2. Appearance of a Vibrational Chaos in Polyatomic Molecules : Experimental Evidences and Physical Consequences <i>A. A. Makarov and E. A. Ryabov</i>	150
2.3. Surface-less Chemical Changes Induced by CO ₂ Laser. New Mechanistic Pathways in Chemistry <i>J. Pola</i>	166

2.4. Kinetic Processes in Ar-Kr-F ₂ System Interacting with Electron and Laser Beams	183
<i>H. Takuma, K. Ueda, K. Hakuta, and H. Nishioka</i>	
3. Laser Methods in Surface Study	
3.1. Surface Studies by Nonlinear Optics	203
<i>Y. R. Shen</i>	
3.2. Picosecond Nonlinear Optical Spectroscopy of Semiconductor Surfaces	220
<i>N. I. Koroteev</i>	
3.3. Surface Energy and Electron Transfer Dynamics of Submonolayer Dyes on Organic Crystals	239
<i>K. Yoshihara, N. Nakashima, and K. Kemnitz</i>	
4. Laser Spectroscopy of Condensed Matter	
4.1. Laser Nonlinear Spectroscopy of Polyatomic Molecules in the Liquid Phase and Medium Dependent Processes	259
<i>K. Siomos</i>	
4.2. Non-Steady and Stochastic Wave Processes and Instabilities at Interaction of Laser Radiation with Liquid Crystals	279
<i>S. M. Arakelian, Yu. S. Chilingarian, G. L. Grigorian, A. S. Karaian, S. Ts. Nersissian, and L. P. Gevorkian</i>	
4.3. Nonlinear Optics of Dye Solutions	295
<i>V. Kabelka and A. V. Masalov</i>	
4.4. Nonlinear Spectroscopy of Intrinsic and Local Defect States in Semiconductors	303
<i>V. I. Gavryushin</i>	
4.5. Glass Resistance to Optical Damage Induced by Repetitive Laser Radiation	322
<i>E. Maldutis and S. Sakalauskas</i>	

5. New Laser Methods

- 5.1 Laser Ultrasensitive Spectroscopy of Rare Elements
in Oceanology, Geochemistry, and Cosmochemistry 339
G. I. Bekov
- 5.2. Subnatural Linewidth Laser Spectroscopy 349
H. Takuma, F. Shimizu, and K. Shimizu
- 5.3. Coherent Multi-Photon Light Scattering Processes on Discrete
and Continuum States of Excited Gases and Plasmas 366
S. M. Galdkov

6. Biomedical Laser Applications

- 6.1. Two-Quantum Laser Crosslinking of Protein to DNA 387
D. A. Angelov and E. Keskinova
- 6.2. Photophysical, Photochemical, Photobiological, and
Medical Aspects of Laser Oncotherapy 401
*R. Gadonas, G. Jonusauskas, R. Kapočiuė, Z. Luksiene,
A. Piskarskas, J. Rotomskiene, R. Rotomskis, V. Smilgevičius,
G. Slekys, I. Bagdoniene, E. Jakubcionyte, B. Juodka, V. Kirveliėne,
L. Bloznelyte, and J. Didziapetriėne*
