

CONTENTS

High Intensity Lasers	1
A. Mysyrowicz	
Recent Aspects of Multiphoton Ionization of Atoms.....	11
P. Agostini and E. Mevel	
Theory of Laser-Atom Interactions.....	39
C. J. Joachain	
Harmonic Generation at High Intensities.....	95
K. J. Schafer, J. L. Krause and K. C. Kulander	
Comparison of Kinetic Energy Distributions of C ²⁺ Ionic Fragments Induced by Multiphoton Ionization and Fast Ion Impact from CO ₂ ..	107
T. S. Luk, K. Boyer and C. K. Rhodes	
Resonant Degenerate Four-Wave Mixing.....	113
D. Kupiszewska	
Semiclassical Calculation of Atomic Processes	123
R. M. More	
Experiments on Rydberg Wave Packets	163
L. D. Noordam, A. ten Wolde and H. B. van Linden van den Heuvell	
Laser Manipulation of Neutral Atoms	193
A. Aspect	
Second Harmonic Production from Solid Targets	207
D. von der Linde	
Raman Study of Laser-Induced Structure Modifications of Ion-Amorphized Silicon.....	239
L. P. Avakyants, G. D. Ivlev and E. D. Obraztsova	
Properties of Condensed Matter Under Planetary Interior Conditions Measured by Femtosecond Spectroscopy.....	249
M. C. Downer, H. Ahn, D. H. Reitze, D. M. Riffe and X.-Y. Wang	

Absorption Spectroscopy of Compressed Matter..... T. A. Hall	273
Density Functional and Nonequilibrium Methods for Unusual States of Matter Produced Using Short-Pulse Lasers..... C. Dharma-Wardana	311
Theory of Complex Spectra from Laser Plasmas..... J. Bauche and C. Bauche-Arnoult	325
Influence of the Prepulse on the X-ray Yield of a Subpicosecond Laser-Produced Plasma..... J. C. Gauthier, A. Rousse, F. Fallies, J.-P. Geindre, P. Audebert, A. Mysyrowicz, G. Grillon, J.-P. Chambaret and A. Antonetti	357
Model Calculations of H-like Recombination Schemes..... L. Bonnet	367
Theory of Plasma Wave Absorption..... P. Mulser	383
Parametric Instabilities in Picosecond Time Scales..... H. Baldis, W. Rozmus, C. Labaune, Ph. Mouniax, D. Pesme, S. Baton and V. T. Tikhonchuk	437
Index	475
