

CONTENTS

FUNDAMENTALS OF FREE ELECTRON LASERS

| | |
|--|-----|
| A Unified Linear Formulation and the Operating Parameters of Cerenkov-Smith-Purcell, Bremsstrahlung and Compton Scattering Free Electron Lasers. | 1 |
| A. Gover and P. Sprangle | |
| Physics of the Free Electron Laser. | 91 |
| C. Pellegrini | |
| Classical Trajectories and Coherent States of a Free Electron Laser. | 121 |
| R. Bonifacio, F. Casagrande and L.A. Lugiato | |
| FREE ELECTRON LASERS OPERATING IN THE COMPTON REGIME | |
| On the Theory of the Free Electron Laser. | 139 |
| G. Dattoli, A. Marino and A. Renieri | |
| Pulse Propagation and Laser Lethargy in the Free Electron Laser | 175 |
| G.T. Moore and M.O. Scully | |
| Free Electron Laser Wave and Particle Dynamics | 189 |
| W.B. Colson | |
| Analysis of the Single Pass Free Electron Laser: The Multimode Small Signal Regime | 211 |
| G. Dattoli, A. Marino and A. Renieri | |
| The Non-Linear Theory of the Free Electron Laser with Transverse Dimensional Effects | 229 |
| P. Sprangle and Cha-Mei Tang | |

| | |
|--|-----|
| A Three Dimensional Calculation of Electron Energy Loss in a Variable Parameter Free-Electron Laser . . . | 243 |
| A. Luccio and C. Pellegrini | |
| An experiment on Free Electron Laser Efficiency Enhancement with a Variable Wiggler. | 263 |
| H. Boehmer, M.Z. Caponi, J. Munch, G. Neil and N. Schoen | |
| Free Electron Laser Development Program at LASL | 277 |
| R.W. Warren | |
| FELIX - A Proposed Experimental Facility for Free Electron Laser Investigations | 285 |
| M.W. Poole | |
| The FEL-Microtron Activity at the CNEN Frascati Center . . . | 295 |
| G. Dattoli, A. Marino and A. Renieri | |
| Optimization of a Free Electron Laser for Far Infrared . . | 311 |
| E.D. Shaw and C.K.N. Patel | |
| The UCSB Free Electron Laser Experimental Program | 321 |
| L.R. Elias | |
| Storage Ring Operation of Free Electron Laser | 331 |
| G. Dattoli, A. Marino and A. Renieri | |
| Gain Expanded Free Electron Lasers | 413 |
| J.N. Eckstein | |
| Cancellation of Transverse Excitation in Gain Expanded Free Electron Lasers | 425 |
| J.M.J. Madey | |
| An Introduction to the Theory of the Isochronous Storage Ring Laser | 467 |
| D.A.G. Deacon | |
| FEL Activity in Frascati INFN National Laboratories | 481 |
| S. Tazzari | |
| FREE ELECTRON LASERS OPERATING IN THE RAMAN REGIME | |
| High-Gain Millimeter and Submillimeter Free Electron Lasers | 501 |
| V.L. Granatstein, P. Sprangle and R.K. Parker | |

| | |
|---|-----|
| CONTENTS | ix |
| Free Electron Lasers Based Upon Stimulated Raman Backscattering: A Survey | 523 |
| T.C. Marshall | |
| A Free Electron Laser Experiment | 541 |
| H. Boehmer, M.Z. Caponi and J. Munch | |
| OPTICAL KLYSTRONS | |
| The Optical Klystron for Coherent X-Ray Generation | 557 |
| F. De Martini and J.A. Edighoffer | |
| Coherent Emission from a Bunched Electron Beam in a Wiggler | 571 |
| I. Boscolo and V. Stagno | |
| ACCELERATOR AND MAGNET TECHNOLOGIES RELATED TO FREE ELECTRON LASER DESIGN | |
| Fundamentals of Accelerators for Single-Pass Free Electron Lasers | 597 |
| A. Luccio | |
| Electrostatic Accelerator Free Electron Lasers | 617 |
| L.R. Elias | |
| Periodic Magnets for Free Electron Lasers | 633 |
| M.W. Poole | |
| Technical Problems in the Construction of Wigglers and Undulators for Free Electron Lasers | 645 |
| A. Luccio | |
| APPLICATIONS OF FREE ELECTRON LASERS | |
| Some Potential Applications of Free Electron Lasers to Photochemistry | 669 |
| K.L. Kompa | |
| INDEX | 685 |
