CONTENTS

1. A. KUJAWSKI, Introduction 7
2. R. J. GLAUBER, Simple Models for Linear Damping and Amplification 9
3. R. GRAHAM, Chaos in Quantum Optics 31
4. M. V. FEDOROV, Resonances and Saturation in the Continuum 34
5. P. FILIPOWICZ, J. JAVANAINEN, P. MEYSTRE, The Ultimate Maser 47
6. A. P. KAZANTSEV, Kinetic Phenomena of Atomic Motion in a Light Field 55
7. M. SCHUBERT, New Photon States and Quantum--Statistical Analysis of Multiphoton Processes 56
8. S. STENHOLM, Theory of Laser Cooling 74
9. P. W. MILONNI, Chaos in Quantum Optics 83
10. J. PERINA, Sub-Poisson Light 87
11. K. WÓDKIEWICZ, Noise in Strong Laser-Atom Interactions 97
12. W. BRUNNER, R. FISCHER, H. PAUL, Regular and Irregular Behaviour of Multimode Laser Radiation 107
13. Gy. FARKAS, Experimental Investigations of the Laser Induced Multiphoton and Tunneling Processes in Atoms and Solids 116
14. J. H. EBERLY, Essential States in Multiphoton Ionisation and Electron Scattering 125
15. S. M. BARNETT, P. L. KNIGHT, P. M. RADMORE, Dephasing and Decay of Quantum Optical Systems 133
16. G. REMPE, H. WALTHER, P. DOBIASCH, The One-Atom Maser - A Test System for Simple Quantumelectro-dynamical Effects 144

17. Z. BIAŁYNICKA-BIRULA, Ionisation of Atoms by High-Intensity Lasers: Collective Effects 165
18. E. G. PESTOV, Relaxation of Quantum Systems in Strong Electromagnetic Field - New Nonlinear Effects 173
19. S. Ya. KILIN, The Quantum Statistics of Light Scattering and Propagation Effects 185
20. F. HAAKE, Quantum Pencils and a Kicked Spinning Top: Two Different Types of Large Fluctuations 196
21. A. V. MASALOV, Spectral and Temporal Fluctuations of Broad-Band Laser Radiation 207
22. P. ZOLLER, Rydberg Thresholds in Laser Fields: Applying Multichannel Quantum Defect Theory to Quantum Optics Problems 219
23. B. W. SHORE, Stochastic Processes in Quantum Optics ... 230
24. D. L. SHEPELYANSKY, Intrisic Chaos in Quantum Systems 240
25. J. W. HAUS, Quantum Beat Superfluorescence 241
26. I. J. BERSONS, Semiclassical Theory of Multiphoton Processes in Rydberg Atoms 252
27. P. R. BERMAN, R. G. BREWER, Modified Bloch Equations for Solids 253
28. R. G. DE VOE, C. FABRE, R. G. BREWER, Laser Frequency Division and Stabilisation 259
29. S. J. SMITH, Experimental Investigations of the Role of Laser Field Fluctuations in Non-linear Absorption Processes 265
30. S. KIELICH, R. TANAŚ, Self-Squeezing as a Novel Potent Source of Quantum Field 275
31. G. I. SURDUTOVICH, Light Pressure and Bistability Phenomenon 288
32. K. RZĄZEWSKI, Spectra Generated by Short Laser Pulses 290
33. M. BERTOLOTTI, Historical Paths in Lasers and Quantum Optics 298
34. B. SHORE, Concluding Remarks 316
35. List of Presented Posters 320
