

CONTENTS

<i>List of Contributors</i>	vii
<i>Preface</i>	ix
<i>Contents of Previous Volumes</i>	xi

Application of Lasers to Molecular Biology

JAMES A. McCRAY and P. D. SMITH

I. Introduction	1
II. Laser Activation of Photosynthesis	2
III. Laser Photolysis of Ligand-Hemoprotein Complexes	12
IV. Resonant Raman Spectroscopy	22
V. Laser-Induced Fluorescence	30
VI. Laser Doppler Scattering	33
VII. Applications of Picosecond Pulses	35
References	39

Recyclable Input Devices and Spatial Filter Materials for Coherent Optical Processing

DAVID CASASENT

I. Introduction	43
II. Optical System Configurations	45
III. Device and Material Considerations	48
IV. Deformable Devices and Materials	51
V. Liquid Crystals	63
VI. Crystals Exhibiting the Pockels Effect	70
VII. Summary and Conclusions	100
References	103

Lasers in Medicine

R. M. DWYER and M. BASS

I. Introduction	107
II. Otolaryngology	110
III. Ophthalmology	114
IV. Neurosurgery	117
V. Burn Surgery	118
VI. Gastroenterology	120
VII. Dermatology	124
VIII. Optical Design for Lasers in Surgery	129
References	132

Optical Data Storage

H. HASKAL and D. CHEN

I. Introduction	135
II. Fundamentals of Optical Data Storage	137
III. Optical Recording Materials and Technology	149
IV. Components for Optical Data Storage	168
V. Optical Storage Systems	197
VI. Conclusion	224
References	226

<i>Subject Index</i>	231
