

CONTENTS

VOLUME 8

<i>Contents of Volume 9</i>	xix
<i>Preface</i>	xxiii
1 Relationship of FEL Physics to Accelerator Physics	1
<i>P. L. Morton</i>	
2 Additional Experimental Results from the Stanford 3 Micron FEL	49
<i>J. N. Eckstein, J. M. J. Madey, K. Robinson, T. I. Smith, S. Benson, D. Deacon, R. Taber, and A. Gaupp</i>	
3 The Stanford Superconducting Linear Accelerator	77
<i>Todd I. Smith</i>	
4 Results of the First Phase of the ACO Storage Ring Laser Experiment	89
<i>C. Bazin, M. Billardon, D. A. G. Deacon, P. Elleaume, Y. Farge, J. M. J. Madey, J. M. Ortega, Y. Petroff, K. E. Robinson, and M. Velghe</i>	
5 Optical Klystron Spontaneous Emission and Gain	119
<i>Pascal Elleaume</i>	
6 Status and Perspectives of the FEL Experiment at Brookhaven	153
<i>A. Luccio</i>	
7 Studies on the Undulator for the Free-Electron Laser Experiment at the National Synchrotron Light Source	181
<i>A. Luccio and S. Krinsky</i>	

8	FEL Program at the Adone Storage Ring <i>R. Barbini and G. Vignola</i>	235
9	A Free-Electron Laser for the Storage Ring Bessy <i>Andreas Gaupp</i>	263
10	U.K. Free-Electron Laser Proposal <i>S. D. Smith, C. R. Pidgeon, M. W. Poole, and K. Hohla</i>	275
11	Theory of a Free-Electron Laser with Gain Expansion <i>Norman M. Kroll</i>	281
12	A Note on the Madey Gain-Spread Theorem <i>Norman M. Kroll</i>	315
13	Kinetic Theory of a Free-Electron Laser Amplifier with Guide Magnetic Field <i>Shayne Johnston</i>	325
14	Nonadiabatic Corrections and Detrapping for Variable Parameter Free-Electron Lasers <i>J. C. Garrison and J. Wong</i>	349
15	An Experiment on FEL Efficiency Enhancement With a Variable Wiggler <i>H. Boehmer, M. Z. Caponi, J. Edighoffer, S. Fornaca, J. Munch, G. R. Neil, B. Saur, and C. Shih</i>	367

- 16 Spontaneous Spectrum and Small-Signal Gain for a Tapered Wiggler Free-Electron Laser 381  
*Chun-Ching Shih and Maria Zales Caponi*
- 17 Status of the Free-Electron Laser Experiment at Los Alamos 397  
*Roger W. Warren, Charles A. Brau, Brian E. Newnam, William E. Stein, John G. Winston, and Lloyd M. Young*
- 18 Pulse Propagation in the Tapered Wiggler 415  
*Hazim Al-Abawi, John K. McIver, Gerald T. Moore, and Marlan O. Scully*
- 19 Optical Pulse Evolution in the Stanford Free-Electron Laser and in a Tapered Wiggler 457  
*W. B. Colson*
- 20 Axial Expansion of the Electron Pulse in a Free-Electron Laser 489  
*Thomas Speziale and W. B. Colson*
- 21 The Effect of Space Charge Fields due to Finite Length Electron Beams in the Free-Electron Laser 503  
*Cha-Mei Tang, H. Freund, P. Sprangle, and W. Colson*
- 22 Hamiltonian Picture of the Free-Electron Laser: Multimode, Super Mode and All That 515  
*G. Dattoli, A. Marino, and A. Renieri*
- 23 Optical Mode Control in the Free-Electron Laser 531  
*C. James Elliott*
