Contents

Preface	vii
Chapter 1 Introduction to the Spectral Domain Method	1
1.1 Derivation of the Electric Field Equation for Free-Standing	
Periodic Planar Screens	1
1.2 Derivation of the Magnetic Field Equation for Free-Standing	
Periodic Planar Screens	6
1.3 Derivation of the Electric Field Equation for Periodic Planar	
Scatterers Lying on the Interface of Different Dielectric Media	11
1.4 Derivation of the Magnetic Field Equation for Periodic	1.4
Screens Lying on the Interface of Different Dielectric Media	14
1.5 Derivation of the Electric Field Equation for Periodic Planar	15
Scatterers Backed by a Dielectric Slab	15
1.6 Derivation of the Magnetic Field Equation for a Screen	10
Backed by a Dielectric Slab	19
1.7 Discussion	
Chapter 2 Solution of the Electric and Magnetic Field Equations	
for Specific Screen Geometries	25
2.1 Solution of the Electric Field Equation for a Free-Standing	~ ~
Rectangular Plate Array	25
2.2 Solution of the Magnetic Field Equation for a Free-Standing	•
Rectangular Mesh Screen	29
2.3 Solution of the Electric Field Equation for a Free-Standing	20
Circular Disk Screen	29
2.4 Examples and Sample Calculations	32 25
2.5 Numerical Considerations	55 41
Chapter 3 Waveguide Discontinuities	41
3.1 Junction of Two Rectangular Waveguides of Different	
Cross Sections and Dielectric Properties: Magnetic Field Equation	41

3.2 Waveguide with a Finite Dielectric Plug: Magnetic Field Equation 3.3 Scattering by Planar Obstacles in Waveguides:	46
Electric Field Equation 3.4 Scattering by Planar Obstacles in Wayaguidas:	49
Magnetic Field Equation	56
3.5 Numerical Examples	50 60
Chapter 4 Waveguide Phased Arrays	65
4.1 Rectangular Waveguide Phased Array	65
4.2 Dielectric-Covered Waveguide Phased Arrays	70
4.3 Waveguide with a Dielectric Plug	73
Chapter 5 Aperiodic Structures	77
5.1 Waveguide Radiator in an Infinite Conducting Plane	77
5.2 Scattering by a Single Flat Plate	82
Chapter 6 Analysis of Multilayer Structures	85
6.1 Scattering by Multiple Layers of Periodic Screens	85
6.2 Other Compound Structures	88
6.3 Examples and Numerical Calculations	89
Chapter 7 Spectral Domain Theory in Cylindrical Coordinates	95
7.1 Derivation of the Electric Field Equation	95
7.2 Scattering by a Straight Wire Segment	99
7.3 Infinite Segmented Wire	101
7.4 Dipole Antenna	102
7.5 Discussion	103
Chapter 8 Microstrip Devices	105
8.1 Microstrip Transmission Line: Propagation Constant	105
8.2 Microstrip Antenna Arrays	110
8.3 Simple Microstrip Filter	115
8.4 Proximity-Coupled Microstrip Patch Antenna	120
Appendix A: Fourier Transform of the Two-Dimensional	
Scalar Green's Function	127
Appendix B: Reflection and Transmission of an Arbitrary	
Plane Wave at a Dielectric Interface	129
Appendix C: Skewed Screens	133
Appendix D: Magnetic Currents and Equivalence Principles Revisited	135
Index	141
