PREFACE	ix

Chapter 1 **Low-Noise Receiver Technology for Near-Millimeter Wavelengths**

J. W. Archer

I. Introduction	2
II. Quasi-Optical Systems for Near-Millimeter-Wavelength Receivers	7
III. Schottky-Barrier-Diode Mixers	11
IV. Superconducting Device Technology	34
V. The InSb Bolometer Mixer	48
VI. Local-Oscillator Sources	49
VII. An Example of a Practical Millimeter-Wave System: A 200–350-GHz Multiple-Mixer, Cryogenic Receiver	64
VIII. Future Developments	81
References	82

Chapter 2 **A Scanning Airborne Radiometer for 30 and 90 GHz**

*H. Hellsten, J. Kjellgren, G. Stenström,
and A. Sume*

I. Introduction	88
II. Some General Concepts of Radiometry	88
III. Lens Antenna Principles and Manufacturing	103
IV. The Scanner	112
V. Beam Geometry	118
VI. The Radiometer	124
VII. System Performance	125
VIII. Control and Data Handling	130
IX. Radiometric Image Presentation	137
X. Results	142
References	147

Chapter 3 **The Self-Oscillating Mixer: Background Theory and Experiments**

Samuel Dixon, Jr.

I. Introduction	149
II. Analysis of Gunn Oscillator	150

III. Modes of Operation in Resonant Circuits	156
IV. Modulation and Noise, Measurement in Heterodyne Operation	160
V. Dielectric Image-Guide Device Design	161
VI. Description of Experiments	165
VII. Experimental Data on the Self-Oscillating Mixer	169
VIII. Discussion of Results	171
IX. Conclusions	172
Appendix A	173
Appendix B: Equivalent Circuit of Self-Oscillating Mixer	179
Appendix C	184
Appendix D: Design of Dielectric Transmission Lines at 60 GHz	187
References	191

Chapter 4 **Review of Dielectric Image-Line Antennas**

Klaus Solbach

I. Introduction	193
II. Radiation from Discontinuities	194
III. Leaky-Wave Antennas	197
IV. Electronic Beam Scanning	204
V. Broadside-Radiating Traveling-Wave Arrays	205
VI. Two-Dimensional Arrays	208
VII. Conclusion	217
References	218

Chapter 5 **EHF SATCOM Terminal Antennas**

R. F. Varley, J. K. Conn, and L. S. Gans

I. Introduction	221
II. Communications System Requirements	222
III. Antenna System Performance Factors	223
IV. The Antenna System	227
V. Antenna System Examples	248
VI. Conclusion	261
References	261

Chapter 6 **Semiconductor Antennas for Millimeter-Wave Integrated Circuits**

F. C. Jain and R. Bansal

I. Introduction	263
II. Fundamentals of Semiconductor Antennas	265
III. Theory	270
IV. Monolithic Integration	278
V. Conclusions	284
References	284

INDEX	287
