

CONTENTS

**RADIATION EMITTED BY UNIFORMLY-MOVING SOURCES
THE VAVILOV-CERENKOV EFFECT,
(THE DOPPLER EFFECT IN A MEDIUM,
TRANSITION RADIATION AND ASSOCIATED PHENOMENA)** 1
V.L. Ginzburg

1. Introduction	2
2. The Vavilov-Cerenkov Effect for a Charge	4
3. Quantum Theory of the Vavilov-Cerenkov Effect	9
4. Vavilov-Cerenkov Radiation with Motion in Channels and Slots	12
5. Vavilov-Cerenkov Radiation for Electrical, Magnetic and Toroidal Dipoles	13
6. Classical and Quantum Theories of the Doppler Effect in a Medium	19
7. Transition Radiation at the Interface of Two Media	22
8. Transition Radiation as a Phenomenon of a More General Type. Formation Region	27
9. Transition Scattering. Transition Bremsstrahlung Radiation	30
10. Transition Radiation, Transition Scattering, and Transition Bremsstrahlung Radiation in a Plasma	33
11. Final Comments	36
Bibliography	37

**THE PHYSICS OF
SUPERHIGH ENERGY NEUTRINOS** 41
M.A. Markov

1. The Upper Limit on the Energy Spectrum of Elementary Particles in the Universe	45
2. Detection of Ultrahigh Energy Neutrinos	47
Bibliography	49

EVOLUTION EQUATIONS FOR THE DENSITY MATRICES OF LINEAR OPEN SYSTEMS	53
V.V. Dodonov, V.I. Man'ko	
Bibliography	59
QUANTUM PARTICLE IN NONSTATIONARY COULOMB POTENTIAL	61
V.V. Dodonov, V.I. Man'ko, D.L. Osipov	
Bibliography	72
SOLUBLE MODELS OF MULTILEVEL SYSTEM INTERACTION WITH A QUANTIZED ELECTROMAGNETIC FIELD	77
V.V. Dodonov, V.I. Man'ko, S.M. Chumakov	
1. Introduction	77
2. Interaction of an n -Level Molecule With a Quantized Electromagnetic Field Mode	84
3. Two-Level Molecule	91
4. Three-Level Molecule	96
5. Certain Generalizations. The Multidimensional Case	98
6. Two-Level System Outside the Framework of the Rotating Wave Approximation	116
Bibliography	123
THE INFLUENCE OF ABERRATIONS ON GAUSSIAN BEAM PROPAGATION	127
K.B. Wolf, V.I. Man'ko	
1. Introduction	127
2. The Action, Lagrangian, and Hamiltonian in Optics	129
3. Equations of Motion and the Generating Function	130
4. Quantization	131
5. Heisenberg Equations and the Integrals of Motion	132
6. The Propagator in Coordinate Space	133

7. Gaussian Beams and Their Evolution	134
8. Correlation Functions for a One-Dimensional Gaussian Beam	136
9. The Generating Functional for Higher Order Correlations	138
10. Evolution of the Coordinate Coherent States	142
11. Evolution of Discrete Correlated Modes	148
12. Evolution of Systems Described by Hamiltonians Dependent Only on the Momentum	150
13. Generating Functional and Generating Function for a Nonstationary p -Dependent Hamiltonian	153
14. Influence of Spherical Aberrations on Beam Propagation	156
15. Conclusion	163
Bibliography	165

CORRELATED COHERENT STATES

V.V. Dodonov, E.V. Kurmyshev, V.I. Man'ko

169

Introduction	169
1. Correlated Wave Minimum Uncertainty Packets	170
2. Evolution of the Correlated Coherent States of a One-Dimensional General Quadratic Quantum System	172
3. The Algebraic Properties and Unitary Equivalence of Correlated Wave Packets	174
4. "Squeezed" States	175
5. The Matrix Elements of the Unitary Equivalence Operators and the Overlap Integrals of the Correlated Packets	177
6. The Green's Function of General Quadratic Quantum Systems in Correlated Bases	181
7. Correlated Coherent States of a Charged Particle in a Uniform Magnetic Field	183
8. The Evolution of the Correlated Coherent States of a Charged Particle in a Uniform Magnetic Field	189
9. Correlated Coherent States - Eigenstates of the Integrals of Motion	190
10. Correlated Coherent States in Geophysical Research	192
Appendix A	194
Appendix B	194
Bibliography	195

THE AHARONOV-BOHM EFFECT FOR STATIONARY AND COHERENT STATES OF AN ELECTRON IN A UNIFORM MAGNETIC FIELD		201
V.G. Bagrov, D.M. Gitman, V.D. Skarzhinskiy		
1. Introduction		201
2. Stationary States		203
3. Coherent States		208
Appendix		
1. Calculation of the Normalization Constant N		214
2. Calculation of the Averages \bar{a}_j		215
3. Calculation of the Average Energy		217
Bibliography		218

THE NONDEGENERATE GAUGE AND GENERALIZED CANONICAL FORMALISM		221
T.E. Fradkina		
1. The Nondegenerate Gauge Within the Framework of the Canonical Formalism		224
2. Operator Aspect of the Theory in the Nondegenerate Gauge		227
Bibliography		235

SYMMETRICAL NEAR-NORMAL FINITE DISTRIBUTIONS		237
E.M. Moroz, K.N. Shorin		
1. Introduction		237
2. Properties of the Desired Distributions		240
2.1. The Difference Between a Normal Distribution and the Desired Distribution		240
2.2. Common Properties Between the Desired Distribution Densities and a Normal Distribution		241
3. Approximation of the Normal Distribution Density		242
3.1. Auxiliary Requirements		242

3.2. General Form of the Family of Distribution Densities $F(x; s, l, \sigma)$	243
3.3. System of Equations for Determining the Coefficients	243
3.4. Solution of the System	244
3.5. Approximation Formula for the Normal Distribution	246
3.6. Approximation Accuracy	247
4. Approximation of the Probability Integral	248
5. Statistical Nondifferentiability of the Distributions	249
6. Set of Distribution Densities with Nonzero Excess Coefficients	252
7. Set of Distribution Functions	257
Bibliography	258

**ULTIMATE CAPABILITIES OF
SOFT X-RAY OPTICS**

A.V. Vinogradov, N.N. Zorev,
I.V. Kozhevnikov

259

1. Introduction	259
2. Parallel Beam Production	263
3. Concentration of Radiation From Point Sources	268
4. Discussion	275
5. Conclusion	276
Bibliography	276
