RECENT RESEARCHES IN SHOCK-TUBE SPECTROSCOPY

Ralph W. Nicholls

Abstract	1
Introduction	1
Shock Tubes and the Spectroscopic Method	2
Shock-Tube Spectroscopy of Astrophysically Important Diatomic Molecules	14
Diagnostic Shock-Tube Spectra and the Kinetic Study of Collision Processes	25
References	27

RADIATIVE DIAGNOSTICS NONEQUILIBRIUM FLOWS

Walter H. Wurster

Introduction	33
Nonequilibrium Emission Measurements	34
Absorption Measurements in the Vacuum Ultraviolet	43
Summary	47
References	47

TEMPERATURE ERRORS IN PLASMA DIAGNOSTICS AND THEIR POSSIBLE EFFECTS ON ABSOLUTE TRANSITION PROBABILITIES

G.W. Wares, S.J. Wolnik and R.O. Berthel

Introduction	49
Determination of Plasma Temperature from Relative gf-Values	50
The AFCRL Shock Tube Absolute gf-Value Program Using Ultrasonics	52
Errors in the Corliss and Bozman NBA Free-Burning ARC gf-Values	53
Conclusion	58
References	60

IMPURITY MEASUREMENTS IN THE EXPANSION TUBE Edmund J. Gion	61
References	64
SOME ASPECTS OF THE REFRACTIVE BEHAVIOR OF GASES Daniel Bershadter	
Introduction	65
Constitutive Properties and Wave Propagation in a Medium	67
Lorentz Electron Theory of Dispersion	68
The Dispersion Function	71
Spectral Interferometry: The Hook Method	74
Special Features	78
References	82
INTERFEROMETRIC GAS DIAGNOSTICS BY THE HOOK METHOD Martin C. E. Huber	
Introduction	85
The Experimental Setup	88
Mach-Zehnder Interferometers	93
Stigmatic Spectrographs, Detectors and Light Sources	95
Theoretical Aspects of the Hook Method, Review of Experiments	97
Summary	108
References	109
HOOK INTERFEROMETRY USING A SINGLE PLATE INTERFEROMETER Joseph H. Spurk	113
References	117
SOME OPTICAL DIAGNOSTIC TECHNIQUES INVOLVING HIGH POWER LASERS A. J. Alcock	
Introduction	119
Laser-Produced Plasma Studies in the Nanosecond Region	121
Laser-Produced Plasma Studies with Subnanosecond Resolution	125
Recent Developments	132
References	134

PULSE LASER HOLOGRAPHIC INTERFEROMETRY
Franz C. Jahoda

Principles of Holography	138
Holographic Interferometry	140
Cine-Interferometry	149
Bibliography	153

THE ANALYSIS OF PLASMA BY LIGHT SCATTERING
Ralph W. Lovberg

Introduction	155
Elements of the Theory	155
Experimental Procedures	160
A Scattering Experiment	169
References	176

LASER - GENERATION OF RAREFIED PLASMA FLOWS
David W. Koopman

Abstract	177
Introduction	178
Apparatus	179
Measurements on Laser-Produced Flows	181
Study of Counter-Streaming Ionized Flows	190
References	196

A SUMMARY OF RECENT RESEARCH ON CONTINUOUS-WAVE
CHEMICAL LASERS

Terrill A. Cool

Introduction	197
Four Basic Processes Influence CW Chemical Laser Operation	197
Approach One: Laser Action Directly from Product Molecules in Fluid Mixing Chemical Lasers	199
A Second Approach: Laser Action by Selective Energy Transfer from Produce Molecules in Fluid Mixing Chemical Lasers	203
A Comparison of Approaches One and Two	209
Total Population Inversion	213
A Third Approach: A CW Explosion or Detonation Wave Chemical Laser	214
Conclusion	216
References	218

EXCITATION OF GASES USING WAVELENGTH-TUNABLE LASERS
C. Forbes Dewey, Jr.

Abstract	221
Introduction	221
Organic Dye Lasers	222
Semiconductor Lasers	238
Nonlinear Optical Techniques	244
Resonant Interactions Between Lasers and Gases	251
References	258
Bibliography of Dye Laser Papers	264

PRODUCTION OF NON-EQUILIBRIUM ATOMIC POPULATIONS
USING TUNABLE LASER EXCITATION

Thomas J. McIlrath	271
Notes	278

RECENT STUDIES OF THE CS₂/O₂ COMBUSTION LASER
G. H. Kimbell, T.V. Jacobson, R.D. Stuart,
S.J. Arnold and K.D. Foster

Abstract	279
Introduction	279
Transversely Sparked Laser	280
CW Combustion Laser	284
Summary and Conclusions	287
References	287

INDEX	289
