

C O N T E N T S

Preface

Review Papers

Single Atom Oscillations <i>Peter Wiorowski and Herbert Walther</i>	3
Physics and Technology of Large Plasma Focus Devices <i>H. Herold</i>	21
Lasers in Diagnostics and Analytical Research <i>S. Svanberg</i>	46
Technology of Toroidal Plasma Devices <i>S.M. Hamberger</i>	73
Recent Progress in Optical Information Storage <i>H.J. Schmitt</i>	85
Soliton Waves in Plasmas <i>Yoshi H. Ichikawa</i>	107
Z-pinch Applications <i>Frank J. Wessel</i>	140
Third World Nuclear Fusion Programmes and South-South Collaboration in Plasma Technology <i>S. Lee and M.H.A. Hassan</i>	165
Plasma Research in China <i>S.T. Tsai, Y.A. Li and M.Y. Hong</i>	194
Inertial Confinement Fusion Using Lasers <i>H.C. Pant</i>	210

Invited Papers

The Toroidal Heliac as a Research Facility <i>S.M. Hamberger</i>	245
Some Recent Results of a High Intensity Excimer Laser System <i>Akiro Endoh, Masayoshi Watanabe and Shuntaro Watanabe</i>	253
Technology of Field Reversed Pinch <i>Y.A. Li and M.F. Ye</i>	262
The Effect of Surface Treatment on the Oxidation Behaviour of Stainless Steel <i>A. Azima and M. Abedi</i>	278

Plasma Spraying of High T_c Superconductor <i>C. Silawatshananai</i>	288
Fibre-Optical Communications <i>M. Mukunda Rao</i>	298
Axial Sheath Dynamics in a Plasma Focus <i>H.M. Soliman, T.A. El-Khalafawy and M.M. Masoud</i>	320
Detection of an Optoacoustic (Photoacoustic) Signal Using a Switched Capacitor Filter <i>Mohamed Amin Alias</i>	335
Contributed Papers	
Ideal MHD Simulation for Plasma Focus <i>M. Zakaullah, T.J. Baig, S. Beg and G. Murtaza</i>	347
Neutron Emission from a Small Mather-type Plasma Focus <i>M. Zakaullah, T.J. Baig, S. Beg and G. Murtaza</i>	358
Non-Adiabatic Motion of Electrons in Multiple Magnetic Mirror System <i>Sunil P.S. Rawat, A.M. Punithavelu and R.K. Varma</i>	364
Ultrarelativistic Nonlinear Effects in Intense Laser-Plasma Interaction <i>U.A. Mofiz, G.M. Bhuiyan, M.K. Bokshi and Z. Ahmed</i>	372
Hydrodynamic Characteristics of High Z Doped Plastic Targets Irradiated by Intense Laser Beams <i>H.C. Pant, L.J. Dhareshwar, T.S. Shirsat, P.A. Naik and P.D. Nandwana</i>	389
Pressure Enhancement in Laser Irradiated Layered Targets <i>T.S. Shirsat</i>	399
Study of SRS and FPM in Multimode Silica Fibres in the UV Region <i>A.F.M.Y. Haider, R. Pini and R. Selimbeni</i>	407
Design and Construction of a TE High Pressure Nitrogen Laser <i>Jose Gregorio C. Labanda and Wilson O. Garcia</i>	416
Characteristics of a Simple Air-filled Flashlamp for Laser Pumping <i>I.J. Rasiah and B.C. Tan</i>	422
Determination of the Absorption Coefficient of a Liquid From Measurements of the Photothermal Beam Deflection <i>I.J. Rasiah and B.C. Tan</i>	432
Investigation of the Performance of a Miniature Q-switched Nd-YAG Laser <i>O.C. Chee and K.S. Low</i>	442
Investigation of UV Preionization Techniques in TEA CO ₂ Lasers <i>C.K. Ang, S.J. Tan and K.S. Low</i>	448

Melting of a Silicon Surface by a Visible Light Laser <i>L.K. Poh, I.J. Rasiah, Y.H. Chen and B.C. Tan</i>	455
Half-Life Measurements Using Plasma Neutrons <i>S.P. Moo, C.K. Chakrabarty and S. Lee</i>	462
Target Technique for the Study of Neutron Production Mechanism in a Focus Plasma <i>Chandan K. Chakrabarty, S.P. Moo and S. Lee</i>	468
Schlieren Photography of the Plasma Focus <i>K.H. Kwek and S. Lee</i>	476
A Comparative Study of Single-Mesh Flashlamp Circuit Theories <i>H.W. Lee, H. Ahmad and S. Lee</i>	484
Observations of Electron Beams in a Low Pressure Spark Discharge <i>C.S. Wong, C.X. Ong and P. Choi</i>	492
