Preface v

Contents xiii, xxv

List of contributors xvii

Index 1891

Volume 1

Part A Basic Theory and Laser Physics

- A1 Photon statistics 1
R. J. Glauber
- A2 Theory of laser operation – an outline 45
M. Sargent III, M. O. Scully
- A3 The theory of coherence, noise and photon statistics of laser light 115
H. Haken
- A4 Optical resonators 151
L. Ronchi
- A5 Measurement of the statistical properties of optical fields 191
F. T. Arecchi, V. Degiorgio

Part B Classes of Lasers

- B1 Gaseous lasers: atomic, molecular and ionic 265
C. K. Rhodes, A. Szöke

- B2 Solid-state ionic lasers 325
R. B. Chesler, J. E. Geusic
- B3 Liquid lasers 369
F. P. Schäfer
- B4 Semiconductor lasers: theory 425
F. Stern
- B5 Semiconductor lasers: devices 441
H. Kressel

Part C Laser Devices and Techniques

- C1 Design of solid-state lasers 497
H. F. Mahlein, D. Röss
- C2 Techniques of solid-state lasers 529
O. Svelto
- C3 Techniques of high-power light-pulse amplification 561
P. G. Kriukov, V. S. Letokhov
- C4 Design of gas lasers 597
J. P. Goldsborough
- C5 Techniques of gas lasers 631
O. P. McDuff
- C6 Modulation techniques 703
R. T. Denton
- C7 Demodulation and photodetection techniques 725
H. Melchior
- C8 Optical parametric oscillators 837
R. G. Smith
- C9 Optical coatings and thin-film techniques 897
E. Ritter

Part D Materials for Nonlinear Optics

- D1 Nonlinear optical materials 923
S. K. Kurtz

CONTENTS

xv

D2 Electro-optic materials 975

S. H. Wemple

D3 Elasto-optic materials 995

D. A. Pinnow

D4 Magneto-optic materials 1009

W. J. Tabor
