Contents

1.	Introduction	1
2.	Introduction to Electrostatics	2
3.	Mathematical Formulation of Electric Field Analysis	29
4.	Charging Macroscopic Particles	57
5.	Static Electrification of Dielectrics and at Materials' Interfaces.	86
6.	Long-Lasting Electrization and Electrets	115
7.	Electrostatic Motors	131
8.	Electrostatic Generators	148
9.	Electrostatic Precipitation	180
10.	Electrostatic Separation	221
11.	Electrostatic Coating	250
12.	Electrostatic Imaging	281
13.	Nonimpact Printing	307
14.	Nonuniform Field Effects; Dielectrophoresis	336
15.	Dielectrophoresis of Biological Materials	363

16. Electrostatics in the Power Industry 377

17. Atmospheric Electrostatics 390

18. Electrostatic Nuisances and Hazards 425

19. Other Electrostatic Effects and Applications 441

20. The Status Abroad 456
