<b>Foreword .....</b>	ix
<b>Introduction .....</b>	xi
<b>Part 1: Gaussian Beams .....</b>	1
1. On the Propagation of Gaussian Beams of Light Through Lenslike Media Including Those with a Loss or Gain Variation, <i>H. Kogelnik (Applied Optics, December 1965)</i> .....	3
2. Laser Beams and Resonators, <i>H. Kogelnik and T. Li (Proceedings of the IEEE, October 1966)</i> .....	11
3. Focal Shift in Focused Truncated Gaussian Beams, <i>Y. Li and E. Wolf (Optics Communications, July 1, 1982)</i> .....	29
4. Changes in the Characteristics of a Gaussian Beam Weakly Diffracted by a Circular Aperture, <i>P. Belland and J. P. Crenn (Applied Optics, February 1, 1982)</i> .....	35
5. Focusing Characteristics of a Truncated and Aberrated Gaussian Beam Through a Hemispherical Microlens, <i>K. S. Lee (Applied Optics, October 15, 1986)</i> .....	41
<b>Part 2: Coupling Theories for Laser Diodes to Single-Mode Optical Fibers .....</b>	47
6. Coupling and Conversion Coefficients for Optical Modes, <i>H. Kogelnik (Proceedings of the Symposium on Quasi-Optics, June 1964)</i> .....	49
7. Excitation of the Dominant Mode of a Round Fiber by a Gaussian Beam, <i>D. Marcuse (Bell Systems Technical Journal, October 1970)</i> .....	61
8. Design of a Miniature Lens for Semiconductor Laser to Single-Mode Fiber Coupling, <i>J.-I. Sakai and T. Kimura (IEEE Journal of Quantum Electronics, October 1980)</i> .....	70
9. Alignment of Gaussian Beams, <i>W. B. Joyce and B. C. De Loach, Jr. (Applied Optics, December 1, 1984)</i> .....	78
10. Alignment-Tolerant Optical-Fiber Tips for Laser Transmitters, <i>W. B. Joyce and B. C. De Loach, Jr. (Journal of Lightwave Technology, August 1985)</i> .....	88
11. Lens Coupling in Fiber-Optic Devices: Efficiency Limits, <i>A. Nicia (Applied Optics, September 15, 1981)</i> .....	91
12. Lens Coupling of Laser Diodes to Single-Mode Fibers, <i>M. Sumida and K. Takemoto (Journal of Lightwave Technology, June 1984)</i> .....	101
13. Influence of Lens Imperfections with LD and LED to Single-Mode Fiber Coupling, <i>B. Hillerich (Journal of Lightwave Technology, January 1989)</i> .....	107
14. Power Coupling from GaAs Injection Lasers into Optical Fibers, <i>L. G. Cohen (Bell System Technical Journal, March 1972)</i> .....	117
15. Semiconductor Laser to Single-Mode Fiber Coupler, <i>M. Saruwatari and K. Nawata (Applied Optics, June 1, 1979)</i> .....	139
<b>Part 3: Fabrication Techniques for Single Microlenses .....</b>	149
<b>Section 3.1: Photolithography .....</b>	151
16. Microlenses for Coupling Junction Lasers to Optical Fibers, <i>L. G. Cohen and M. V. Schneider (Applied Optics, January 1974)</i> .....	151
17. Microlenses for Coupling Single-Mode Fibers to Single-Mode Thin-Film Waveguides, <i>P. D. Bear (Applied Optics, September 1, 1980)</i> .....	157
18. Light Coupling from a Junction Laser into a Monomode Fibre with a Glass Cylindrical Lens on the Fibre End, <i>E. Weidel (Optics Communications, September 1974)</i> .....	161
19. Microlenses on the End of Single-Mode Optical Fibers for Laser Applications, <i>K. S. Lee and F. S. Barnes (Applied Optics, October 1, 1985)</i> .....	166
<b>Section 3.2: Chemical Etching .....</b>	173
20. Improved Coupling Between Laser Diode and Single-Mode Fibre Tipped with a Chemically Etched Self-Centred Diffracting Element, <i>P. Kayoun, C. Puech, M. Papuchon, and H. J. Arditty (Electronics Letters, June 11, 1981)</i> .....	173

21. Chemically Etched Conical Microlenses for Coupling Single-Mode Lasers into Single-Mode Fibers, <i>G. Eisenstein and D. Vitello</i> ( <i>Applied Optics</i> , October 1, 1982) . . . . .	175
22. Microlens for Coupling a Semiconductor Laser to a Single-Mode Fiber, <i>H. Ghafoori-shiraz and T. Asano</i> ( <i>Optics Letters</i> , August 1986) . . . . .	180
<b>Section 3.3: Thermal Melting . . . . .</b>	183
23. Light Coupling from a Stripe-Geometry GaAs Diode Laser into an Optical Fiber with Spherical End, <i>D. Kato</i> ( <i>Journal of Applied Physics</i> , June 1973) . . . . .	183
24. Efficient Coupling of Laser Diodes to Tapered Monomode Fibres with High-Index End, <i>G. D. Khoe, J. Poullissen, and H. M. de Vrieze</i> ( <i>Electronics Letters</i> , March 17, 1983) . . . . .	186
25. Characteristics of a Hemispherical Microlens for Coupling Between a Semiconductor Laser and Single-Mode Fiber, <i>J.-I. Yamada, Y. Murakami, J.-I. Sakai, and T. Kimura</i> ( <i>IEEE Journal of Quantum Electronics</i> , October 1980) . . . . .	189
26. Efficient Coupling from Semiconductor Lasers into Single-Mode Fibers with Tapered Hemispherical Ends, <i>H. Kuwahara, M. Sasaki, and N. Tokoyo</i> ( <i>Applied Optics</i> , August 1, 1980) . . . . .	195
27. Lens-Ended Fibers for Medical Applications: A New Fabrication Technique, <i>V. Russo, G. C. Righini, S. Sottini, and S. Trigari</i> ( <i>Applied Optics</i> , October 1, 1984) . . . . .	201
<b>Section 3.4: Mechanical Polishing . . . . .</b>	209
28. Power Coupling from Laser Diodes into Single-Mode Fibres with Quadrangular Pyramid-Shaped Hemiellipsoidal Ends, <i>H. Sakaguchi, N. Seki, S. Yamamoto</i> ( <i>Electronics Letters</i> , June 11, 1981) . . . . .	209
29. Simple Side Coupler for Coupling Between Laser Diode and Single-Mode Optical Fiber, <i>K. S. Lee and F. S. Barnes</i> ( <i>Applied Optics</i> , June 15, 1987) . . . . .	211
<b>Part 4: The Use of Multiple Lenses for Coupling Laser Diodes to Single-Mode Fibers . . . . .</b>	215
30. Efficient Laser Diode to Single-Mode Fiber Coupling Using a Combination of Two Lenses in Confocal Condition, <i>M. Saruwatari and T. Sugie</i> ( <i>IEEE Journal of Quantum Electronics</i> , June 1981) . . . . .	217
31. A New Confocal Combination Lens Method for a Laser-Diode Module Using a Single-Mode Fiber, <i>K. Kawano, M. Saruwatari, and O. Mitomi</i> ( <i>Journal of Lightwave Technology</i> , August 1985) . . . . .	224
32. Combination Lens Method for Coupling a Laser Diode to a Single-Mode Fiber, <i>K. Kawano, O. Mitomi, and M. Saruwatari</i> ( <i>Applied Optics</i> , April 1, 1985) . . . . .	231
33. Coupling Characteristics of Lens Systems for Laser Diode Modules Using Single-Mode Fiber, <i>K. Kawano</i> ( <i>Applied Optics</i> , August 1, 1986) . . . . .	237
34. Laser Diode Module for Single-Mode Fiber Based on New Confocal Combination Lens Method, <i>K. Kawano, O. Mitomi, and M. Saruwatari</i> ( <i>Journal of Lightwave Technology</i> , September 1986) . . . . .	243
35. An Effective Nonreciprocal Circuit for Semiconductor Laser-to-Optical-Fiber Coupling Using a YIG Sphere, <i>T. Sugie and M. Saruwatari</i> ( <i>Journal of Lightwave Technology</i> , March 1983) . . . . .	250
36. High-Efficiency Two Lens Laser Diode to Single-Mode Fiber Coupler with a Silicon Plano Convex Lens, <i>H. Karstensen and R. Frankenberger</i> ( <i>Journal of Lightwave Technology</i> , February 1989) . . . . .	260
<b>Part 5: Integrated Microlenses . . . . .</b>	267
37. A Semiconductor Laser with a Converging Output Beam, <i>S. Mukai, H. Yajima, M. Watanabe, H. Itoh, Y. Takabe, and Y. Tsunekawa</i> ( <i>Applied Physics Letters</i> , May 1, 1985) . . . . .	269
38. Monolithic Integration of a Lens Inside a Diode-Laser Cavity for Beam Convergence, <i>S. Mukai, H. Yajima, Y. Tsunekawa, and Y. Takabe</i> ( <i>Applied Physics Letters</i> , August 1, 1985) . . . . .	271
39. Diode Lasers with Cylindrical Mirror Facets and Reduced Beam Divergence, <i>J. N. Walpole, Z. L. Liau, L. J. Missaggia, and D. Yap</i> ( <i>Applied Physics Letters</i> , May 4, 1987) . . . . .	274
40. Integration of a Diode Laser and an Electronic Lens for Controlling the Beam Focus Position, <i>S. Mukai, M. Watanabe, H. Itoh, and H. Yajima</i> ( <i>Applied Physics Letters</i> , January 23, 1989) . . . . .	277
<b>Part 6: Microlens Arrays . . . . .</b>	279
41. A Distributed-Index Planar Micro-Lens Made of Plastics, <i>M. Oikawa, K. Iga, and T. Sanada</i> ( <i>Japanese Journal of Applied Physics</i> , January 1981) . . . . .	281
42. Array of Distributed-Index Planar Micro-Lenses Prepared from Ion Exchange Technique, <i>M. Oikawa, K. Iga, T. Sanada, N. Yamamoto, and K. Nishizawa</i> ( <i>Japanese Journal of Applied Physics</i> , April 1981) . . . . .	285
43. Distributed-Index Planar Microlens Array Prepared from Deep Electromigration, <i>M. Oikawa, K. Iga, and T. Sanada</i> ( <i>Electronics Letters</i> , June 25, 1981) . . . . .	288

44. Photolytic Technique for Producing Microlenses in Photosensitive Glass, <i>N. F. Borrelli, D. L. Morse, R. H. Bellman, and W. L. Morgan</i> ( <i>Applied Optics</i> , August 15, 1985) .....	290
45. Stacked Planar Optics: An Application of the Planar Microlens, <i>K. Iga, M. Oikawa, S. Misawa, J. Banno, and Y. Kokubun</i> ( <i>Applied Optics</i> , October 1, 1982) .....	296
46. Technique for Monolithic Fabrication of Microlens Arrays, <i>Z. D. Popovic, R. A. Sprague, and G. A. N. Connell</i> ( <i>Applied Optics</i> , April 1, 1988) .....	301
47. Estimation of a Planar Microlens by Oblique Ray Tracing, <i>S. Misawa and K. Iga</i> ( <i>Applied Optics</i> , February 1, 1988) .....	305
 <b>Part 7: Techniques for Reducing Optical Feedback</b> .....	311
48. Beam-to-Fiber Coupling with Low Standing Wave Ratio, <i>R. Ulrich and S. C. Rashleigh</i> ( <i>Applied Optics</i> , July 15, 1980) .....	313
49. Characterization of Laser-to-Fiber Coupling Techniques by Their Optical Feedback, <i>W. Bludau and R. Rossberg</i> ( <i>Applied Optics</i> , June 1, 1982) .....	317
50. Noise and Distortion Characteristics of Semiconductor Lasers in Optical Fiber Communication Systems, <i>K. Peterman and G. Arnold</i> ( <i>IEEE Journal of Quantum Electronics</i> , April 1982) .....	324
51. Comparison of Efficiency and Feedback Characteristics of Techniques for Coupling Semiconductor Lasers to Single-Mode Fiber, <i>G. Wenke and Y. Zhu</i> ( <i>Applied Optics</i> , December 1, 1983) .....	336
52. Optical Output Power Fluctuation due to Reflected Lightwaves in Laser Diode Modules, <i>K. Kawano, T. Mukai, and O. Mitomi</i> ( <i>Journal of Lightwave Technology</i> , November 1986) .....	344
53. Distributed Feedback Laser Diode (DFB-LD) to Single-Mode Fiber Coupling Module with Optical Isolator for High Bit Rate Modulation, <i>T. Sugie and M. Saruwatari</i> ( <i>Journal of Lightwave Technology</i> , February 1986) .....	352
 <b>Part 8: Characterization of Measurement Techniques</b> .....	363
54. Near- and Far-Field Characterization of Diode Lasers, <i>S. Peled</i> ( <i>Applied Optics</i> , January 15, 1980) .....	365
55. Techniques for Measuring 1- $\mu$ m Diam Gaussian Beams, <i>D. K. Cohen, B. Little, and F. S. Luecke</i> ( <i>Applied Optics</i> , February 15, 1984) .....	370
56. Knife-Edge Scanning Measurements of Subwavelength Focused Light Beams, <i>A. H. Firester, M. E. Heller, and P. Sheng</i> ( <i>Applied Optics</i> , July 1977) .....	374
57. Measuring the Spot Size of a Gaussian Beam with an Oscillating Wire, <i>E. Stijns</i> ( <i>IEEE Journal of Quantum Electronics</i> , December 1980) .....	378
58. Spot Size Measurements for Single-Mode Fibers—A Comparison of Four Techniques, <i>W. T. Anderson and D. L. Philen</i> ( <i>Journal of Lightwave Technology</i> , March 1983) .....	380
59. Cylindrical Lenses: Testing and Radius of Curvature Measurement, <i>R. Diaz-Uribe, J. Pedraza-Contreras, O. Cardona-Nunez, A. Cordero-Davila, and A. Cornejo-Rodriguez</i> ( <i>Applied Optics</i> , May 15, 1986) .....	387
 <b>Part 9: Laser Diodes to Single-Mode Fiber Modules</b> .....	391
60. Optical Componentry Utilized in Field Trial of Single-Mode Fiber Long-Haul Transmission, <i>J.-I. Minowa, M. Saruwatari, and N. Suzuki</i> ( <i>IEEE Journal of Quantum Electronics</i> , April 1982) .....	393
61. Progress in Monomode Optical-Fiber Interconnection Devices, <i>G.-D. Khoe, H. G. Kock, D. Küppers, J. H. F. M. Poullissen, and H. M. De Vrieze</i> ( <i>Journal of Lightwave Technology</i> , June 1984) .....	406
62. Low-Loss Lens Connector for Single-Mode Fibers, <i>S. Masuda and T. Iwama</i> ( <i>Applied Optics</i> , October 1, 1982) .....	417
63. Laser-to-Monomode-Fiber Coupling and Encapsulation in a Modified TO-5 Package, <i>G.-D. Khoe and H. G. Kock</i> ( <i>Journal of Lightwave Technology</i> , December 1985) .....	426
 <b>Part 10: Coupling from Light-Emitting Diodes to Optical Fibers</b> .....	433
64. Small-Area, Double-Heterostructure Aluminum-Gallium Arsenide Electroluminescent Diode Sources for Optical-Fiber Transmission Lines, <i>C. A. Burrus and B. I. Miller</i> ( <i>Optics Communications</i> , December 1971) .....	435
65. Efficient Power Coupling Between an MH LED and a Taper Ended Multimode Fiber, <i>Y. Uematsu, T. Ozeki, and Y. Unno</i> ( <i>IEEE Journal of Quantum Electronics</i> , February 1979) .....	438
66. Coupling of Spherical-Surfaced LED and Spherical-Ended Fiber, <i>O. Hasegawa, R. Namazu, M. Abe, and Y. Tōyama</i> ( <i>Journal of Applied Physics</i> , January 1980) .....	445
67. Preparation and Properties of Monolithically Integrated Lenses on InGaAsP/InP Light-Emitting Diodes, <i>J. Heinen</i> ( <i>Electronics Letters</i> , September 16, 1982) .....	452

<b>68.</b> Photoelectrochemical Etching of Integral Lenses on InGaAsP/InP Light-Emitting Diodes, <i>F. W. Ostermayer, Jr., P. A. Kohl, and R. H. Burton</i> ( <i>Applied Physics Letters</i> , October 1, 1983) .....	454
<b>69.</b> Calculations for Integral Lenses on Surface-Emitting Diodes, <i>P. P. Deimel</i> ( <i>Applied Optics</i> , February 1, 1985) .....	457
<b>70.</b> Theory of LED Coupling to Single-Mode Fibers, <i>D. N. Christodoulides, L. A. Reith, and M. A. Saifi</i> ( <i>Journal of Lightwave Technology</i> , November 1987) .....	463
<b>71.</b> Efficiency and Alignment Tolerances of LED to Single-Mode Fibre Coupling—Theory and Experiment, <i>B. Hillerich</i> ( <i>Optical and Quantum Electronics</i> , 1987).....	470
<b>Bibliography</b> .....	<b>485</b>
<b>Author Index</b> .....	<b>491</b>
<b>Subject Index</b> .....	<b>493</b>
<b>Editors' Biographies</b> .....	<b>499</b>
