

Contents

<i>Introduction: Progress and Perspectives in Laser Spectroscopy</i> By H. Walther	1
 <i>Part I. Fundamental Applications of Laser Spectroscopy</i>	
Precision Spectroscopy and Laser Frequency Control Using FM Sideband Optical Heterodyne Techniques. By J.L. Hall, T. Baer, L. Hollberg, and H.G. Robinson	15
High Precision Laser Interferometry for Detection of Gravitational Radiation. By K. Maischberger, A. Rüdiger, R. Schilling, L. Schnupp, W. Winkler, and H. Billing	25
Optical Cavity Laser Interferometers for Gravitational Wave Detection By R.W.P. Drever, J. Hough, A.J. Munley, S.A. Lee, R. Spero, S.E. Whitcomb, H. Ward, G.M. Ford, M. Hereld, N.A. Robertson, I. Kerr, J.R. Pugh, G.P. Newton, B. Meers, E.D. Brooks III, and Y. Gursel	33
A Proposed Two Photon Correlation Experiment as a Test of Hidden Variable Theories. By M.O. Scully	41
Lamb Shift Studies of $C1^{16+}$. By O.R. Wood II, C.K.N. Patel, D.E. Murnick, E.T. Nelson, M. Leventhal, H.W. Kugel, and Y. Niv	45
 <i>Part II. Laser Spectroscopic Applications</i>	
Selective Spectrum Simplification by Laser Level Labeling By N.W. Carlson, K.M. Jones, G.P. Morgan, A.L. Schawlow, A.J. Taylor, H.-R. Xia, and G.-Y. Yan	51
Resonance Ionization Spectroscopy: Counting Noble Gas Atoms By G.S. Hurst, M.G. Payne, C.H. Chen, R.D. Willis, B.E. Lehmann, and S.D. Kramer	59
Linewidth Characteristics of (GaAl) as Semiconductor Diode Lasers By A. Mooradian, D. Welford, and M.W. Fleming	67
High Sensitivity Spectroscopy with Tunable Diode Lasers – Detection of O_2 Quadrupole Transitions and ^{14}C . By J. Reid	71
New Techniques and Applications for High Resolution Tunable Submillimeter Spectroscopy. By H.R. Fetterman and W.A.M. Blumberg ..	76
Infrared Heterodyne Spectroscopy of Ammonia and Ethylene in Stars By A.L. Betz	81

VIII

Stark Modulation Spectroscopy in the Visible Region. By K. Uehara	89
Alignment Effects in Optogalvanic Spectroscopy By P. Hannaford and G.W. Series	94
Spin Polarization of Atoms by Laser Driven Two Photon and Excimer Transitions. By N.H. Tran, N.D. Bhaskar, and W. Happer	103
High Power Tunable Mid IR NH ₃ -N ₂ Laser and Its Application for Selective Interaction with Multiatomic Molecules. By A.Z. Grasiuk, A.P. Dyad'kin, A.N. Sukhanov, B.I. Vasil'ev, and A.B. Yastrebkov ...	108

Part III. Double Resonance

Infrared-Ultraviolet Double Resonance Studies of Molecular Energy Transfer. By B.J. Orr	117
Pulsed Optical-Optical Double Resonance Spectroscopy of ⁷ Li ₂ By R.A. Bernheim, L.P. Gold, P.B. Kelly, T. Tipton, C.A. Tomczyk, and D.K. Veirs	122
Double-Resonance Polarization Spectroscopy of the Caesium-Dimer (Cs ₂) By M. Raab and W. Demtröder	126
Laser-Microwave Spectroscopy of Li ⁺ Ions. By R. Neumann, J. Kowalski, F. Mayer, S. Noehte, R. Schwarzwald, H. Suhr, K. Winkler, and G. zu Putlitz	130
Laser-Induced Coherence Effects in Molecular Beam Optical-RF Double Resonance. By S.D. Rosner, A.G. Adam, T.D. Gaily, and R.A. Holt	135
Probing the Dressed Molecule Energy Levels by Infrared-Radiofrequency Double Resonance. By A. Jacques and P. Glorieux	140
Infrared-Microwave Double Resonance Spectroscopy of Tetrahedral Molecules Using a Tunable Diode Laser. By M. Takami	146
Molecular-Beam, Laser-RF, Double Resonance Studies of Calcium Monohalide Radicals. By W.J. Childs, D.R. Cok, and L.S. Goodman	150

Part IV. Collision-Induced Phenomena

Collision-Induced Coherence in Four Wave Light Mixing By N. Bloembergen, A.R. Bogdan, and M.W. Downer	157
Collisional Effects in Resonance Fluorescence By S. Reynaud and C. Cohen-Tannoudji	166
Theory of Nonlinear Optical Resonances Induced by Collisions By G. Grynberg	174
Polarization Intermodulated Excitation (POLINEX) Spectroscopy of Excited Atoms. By Ph. Dabkiewicz, T.W. Hänsch, D.R. Lyons, A.L. Schawlow, A. Siegel, Z.-Y. Wang, and G.-Y. Yan	178
Laser Optical Pumping in Atomic Vapors with Velocity Changing Collisions. By W.W. Quivers, Jr., R.A. Forber, A.P. Ghosh, D.J. Heinzen, G. Shimkaveg, A. Attili, C. Stubbins, P.G. Pappas, R.R. Dasari, M. Feld, Y. Niv, and D.E. Murnick	186
Dressed Atom Approach to Line Broadening By D. Pritchard and B. Walkup	197

Collisional Processes Between Laser-Excited Potassium Atoms By M. Allegrini, P. Bicchi, S. Gozzini, and P. Savino	204
Noble Gas Induced Relaxation of the Li 3S-3P Transition Spanning the Short Term Impact Regime to the Long Term Asymptotic Regime By T.W. Mossberg, R. Kachru, T.J. Chen, S.R. Hartmann, and P.R. Berman	208
Double Resonance Studies of Collision-Induced Transitions in a Molecular Beam. By T. Shimizu, F. Matsushima, and Y. Honguh	212

Part V. *Nonlinear Processes*

New Phenomena in Coherent Optical Transients By R.G. Brewer, R.G. Devoe, S.C. Rand, A. Schenzle, N.C. Wong, S.S. Kano, and A. Wokaun	219
Stimulated Raman Studies of CO ₂ -Laser-Excited SF ₆ By P. Esherick, A.J. Grimley, and A. Owyong	229
Pulsed and CW Molecular Beam CARS Spectroscopy By R.L. Byer, M. Duncan, E. Gustafson, P. Oesterlin, and F. Konig ..	233
Spectroscopy of Higher Order CARS and CSRS. By L. Songhao, W. Fugui, Y. Bingkun, L. Min, C. Yisheng, and Z. Fuxin	242
Multiphoton Free-Free Transitions. By A. Weingartshofer, J.K. Holmes, and J. Sabbagh	247
Precision Studies in 3-Level Systems. By B.W. Peuse, R.E. Tench, P.R. Hemmer, J.E. Thomas, and S. Ezekiel	251
Non-Linear Hanle Effect: Saturation Parameters and Power Enhancements in Lasers. By F. Strumia, M. Inguscio, and A. Moretti	255
Atomic Coherence Effects in Resonant Four-Wave Mixing Spectroscopy of Sodium. By D.G. Steel, J.F. Lam, and R.A. McFarlane	260
On the Validity of the Judd-Ofelt Theory for Two-Photon Absorption in the Rare Earths. By M. Dagenais, M. Downer, R. Neumann, and N. Bloembergen	264
Molecular Spectroscopy Using Diode and Combined Diode-CO ₂ Lasers By G. Winnewisser, K. Yamada, R. Schieder, R. Guccione-Gush, and H.P. Gush	268
Two-Photon Light Shift in Optically Pumped FIR Lasers By W.J. Firth, C.R. Pidgeon, B.W. Davis, and A. Vass	272
Optical Stark Splitting of Rotational Raman Transitions By R.L. Farrow and L.A. Rahn	277

Part VI. *Rydberg States (Panel Discussion)*

Resonant Collisions Between Two Rydberg Atoms. By T.F. Gallagher, K.A. Safinya, F. Gounand, J.F. Delpéch, and W. Sandner	283
Rydberg Atoms in Magnetic Fields – The Landau Limit of the Spectrum By J.C. Gay and D. Delande	285
High Precision Energy Level Measurements in Helium By E. Giacobino, A. Brillet, and F. Biraben	288

Rydberg-Rydberg Interactions in Dense Systems of Highly Excited Atoms By S. Haroche, G. Vitrant, and J.-M. Raimond	290
Turning Off the Vacuum. By D. Kleppner	292
Influence of the Earth Magnetic Field of the Photoionization Stark Spectrum of Excited Sodium Atoms. By S. Feneuille, S. Liberman, E. Luc-Koenig, J. Pinard, and A. Taleb	294
Rydberg Superradiance. By L. Moi, C. Fabre, P. Goy, M. Gross, S. Haroche, and J.-M. Raimond	297
Collision Effects with High-Rydberg State Atoms. By B.P. Stoicheff	299
Perturbations in Rydberg Sequences Probed by Lifetime, Zeeman-Effect and Hyperfine-Structure Measurements. By S. Svanberg	301

Part VII. *Methods of Studying Unstable Species*

Optogalvanic Spectroscopy in Recombination-Limited Plasmas with Color Center Lasers. By R.J. Saykally, M.H. Begemann, and J. Pfaff	305
LIF Studies of Fragment Ions: CH ⁺ and CD ⁺ By A. O'Keefe, F.J. Grieman, and B.H. Mahan	310
Sub-Doppler Spectroscopy of Some Gaseous Metal Oxide Molecules By A.J. Merer	315
The Infrared Spectrum of H ₃ ⁺ . By T. Oka	320
Infrared Vibrational Predissociation Spectroscopy of Small Molecular Clusters. By J.M. Lisy, M.F. Vernon, A. Tramer, H.-S. Kwok, D.J. Krajnovich, Y.R. Shen, and Y.T. Lee	324
The Direct Photodissociation of van der Waals Molecules By E. Carrasquillo, P.R.R. Langridge-Smith, and D.H. Levy	333
Optothermal Infrared Spectroscopy. By T.E. Gough and G. Scoles	337
Laser Magnetic Double Resonance Spectra at 5 and 10 μm By R.S. Lowe and A.R.W. McKellar	341
High Sensitivity Color Center Laser Spectroscopy. By R.F. Curl, Jr., J.V.V. Kasper, P.G. Carrick, E. Koester, and F.K. Tittel	346

Part VIII. *Cooling, Trapping and Control of Ions, Atoms, and Molecules*

Mono-Ion Oscillator for Ultimate Resolution Laser Spectroscopy By H. Dehmelt	353
Laser Cooling and Double Resonance Spectroscopy of Stored Ions By W.M. Itano and D.J. Wineland	360
Spectroscopy of Trapped Negative Ions By D.J. Larson and R.M. Jopson	369
Atomic Deceleration, Monochromatization and Trapping in Laser Waves: Theory and Experiments. By V.S. Letokhov and V.G. Minogin	377

Part IX. *Surface and Solid State*

FM Spectroscopy and Frequency Domain Optical Memories By G.C. Bjorklund, W. Lenth, M.D. Levenson, and C. Ortiz	389
---	-----

Spectroscopy of Very Weakly Absorbing Condensed Media
 By C.K.N. Patel, E.T. Nelson, and A.C. Tam 399

Optical Hole-Burning and Ground State Energy Transfer in Ruby
 By P.E. Jessop and A. Szabo 408

Surface-Enhanced Nonlinear Optical Effects and Detection of
 Adsorbed Molecular Monolayers. By Y.R. Shen, C.H. Chen,
 T.F. Heinz, and D. Ricard 412

Surface Enhanced Raman Scattering from Lithographically
 Prepared Microstructures. By P.F. Liao 420

Investigation of Molecule-Surface Interaction by Laser-Induced
 Fluorescence. By F. Frenkel, J. Häger, W. Krieger, H. Walther,
 C.T. Campbell, G. Ertl, H. Kuipers, and J. Segner 425

Hyperfine Studies of Rare-Earth Ions Dilute in Optical Solids
 By L.E. Erickson and K.K. Sharma 429

Part X. Vacuum Ultraviolet

Anti-Stokes Scattering as an XUV Radiation Source
 By S.E. Harris, R.W. Falcone, M. Gross, R. Normandin, K.D. Pedrotti,
 J.E. Rothenberg, J.C. Wang, J.R. Willison, and J.F. Young 437

The Study of Atomic and Molecular Processes with Rare-Gas Halogen
 Lasers. By H. Egger, M. Rothschild, D. Muller, H. Pummer,
 T. Srinivasan, J. Zavelovich, and C.K. Rhodes 446

Optical Second Harmonic Generation by a Single Laser Beam in an
 Isotropic Medium. By R.R. Freeman, J.E. Bjorkholm, R. Panock,
 and W.E. Cooke 453

Quantitative VUV Absorption Spectroscopy of Free Ions
 By T.J. McIlrath and T.B. Lucatorto 458

Laser-Assisted Collisional Energy Transfer Between Rydberg States
 of Carbon Monoxide. By J. Lukasik and S.C. Wallace 462

Part XI. Progress in New Laser Sources

Optically Pumped Semiconductor Platelet Lasers. By M.M. Salour 469

Short Wavelength Laser Design. By P.L. Hagelstein 474

Free Electron Laser Experiment on the ACO Storage Ring (Orsay)
 By P. Elleaume, C. Bazin, M. Billardon, D.A.G. Deacon, Y. Farge,
 J.M.J. Madey, J.M. Ortega, Y. Pétroff, K.E. Robinson, and
 M.G. Velghe 480

Simple UV, Visible and IR Recombination Lasers in Expanding
 Metal-Vapor Plasmas. By W.T. Silfvast and O.R. Wood, II 484

A Two-Photon Laser. By B. Nikolaus, D.Z. Zhang, and P.E. Toschek 486
