<i>Chapter 1</i>	INTRODUCTION TO LASER SAFETY	
	1.1 Introduction	1
	1.2 Laser Hazards	3
	1.2.1 Skin Hazards	4
	1.2.2 Electrical Hazards	5
	1.2.3 Chemical and Associated Hazards	5
	1.2.4 Miscellaneous Ancillary Hazards	6
	1.3 Laser Hazard Analysis and Control	6
	1.4 Laser Classification	7
	1.5 Safety Precautions.	8
	1.5.1 Class I Controls	8
	1.5.2 Class II Controls	8
	1.5.3 Class III Controls.	8
	1.5.4 Class IV Controls.	9
	1.5.5 Applying the Safety Procedures	10
	1.6 Laser Eye Protection.	10
	1.7 Non-Laser Sources.	10
	1.8 Review Questions	11
	1.9 References.	11
<i>Chapter 2</i>	REVIEW OF OPTICAL PHYSICS	
	2.1 Introduction	13
	2.2 Wave Motion	13
	2.3 The Electromagnetic Spectrum	14
	2.4 Wave-Particle Duality	15
	2.5 The Wave Picture of Radiation	16
	2.6 The Particle Picture of Radiation	17
	2.7 Interaction of Electromagnetic Radiation with Matter	19

2.8	Interaction at an Interface	21
2.8.1	Specular and Diffuse Reflection	21
2.8.2	Specular Reflection Formulas	23
2.8.3	Refraction	23
2.9	Interaction with a Medium	25
2.9.1	Transmission	25
2.9.2	Absorption	26
2.10	Interference and Diffraction Effects	29
2.10.1	Interference	29
2.10.2	Diffraction	30
2.10.3	Scattering	32
2.11	Sources of Radiation	33
2.12	Molecular and Atomic Transitions	34
2.13	Incandescent Sources	38
2.14	The Laser	39
2.14.1	Lasing Medium	39
2.14.2	Pumping System	40
2.14.3	Optical Cavity	41
2.14.4	Laser Operation	41
2.14.5	Types of Lasers	42
2.14.6	Temporal Modes of Operation	42
2.14.7	Spatial (TEM) Modes	46
2.14.8	Longitudinal Modes	47
2.14.9	Beam Diameter	47
2.14.10	Beam Divergence	50
2.14.11	Hot Spots	51
2.15	Characteristics of Light Sources, Coherent and Incoherent	51
2.15.1	Properties of Coherent and Incoherent Light Sources	51
2.15.2	Spatial Coherence	53
2.15.3	Temporal Coherence of Monochromaticity	54
2.15.4	Speckle	54
2.16	Radiometric and Photometric Terms and Units	54
2.16.1	Radiometric Terms	55
2.16.2	Describing Source Output	55
2.16.2.1	Irradiation of a Surface	55
2.16.3	Photometric Analogues of Radiometric Terms	58
2.16.3.1	Brightness	60
2.16.3.2	Intensity	60
2.17	Review Questions	60
2.18	References	62

Chapter 3

REVIEW OF ANATOMY AND PHYSIOLOGY OF THE EYE AND SKIN

3.1	Introduction	65
3.2	The Eye	65

3.2.1	The Structure of the Eye	65
3.2.1.1	General	65
3.2.1.2	The Cornea	67
3.2.1.3	The Aqueous	67
3.2.1.4	The Iris	69
3.2.1.5	The Lens	70
3.2.1.6	The Vitreous Body	71
3.2.1.7	The Retina	71
3.2.1.8	The Choroid	76
3.2.1.9	The Sclera	76
3.2.2	Refractive Power of the Eye	76
3.2.3	The Standard Eye	77
3.2.4	Image Formation and Accommodation	77
3.2.4.1	Defects in Image Formation	78
3.2.4.2	Chromatic Aberration	78
3.2.5	Ocular Performance and Minimal Image Size	81
3.2.6	Retinal Function and Organization	84
3.2.6.1	Lateral Organization of the Retina	84
3.2.6.2	Spectral Sensitivity to Light	86
3.2.6.3	Visual Sensitivity in the UV and Near Infrared	87
3.2.6.4	Spectral Characteristics of the Ocular Media	87
3.2.6.5	Retinal Processing	89
3.2.6.6	Eye Movements	91
3.2.6.7	Dark Adaptation	92
3.2.6.8	The Visual Field	92
3.3	The Skin	93
3.3.1	Anatomy	93
3.3.2	Optical Properties	96
3.3.3	Body Heat Regulation	97
3.4	Review Questions	97
3.5	References	98
3.5.1	General References: Eye	98
3.5.2	General References: Skin	99
3.5.3	Specific References	99

*Chapter 4***EFFECTS OF OPTICAL RADIATION ON THE EYE**

4.1	Introduction	101
4.2	Determining Thresholds	102
4.3	The Effects of Different Optical Spectral Bands	103
4.3.1	Retinal Injury	103
4.3.2	Injury to the Anterior Portion of the Eye	104
4.4	Ultraviolet Radiation Effects	108
4.4.1	Photochemical Injury	108
4.4.2	Effects Upon the Retina	108

4.4.3	Effects Upon the Cornea	109
4.4.4	Lenticular Effects	112
4.4.5	Effects on the Iris	116
4.5	The Retinal Hazard Region (400-1400 nm)	116
4.5.1	Background	116
4.5.2	Determining the Retinal Exposure	117
4.5.2.1	Pupil Size	117
4.5.2.2	Spectral Transmission of the Ocular Medium	119
4.5.2.3	Spectral Absorption by the Retina and Choroid	120
4.5.2.4	Optical Image Quality	121
4.5.3	Small Images	124
4.5.4	Retinal Pigment Epithelium Absorption	126
4.5.5	Chorioretinal Thermal Injury	128
4.5.6	The Effect of Retinal Image Size	130
4.5.7	The Effect of Pulse Duration	130
4.5.8	Location of Retinal Burns	133
4.5.9	Very Long Exposure Durations	134
4.5.10	Large Temporary Changes in Visual Sensitivity; Flashblindness	138
4.5.11	Discomfort Glare	141
4.5.12	Veiling Glare	141
4.5.13	Flashing Lights	142
4.5.14	Injuries to the Iris at Retinal Hazard Power Levels	143
4.6	Infrared Radiation and the Eye	144
4.6.1	Infrared Spectral Bands	144
4.6.2	Infrared Cataract	144
4.6.3	Infrared Radiation and the Cornea	147
4.7	Uncertainties	149
4.8	Review Questions	149
4.9	References	151

Chapter 5

OPTICAL RADIATION HAZARDS TO THE SKIN

5.1	Introduction	161
5.2	Thermal Injury	162
5.2.1	Critical Temperatures	162
5.2.2	Dependence Upon Exposure Duration	162
5.2.3	Penetration Depth	163
5.2.4	Reflection	164
5.2.5	The Warmth Sensation and Heat Flow	166
5.3	Laser Injury Thresholds for the Skin	167
5.3.1	Thermal Injury	167
5.3.2	Delayed Effects	169
5.4	Ambient Environment and Heat Stress	169
5.5	Ultraviolet Radiation Effects on the Skin	170

	5.5.1	Ultraviolet Erythema.	170
	5.5.2	Delayed Effects.	175
	5.6	Photosensitivity and Photoallergy	176
	5.7	Phototherapy	176
	5.8	Review Questions	180
	5.9	References.	181
Chapter 6		OPTICAL HAZARDS FROM THE AMBIENT ENVIRONMENT	
	6.1	Introduction	187
	6.2	Sunburn	188
	6.3	Skin Effects from Chronic Exposure.	189
	6.4	Corneal Effects	199
	6.5	Snow Blindness	200
	6.6	Solar Retinitis	201
	6.6.1	A New Understanding	201
	6.6.2	Retinal Irradiance	201
	6.6.3	Clinical Reports.	202
	6.6.4	Damage Mechanisms	203
	6.6.5	Optically Aided Viewing	206
	6.6.6	Safety in Viewing the Sun.	207
	6.7	Reflected Sunlight and the Eye.	207
	6.8	Sunlight and Cataract	210
	6.9	Sunlight and Heat Stress	211
	6.10	Conclusions.	211
	6.11	Review Questions	212
	6.12	References.	212
Chapter 7		LASER SAFETY STANDARDS: EVOLUTION AND RATIONALE	
	7.1	Introduction	217
	7.2	Historical Development.	218
	7.2.1	Early History of Exposure Limits	218
	7.2.2	The ANSI Z-136 Development	220
	7.2.3	Historical Development of Hazard Classification.	221
	7.2.3.1	High-Power Lasers—Class IV Limits.	221
	7.2.3.2	Medium-Power Lasers—Class III Limits.	222
	7.2.3.3	Low-Power Lasers—Class II Limits	222
	7.2.3.4	Class I Limits.	223
	7.2.3.5	Class III Limits for CW Lasers.	224
	7.2.3.6	Class V	225
	7.2.3.7	ANSI Changes in 1976	226
	7.3	Exposure Limits	226
	7.3.1	The Concept of Threshold.	227
	7.3.2	The Safety Factor and Probit Plots	229
	7.3.3	Means of Determining Thresholds of Injury	235
	7.3.3.1	Direct Observation	235
	7.3.3.2	Histological Studies.	236

	7.3.3.3	Histochemical Studies of Laser Injury	236
	7.3.3.4	Electrophysiological Studies	237
	7.3.3.5	Behavioral Studies	237
	7.3.4	Limiting Apertures	241
	7.3.4.1	The 1-mm Aperture	241
	7.3.4.2	The 11-mm Aperture	241
	7.3.4.3	The 7-mm Aperture	241
	7.3.5	Spectral Dependence of Exposure Limits	242
	7.3.6	Repetitively Pulsed Laser Exposure	244
	7.3.7	Special Use Restrictions	244
7.4		Present Standards	244
	7.4.1	Local and State Regulations	246
	7.4.2	Present Federal Standards	246
	7.4.3	Foreign National Standards	248
	7.4.4	International Standards	248
7.5		Future Trends	248
	7.5.1	Delayed Effects	251
	7.5.2	Injury Mechanisms	252
7.6		References	255
7.7		Review Questions	259

Chapter 8

CURRENT LASER EXPOSURE LIMITS

8.1		Introduction	261
8.2		Present Exposure Limits	263
	8.2.1	Commonality of Limits	263
	8.2.2	Limiting Apertures	268
	8.2.3	Correction Factors A and B (C_A and C_B) for Eye Exposure	268
	8.2.4	Repetitively Pulsed Lasers	269
8.3		Point Source or Extended Source?	271
	8.3.1	Dual Limits in the Retinal Hazard Region	271
	8.3.2	Alpha Min (α_{min})	272
8.4		Spectral Correction Factors (C_A and C_B)	273
8.5		Restrictions on EL's	273
8.6		Repetitively Pulsed Lasers	273
8.7		Using the Tables and Figures	274
	8.7.1	Step 1	274
	8.7.2	Step 2	276
	8.7.3	Step 3	276
	8.7.4	Step 4	277
8.8		Examples	277
	8.8.1	Calculate or Determine the Exposure Limits for the Skin and the Eye for a 20-ns Pulsed Ruby Laser (Wavelength of 694.3 nm)	277
	8.8.2	Determine the Exposure Limits for a TEA Laser Which Has a Pulse Duration of 1 μ s (10^{-6} s) and a Wavelength of 10.6 μ m	278

8.8.3	Determine the EL's for an Erbium Q-Switched Laser Operating at 1.54 μm with a 20-ns Pulse . . .	278
8.8.4	Determine the EL for a Gallium-Arsenide Laser Operating at a PRF of 100 Hz at a Wavelength Varying Between 905 and 910 nm with 100-ns Pulses	278
8.8.5	Determine the Exposure Limit for a Helium-Neon Laser (632.8 nm) which is Chopped to Produce 1-ms Pulses at a Frequency of 50 Hz.	281
8.9	Future Developments	282
8.10	Review Questions	282
8.11	References.	283

*Chapter 9***LASER HAZARD CLASSIFICATION**

9.1	Introduction	285
9.2	Differences Between ANSI and BRH Laser Classification Schemes	286
9.3	The BRH Performance Standard for Laser Products	287
9.3.1	General Concepts	287
9.3.2	The Importance of the BRH Regulation	287
9.3.3	Accessible Emission Limits	288
9.3.4	Laser Products Versus Laser Systems	294
9.3.5	Tests for Compliance.	294
9.3.6	Performance Standards	296
9.3.7	User Information.	304
9.3.8	Servicing and Maintenance	305
9.3.9	Applicability of the BRH Standard	305
9.3.10	Reporting and Record Keeping Requirements.	307
9.3.11	Specific Purpose Laser Products	308
9.3.12	The Definition of Accessibility	309
9.4	Practical Examples	311
9.4.1	Example 1	312
9.4.2	Example 2	313
9.4.3	Example 3	313
9.4.4	Example 4	314
9.4.5	Example 5	315
9.4.6	Example 6	316
9.4.7	Example 7	318
9.4.8	Example 8	319
9.5	Conclusions	322
9.6	Review Questions	323
9.7	References.	323

*Chapter 10***PROTECTION STANDARDS FOR NON-LASER SOURCES**

10.1	Introduction	325
10.2	Criteria for Broad-Band Sources	326

10.3	Ultraviolet Radiation Criteria	327
10.3.1	General	327
10.3.2	The AMA Standard	328
10.3.3	The Development of the Envelope UV Hazard Criteria	328
10.3.4	Applying the Ultraviolet Standard.	332
10.3.5	UV-A Exposure Limits	333
10.4	Visible Radiation Criteria	335
10.5	Applying the Tentative Guidelines of USAEHA and ACGIH.	336
10.5.1	The Retinal Hazard Functions.	336
10.5.2	Retinal Thermal Hazard Evaluation.	339
10.5.3	Retinal Blue Light Hazard Evaluation	340
10.5.4	IR-A Hazard Analysis	341
10.6	ANSI Efforts.	341
10.7	BRH Standards	341
10.8	Infrared Standards.	342
10.9	Conclusion	342
10.10	Review Questions	343
10.11	References.	343

Chapter 11 **LASER OUTPUT MEASUREMENTS: RADIOMETRY AND CALORIMETRY**

11.1	Introduction	347
11.2	Rationale for Measurement.	347
11.3	Laser Parameters to Measure	349
11.4	Measuring Output Beam Radiant Exposure or Irradiance	349
11.5	Types of Radiometric Instruments	352
11.6	Detectors.	353
11.6.1	Thermal Detectors.	353
11.6.2	Quantum Detectors.	359
11.6.3	Specifying Detectors	361
11.6.4	Detectors to Resolve Short Pulses	366
11.7	Safety Meters	368
11.8	Calibration: The Standard Source or the Standard Detector	368
11.8.1	Spectroradiometric Standards	369
11.8.2	Electrical Substitution Method	370
11.8.3	Broad-Band Calibration	370
11.8.4	Acceptance Angle and Surface Uniformity	371
11.8.5	Calibration Techniques	372
11.9	Background Filtering.	372
11.10	Measurement Technique Pitfalls	374
11.10.1	Sources of Difficulty	374
11.10.2	A Checklist for Good Measurements	375

11.11	The Meaning of Accuracy and Precision	378
11.12	Conclusions	379
11.13	Review Questions	379
11.14	References	380

Chapter 12 **LASER BEAM DIAGNOSTICS**

12.1	Introduction	385
12.2	The Simplified Laser Beam	386
12.3	Beam Irradiance Versus Range	387
	12.3.1 Circular Beam	387
	12.3.2 Non-circular Beams	388
	12.3.3 Irregular Beam Profiles	389
12.4	Hazard Distance	389
12.5	The Gaussian Beam Profile	392
12.6	Measuring the Beam Diameter	392
	12.6.1 By Eye	393
	12.6.2 The Aperture Method	394
	12.6.3 The Ribbon Method	395
	12.6.4 The Knife Edge Method	396
	12.6.5 The Ronchi Ruling Method	397
	12.6.6 The Photographic Methods	400
	12.6.7 Using Damage Profiles	404
12.7	Calculating the Transmitted Power Through an Aperture Stop	404
12.8	Gaussian Beam Wavefronts	406
	12.8.1 Beam Divergence and Diameter	407
	12.8.2 Gaussian Beam Front Radius of Curvature	409
	12.8.3 Focused Gaussian Beam	409
12.9	Laser Beam Collimators	411
12.10	Plane Wavefronts	411
12.11	Review Questions	412
12.12	References	413

Chapter 13 **ATMOSPHERIC PROPAGATION OF LASER BEAMS**

13.1	General	415
13.2	Atmospheric Attenuation	415
	13.2.1 Scattering	415
	13.2.2 Absorption	421
	13.2.3 Measuring Atmospheric Attenuation	421
13.3	Atmospheric Turbulence	422
	13.3.1 Irradiance Fluctuations	422
	13.3.2 Projected Laser Radiance	427
	13.3.3 Radiance Profiles	428
	13.3.4 The Influence of Collection Aperture Size	429
	13.3.5 The Influence of Beam Path Height Above Ground	429

13.3.6	Conceptual Arguments	430
13.4	Probabilities of Retinal Injury	430
13.5	Atmospheric Turbulence and IR-C Laser Beams	431
13.6	The Propagation of Very High Power Laser Beams	431
13.7	Conclusions	431
13.8	Review Questions	433
13.9	Demonstration	434
13.10	References	435

Chapter 14 **RADIOMETRIC MEASUREMENTS REQUIRED FOR BROAD-BAND OPTICAL SOURCES**

14.1	Introduction	439
14.2	Required Radiometric Data	439
14.2.1	Spectral Irradiance	440
14.2.2	Spectral Radiance	440
14.2.3	Source Size	440
14.2.4	Range Data	440
14.3	Evaluation of Line Spectral Emission	441
14.4	Spectral Histograms	443
14.5	Biological Weighting of Spectroradiometric Data	444
14.6	The Monochromator Slit Function, and Stray Light	445
14.7	Radiance Distribution	450
14.8	Direct Reading Instruments	451
14.8.1	The NIOSH UV Meters	452
14.8.2	Earlier Direct Reading Instruments	456
14.8.3	The Outlook	456
14.9	Problems Associated with Measurements	456
14.9.1	Stray Light	457
14.9.2	Source Size	462
14.9.3	Wavelength Measurements	464
14.9.4	Infrared Measurement Problems	464
14.9.5	Spectroradiometric Standards	464
14.10	Calculation of Blackbody and Tungsten Sources	466
14.11	Computer Program Data Base	466
14.12	Review Questions	466
14.13	References	467

Chapter 15 **GENERAL HAZARD ANALYSIS AND CONTROLS**

15.1	Introduction	471
15.2	The Laser's Hazard Potentials-System Safety	473
15.2.1	Hazard Classification	473
15.2.2	General Concepts of System Safety	473
15.3	Laser System Design	475
15.3.1	Interlocks	476
15.3.2	Manual Switches	476
15.3.3	The Enclosure	477

- 15.3.4 Accidental Laser Firing477
- 15.3.5 Safe Laser Projectors477
- 15.3.6 Multiple Wavelengths480
- 15.3.7 Mode Locking481
- 15.3.8 Beam Hotspots482
- 15.4 The Population Potentially at Risk483
 - 15.4.1 Age, Experience, and Frequency of Exposure . . .483
 - 15.4.2 Exposure Duration-Intentional vs. Non-Intentional Exposure485
 - 15.4.3 Photo-Sensitive Individuals486
- 15.5 Environmental Considerations-Reflections and the Probability of Exposure486
 - 15.5.1 Reflections487
 - 15.5.2 Probability of Exposure488
 - 15.5.3 Diffuse Reflection Hazards489
 - 15.5.4 Specular vs. Diffuse Reflections491
 - 15.5.5 Retroreflection493
 - 15.5.6 Calculations of Specular Reflection495
 - 15.5.7 Diffuse Reflection498
 - 15.5.8 Reflectance500
- 15.6 Optically Aided Viewing501
- 15.7 Scanning Laser Beam506
 - 15.7.1 Linear Scans506
 - 15.7.2 Lissajous Scans507
- 15.8 Laser Accidents508
- 15.9 General Control Measures510
 - 15.9.1 Engineering Controls, Personnel Protection and Administrative Control510
 - 15.9.2 Control Measures for Very High Power Lasers . . .511
 - 15.9.3 The Choice of Control Measures513
 - 15.9.4 Class 4 Laser Controls513
 - 15.9.5 Precautions for Class 3 Medium Risk Laser Systems514
 - 15.9.5.1 Indoor Operations514
 - 15.9.5.2 Authorized Operators514
 - 15.9.5.3 Outdoor Operations515
 - 15.9.5.4 Ancillary Hazard Controls516
- 15.10 Conclusions516
- 15.11 Review Questions517
- 15.12 General References518
- 15.13 Some Laser Accident References519

Chapter 16 **EYE AND SKIN PROTECTION**

- 16.1 Introduction521
- 16.2 Applications521
- 16.3 Laser Viewing Enhancement Goggles523

16.4	Parameters of Laser Eye Protection.	523
16.4.1	Wavelength	523
16.4.2	Optical Density	524
16.4.3	Visual Transmittance of Eyewear	525
16.4.4	Laser Filter Damage Threshold (Maximum Irradiance).	525
16.4.5	Filter Curvature.	528
16.5	Methods of Construction.	528
16.6	Selecting Appropriate Eyewear Step-By-Step	531
16.6.1	Step 1	531
16.6.2	Step 2	531
16.6.3	Selecting the Most Suitable Eye Protector.	533
16.7	Commercial Sources of Laser Eye Protection	536
16.8	Eye Protection for Infrared Lasers	536
16.9	Testing Laser Eye Protection.	538
16.9.1	Routine User Tests	538
16.9.2	Testing Optical Density.	538
16.9.3	Environmental Tests	540
16.9.4	Tests of Translucent Side Shields or Frames	540
16.10	Marking of Eye Protectors.	541
16.11	Eye Protection For Pump Lamps and Tunable Wavelength Lasers	542
16.12	Polarizing Filters	542
16.13	Dynamic Eye Protection Devices.	543
16.14	Image Converter Tubes	543
16.15	Eye Protection Filters for Solar Radiation	548
16.16	Proper Fit	552
16.17	Skin Protective Agents for Ultraviolet Radiation (Sunscreens)	552
16.18	Design Specifications for Laser Protective Eyewear.	554
16.19	Protective Shields and Protective Garments.	555
16.19.1	Window Ports	555
16.19.2	Area Shields and Large Windows.	556
16.19.3	Protective Garments	557
16.20	Future Developments	558
16.21	Review Questions	559
16.22	References.	560

Chapter 17 **LASER SAFETY IN RESEARCH LABORATORIES AND
MEDICAL FACILITIES**

17.1	Introduction	563
17.2	Hazard Evaluation of New Lasers	564
17.3	Pump Lamps and Gas Discharge Tubes	564
17.4	Beam Paths	566
17.5	Diffuse Reflections and Beam Traps	568
17.6	Control Measures for Open Beam Paths.	571

17.7	Controlled Entry	572
17.8	Standard Operating Procedures	573
17.9	Temporary Beam Enclosures	574
17.10	Very High Power CW Lasers	575
17.11	Associated Hazards	575
17.12	Safety Aspects of Lasers in Medicine.	576
	17.12.1 Laser Surgical Facilities	577
	17.12.2 Laser Retinal Photocoagulators	581
17.13	Laser Diagnostic Equipment in Medicine.	583
17.14	Laser Surveys	585
17.15	Review Questions	588
17.16	References.	589
Chapter 18	SAFETY WITH LASERS USED IN CONSTRUCTION	
18.1	Introduction	591
18.2	Protection Standards for Construction Lasers	593
18.3	Hazard Classification.	596
	18.3.1 Class 1 Systems	596
	18.3.2 Class 2 Systems	596
	18.3.3 Class 3 Systems	596
18.4	Distance Measurement Laser Systems	598
18.5	Control Measures for Visible Class 3 CW Lasers Used for Surveying Alignment and Leveling	600
18.6	Weighing the Risks	604
18.7	Typical Laser Products	604
18.8	Review Questions	604
18.9	References.	607
Chapter 19	SAFETY WITH LASERS USED IN MANUFACTURING	
19.1	Introduction	609
19.2	Neodymium:YAG Laser Material Processing.	610
	19.2.1 Viewing Optics	611
	19.2.2 Enclosures.	612
	19.2.3 Reflections	613
19.3	High-Power CO ₂ Laser Cutting and Welding Equipment (1 kW to 20 kW)	614
19.4	Lasers in the Printing Industry	617
19.5	Ancillary Hazards	618
	19.5.1 Noise Hazards	618
	19.5.2 Airborne Contaminants.	618
19.6	Nondestructive Testing	620
19.7	Review Questions	621
19.8	References.	623
Chapter 20	LASER SAFETY WITH CONSUMER AND OFFICE PRODUCTS	
20.1	Introduction	625

20.2	Laser Displays and Laser Art	625
20.2.1	Lasers in Science Exhibits	626
20.2.2	Holographic Displays	627
20.2.3	Sound and Light Shows	627
20.2.4	Regulations and Standards for Laser Light Shows	631
20.2.5	Laser Beams in the Airspace	634
20.2.6	The Speckle Pattern and Laser Displays	635
20.2.7	Raster Scanned Laser Displays	635
20.2.8	Demonstration Lasers in the Classroom	641
20.3	Laser Point-of-Sale Terminals	641
20.4	Lasers in Office Machines	644
20.5	Laser Optical Fiber Transmission Systems	645
20.6	Laser Cane for the Blind	648
20.6.1	General Characteristics	648
20.6.2	Beam Divergence	649
20.6.3	Beam Irradiance	650
20.6.4	Projected Radiance	651
20.6.5	Hazard Analysis	652
20.7	Review Questions	652
20.8	References	653

Chapter 21 **LASER HAZARDS IN OUTDOOR APPLICATIONS:
MILITARY AND LIDAR**

21.1	Introduction	655
21.2	Ocular Exposure Conditions	655
21.3	Laser Hazard Analysis and Controls	657
21.4	Direct Beam Exposure	659
21.5	Reflected Beam Exposure	659
21.5.1	Diffuse Reflections	661
21.5.2	Specular Reflections	661
21.5.2.1	Standing Water	662
21.5.2.2	Snow	663
21.5.2.3	Ice	663
21.5.2.4	Water-Covered Ice	663
21.5.2.5	Glass Windows and View Blocks	663
21.6	Scanning Lasers	664
21.7	Extended Sources	668
21.8	Optical Viewing Instruments	669
21.9	Laser Range Controls	670
21.9.1	Hazardous Range (NOHD)	670
21.9.1.1	Caution Range	671
21.9.2	Backstops	672
21.9.3	Buffer Zones	673
21.9.4	Laser Range Safety Fan (LRSF)	673

	21.9.4.1 Hazardous Diffuse Reflection Area . . .	674
	21.9.4.2 Hazardous Area	674
	21.9.5 Airborne Laser Controls	674
	21.9.6 Eye Protection	677
	21.9.7 Limitations on Targets	677
	21.9.8 Laser Maintenance Tests	677
	21.9.9 Medical Surveillance	679
21.10	Operational Use of Laser Systems	679
21.11	Viewing Probability.	679
21.12	Training Mode.	680
21.13	Conclusions About Military Laser Safety	681
21.14	Laser Aiming Devices	681
21.15	Open-Air Communications Links	682
21.16	LIDAR	682
21.17	Environmental Impact.	684
21.18	Examples.	685
21.19	Review Questions	689
21.20	References.	690

Chapter 22 LAMPS AND LIGHTING SYSTEMS

22.1	Introduction	693
22.2	Lighting Terminology	694
22.3	Types of Lamps and Light Sources	695
	22.3.1 Incandescent Sources	695
	22.3.2 Low-Pressure Gaseous Discharge Lamps	703
	22.3.3 Fluorescent Lamps	703
	22.3.4 High Intensity Discharge (HID) Lamps	705
	22.3.4.1 Mercury Lamps	705
	22.3.4.2 High-Pressure Sodium Lamps	707
	22.3.4.3 Metal Halide Lamps.	708
	22.3.5 Short-Arc Lamps.	709
	22.3.6 Carbon-Arc Sources.	711
	22.3.7 Electroluminescent Lamps, Radioactive Sources, and Light-Emitting Diodes	714
	22.3.8 Flashlamps and Flashbulbs	715
22.4	Hazard Evaluation of a Lamp Source	716
	22.4.1 Preliminary Evaluation	716
	22.4.2 Required Data.	721
	22.4.3 Hazard Evaluation Using the Proposed Army/ ACGIH Criteria	723
	22.4.4 The Sliney-Freasier Method for Retinal Hazard Evaluation.	724
	22.4.5 Evaluating Blackbody Sources.	728
22.5	Protection and Control Measures for Broad-Band Optical Sources	733

22.5.1	Control Measures for Ultraviolet Sources- Germicidal Lamps	734
22.5.2	Phototherapy Lamps and Sunlamps	736
22.5.3	“Black Light” Lamps	739
22.5.4	Ultraviolet Curing Equipment	742
22.5.5	Office Copying Machines and Graphic Arts Lighting.	744
22.5.6	CRT Displays and Control Measures for Glare from Visible Sources	746
22.5.7	Hospital Light Sources	747
22.5.8	Photographic Flashbulbs	749
22.5.9	HID Lamps	752
22.5.10	Infrared and Light-Emitting Diodes.	753
22.5.11	Industrial and Home Baking Applications	755
22.5.12	Infrared Sources in Hospitals.	756
22.6	Concept of a Lamp Safety Standard for High-Intensity Sources	756
22.7	Review Questions	757
22.8	References.	758

*Chapter 23***PROJECTION SYSTEMS**

23.1	Introduction	763
23.2	Projection Optics.	763
23.3	Projected Radiance	767
23.4	Evaluating a Projection System	770
23.5	Examples of Specific Projectors	773
23.5.1	Example 1: Tungsten-Halogen Lamp Spotlight	773
23.5.2	Example 2: Xenon-Short-Arc Searchlight	775
23.5.3	Example 3: Emergency-Vehicle Lights	779
23.5.4	Example 4: Slide Projector	780
23.5.5	Example 5: Infrared Heat Gun	781
23.5.6	Example 6: Eye Movement Recorder	784
23.6	Searchlight Safety Measures	786
23.7	Ophthalmic Instruments	786
23.7.1	Diagnostic Instruments	786
23.7.2	Operating Room Instruments	787
23.8	Solar Simulators	789
23.8.1	Solar Simulator in Dermatology	789
23.8.2	Aerospace Solar Simulators.	790
23.9	Hazards from Solar Furnaces and Solar Power Facilities.	791
23.10	Review Questions	797
23.11	References.	799

*Chapter 24***WELDING ARCS**

24.1	Introduction	801
------	------------------------	-----

24.2	Welding Arc Characteristics	802
24.2.1	Types of Welding Arcs Processes	802
24.2.1.1	The Carbon-Arc	804
24.2.1.2	The Shielded Metal Arc	804
24.2.1.3	The Gas Tungsten Arc	806
24.2.1.4	Gas Metal Arc Welding	806
24.2.1.5	Flux Cored Arc Welding	808
24.2.1.6	The Plasma Arc	808
24.2.2	Arc Size and Temperature Profile	809
24.2.3	Optical Radiation Emitted from Welding Arcs	811
24.3	Hazards to the Skin	827
24.4	Eye Hazards	828
24.4.1	Corneal Injuries	828
24.4.2	Retinal Injuries from Welding Arcs	830
24.4.3	A Case Report	830
24.5	Epidemiological Studies	832
24.6	First Aid	833
24.7	Evaluating Welding Operations	834
24.8	Welding Hazard Index	834
24.9	Engineering Protective Measures	836
24.10	Welding Eye and Face Protection	841
24.11	Protective Clothing for Welders	847
24.12	Recommendations for Future Protective Filter/Curtain Requirements	847
24.12.1	Welding Filter Plates	847
24.12.2	Welding Filter Curtains	849
24.13	Flames and Molten Metal	850
24.13.1	Potential Hazards	850
24.13.2	Infrared Protection Measures for Heavy Industry	852
24.14	Review Questions	855
24.15	References	855

Chapter 25 **SAFETY PROGRAMS AND FORMAL TRAINING**
by JAMES SMITH, IBM

25.1	Introduction	861
25.2	Laser Safety Program	861
25.3	Training Objectives/Considerations	862
25.4	Training	863
25.4.1	Area Workers Training	863
25.4.2	Laser Workers Training	864
25.4.3	Management Training	864
25.4.4	Laser Safety Officer Training	865
25.5	Example Programs	866
25.5.1	Comprehensive Expandable Classroom Program	867
25.5.2	Movie-Tape/Slide Program	870

	25.5.3	Computer-Assisted Instruction (CAI)	872
25.6		Audio/Visual Sources	876
25.7		Summary	876
25.8		References	877
Chapter 26		MEDICAL SURVEILLANCE	
	26.1	Introduction	879
	26.1.1	Monitoring Related to Occupation	879
	26.1.2	Personnel Evaluation	880
	26.1.3	Health Evaluation	880
	26.1.4	Medical-Legal	880
	26.2	Rationale of Medical Examinations for Laser Workers	881
	26.3	Types of Routine Eye Examination Protocols	881
	26.3.1	Fundus	881
	26.3.2	Functional Examinations and Documentation	883
	26.3.3	Anterior Portion of the Eye	886
	26.4	Guidelines for the Examination of Laser Accident Victims	886
	26.4.1	External Examination-Lids, Brows, Cheek and Nose	886
	26.4.2	Corneal Involvement (only following either an ultraviolet or infrared C laser exposure)	886
	26.4.3	Lens	887
	26.4.4	Iris	887
	26.4.5	Vitreous	887
	26.4.6	Retina	887
	26.5	Changes in Standards for Medical Surveillance	888
	26.6	Case Histories	893
	26.7	Conclusions	895
	26.8	Review Questions	895
	26.9	References	897
Chapter 27		ANCILLARY HAZARDS	
	27.1	Introduction	899
	27.2	Common High Power Lasers and Their Applications	900
	27.3	Airborne Contaminants	900
	27.3.1	Contaminant Concentrations	900
	27.3.2	Removal by Ventilation	902
	27.3.3	Contaminant Detection	903
	27.3.4	Respiratory Protective Devices	904
	27.3.5	Skin Hazards	904
	27.3.6	Asbestos	907
	27.4	Fire Hazards	907
	27.5	Radiation Hazards	908
	27.6	Cryogenic Hazards	909
	27.7	Noise Hazards	909

27.8	Review Questions	910
27.9	References.	912
<i>Chapter 28</i>	ELECTRICAL HAZARDS	
28.1	Introduction	913
28.2	Electrical Accidents.	913
	28.2.1 A Near Accident	914
	28.2.2 Severe Accidental Shocks	914
	28.2.3 Electrocutions.	915
28.3	Physiological Effects of Electric Shock.	916
	28.3.1 Current Magnitude	916
	28.3.2 Frequency Effect	918
	28.3.3 Ventricular Fibrillation	919
28.4	The Dangerous Electrical Supplies.	919
28.5	Regulations, Standards and Standard Operating Procedures (SOPs).	920
28.6	Safety Guidelines to Prevent Electrical Shock.	920
28.7	First Aid for Severe Shock Victims.	924
28.8	Review Questions	925
28.9	References.	925
<i>Appendix A</i>	TERMS AND UNITS OF MEASURE—THE INTERNATIONAL SYSTEM OF UNITS (SI)	
A.1	The Three Classes of Units in the SI	929
A.2	Base Units of the SI.	930
A.3	Supplementary Units.	930
A.4	Conversion Factors and Constants.	935
	A.4.1 Useful Physical Constants	935
	A.4.2 Useful Mathematical Constants	935
	A.4.3 Useful Conversion Factors.	935
	A.4.4 Speed	941
	A.4.5 Temperature Conversion Formulas	941
	A.4.6 Optical Units.	941
A.5	Mathematical Symbols	944
A.6	Nomenclature for Radiation Dosimetry	945
<i>Appendix B</i>	THE HUMAN EYE	
B.1	The Standard Eye	947
B.2	Spectral Weighting Program for Eye Hazard Computations.	947
