
CONTENTS

PREFACE	ix
CHAPTER 1 INTRODUCTION AND HISTORICAL PERSPECTIVE	1
1.1 Introduction, 1	
1.2 Early History of Permanent Magnets, 2	
1.3 Growth of the Industry, 5	
1.4 Property Improvement and the Changing Pattern of Use, 6	
1.5 Raw Material Impact, 10	
1.6 A Look Ahead, 12	
CHAPTER 2 MAGNETISM AND THE PERMANENT MAGNET	15
2.1 Introduction, 15	
2.2 Unit Systems, Definitions, and Conversion Factors, 15	
2.3 The Hysteresis Loop, 19	
2.4 Demagnetization Factors and Magnetic Circuit Concepts, 22	
2.5 Permanent Magnets and Electromagnetism, 25	
2.6 Energy Relationships, 26	
2.7 Boundary Conditions and Figures of Merit, 37	
CHAPTER 3 THE PHYSICS OF PERMANENT MAGNETISM AND THE ORIGIN OF PERMANENT MAGNET BEHAVIOR	43
3.1 Overview and Perspective, 43	
3.2 The Variations of Magnetic Behavior, 44	

- 3.3 Some Features of Ferromagnetic Materials, 46
- 3.4 Energy Barriers and Coercive Force, 50
- 3.5 Single Domain Particle Variables, 54
- 3.6 Coercivity Mechanisms in Rare-Earth Magnets, 56
- 3.7 Understanding Magnetization and Demagnetization Processes in Rare-Earth Magnets, 58

CHAPTER 4 CLASSIFICATION OF PERMANENT MAGNET PROPERTY SYSTEMS AND PROCESSING TECHNOLOGY 61

- 4.1 Introduction, 61
- 4.2 Inclusion Hardened (Early Steel) Magnets, 62
- 4.3 Fine Particle Magnets Utilizing Shape Anisotropy, 64
- 4.4 Fine Particle Magnets Utilizing Crystalline Anisotropy, 74
- 4.5 Matrix or Bonded Magnets, 97
- 4.6 Semi-Hard Magnets (Hysteresis Alloys), 97

CHAPTER 5 PERMANENT MAGNET STABILITY 101

- 5.1 Introduction, 101
- 5.2 Classification of Magnetization Changes, 102
- 5.3 Theoretical Considerations, 104
- 5.4 Temperature Effects, 106
- 5.5 Magnetic Field Effects, 121
- 5.6 Temperature Compensation, 123
- 5.7 Mechanical Energy Input and Stability, 126
- 5.8 Corrosion and Surface Oxidation, 128
- 5.9 Nuclear Radiation, 129
- 5.10 Enhancing Stability, 129
- 5.11 Stabilization Techniques, 130
- 5.12 Conclusions and Comparison of Materials, 133

CHAPTER 6 DESIGN RELATIONSHIPS AND UNIT PROPERTY SELECTION 135

- 6.1 Introduction, 135
- 6.2 Relating Unit Magnetic Properties to Magnet Volume, Magnet Geometry, and Device Parameters, 137
- 6.3 Determination of Permeance, 143
- 6.4 Magnetic and Electrical Circuit Analogy, 165
- 6.5 Use of High Permeability Materials in Permanent Magnet Circuits, 173
- 6.6 Economic Considerations in Design and Property Selection, 175

6.7	Permanent Magnets and the Laws of Electromagnetic Scaling, 179	
CHAPTER 7	APPLICATIONS OF PERMANENT MAGNETS	183
7.1	Introduction and Classification of Applications, 183	
7.2	Applications Based on Coulomb Force Law, 185	
7.3	Applications Based on Faraday's Law, 194	
7.4	Applications Based on Lorentz Force Law, 204	
7.5	Applications Based on Lorentz Forces on Free Electron Charges, 236	
7.6	Miscellaneous Applications Based on a Variety of Physical Principles, 244	
CHAPTER 8	MEASUREMENTS	248
8.1	Introduction, 249	
8.2	Apparatus and Techniques for Generating Magnetic Fields, 249	
8.3	Measuring Magnetic Fields and Magnetic Potentials, 251	
8.4	Instrumentation for Magnetic Field Measurement, 256	
8.5	Open Circuit Measurement Techniques, 266	
8.6	Instrumentation Systems for Closed Circuit and Hysteresis Loop Measurements, 269	
8.7	Search Coil Arrangements and Characteristics, 277	
8.8	Special Measuring Techniques for Permanent Magnet Circuit Analysis and Design Optimization, 279	
8.9	Calibration, Standards, Precision, and Accuracy, 280	
8.10	Measurement Practice in Production Quality Control, 282	
CHAPTER 9	MAGNETIZATION AND DEMAGNETIZATION	284
9.1	Introduction, 284	
9.2	Theoretical Considerations, 285	
9.3	Requirements for Complete Magnetization, 289	
9.4	Equipment and Techniques to Magnetize, 296	
9.5	Equipment and Techniques to Demagnetize, 303	
9.6	Calibration and Stabilization Techniques, 305	
APPENDIX 1	GLOSSARY OF TERMS, DEFINITIONS, SYMBOLS, SPECIFICATIONS, AND STANDARDS	307
APPENDIX 2	MAGNETIC AND PHYSICAL PROPERTY TABLES	316

APPENDIX 3	DEMAGNETIZATION CURVES FOR DESIGN ANALYSIS	322
APPENDIX 4	CHRONOLOGY OF DISCOVERY OF PERMANENT MAGNETS	331
INDEX		335
