

Contents

Chapter 1 • Periodic Transmission Systems	1
1.1 FLOQUET'S THEOREM AND SPACE HARMONICS	2
1.2 THE ω - β DIAGRAM	4
1.3 PASS BANDS AND STOP BANDS	6
1.4 MEASUREMENT OF ω - β DIAGRAMS	9
1.5 TWO THEOREMS ON PERIODIC TRANSMISSION SYSTEMS	10
1.6 CALCULATION OF FOURIER AMPLITUDES IN TERMS OF GAP FIELDS	14
1.7 DETERMINATION OF THE ω - β DIAGRAM BY FIELD ANALYSIS	16
1.8 FORBIDDEN REGIONS OF THE ω - β DIAGRAM FOR OPEN STRUCTURES	19

1.9	FINNED STRUCTURE WITH OPPOSING PLANAR CONDUCTOR	20
1.10	POWER AND IMPEDANCE CALCULATION	22
1.11	FILTER CIRCUIT ANALYSES OF PERIODIC STRUCTURES	24
1.12	THE IDENTIFICATION OF VOLTAGES WITH FIELDS	26
1.13	APPLICATION OF CIRCUIT ANALYSIS TO SPECIFIC STRUCTURES	28
1.14	INDUCTIVELY COUPLED CAVITIES	34

Chapter 2 • The Helix 39

2.1	THE SHEATH HELIX	40
2.2	THE TAPE HELIX	46
2.3	FORBIDDEN REGIONS FOR THE TAPE HELIX	47
2.4	THE DETERMINANTAL EQUATION FOR THE TAPE HELIX	48
2.5	POWER AND IMPEDANCE CALCULATION FOR THE TAPE HELIX	54
2.6	MULTIWIRE HELICES	55
2.7	THE HELICAL ANTENNA	57
2.8	THE HELICAL DELAY LINE	62

Chapter 3 • Coupled-Mode Theory 66

3.1	SIMPLE COUPLED-MODE ELEMENT	67
3.2	APPLICATION OF CONSERVATION OF ENERGY	68
3.3	THE SIMPLEST GENERAL FORM OF THE COEFFICIENTS $A, B, C,$ AND D	69
3.4	A CHAIN OF IDENTICAL TRANSDUCERS	70
3.5	CONTINUOUS COUPLING	72
3.6	THE DIRECTIONAL COUPLER	73
3.7	COUPLED MODES AND PERIODIC TRANSMISSION SYSTEMS	76
3.8	COUPLED-MODE THEORY AND THE TAPE HELIX	77
3.9	WAVES IN ELECTRON BEAMS	82
3.10	AMPLIFIERS USING SPACE-CHARGE WAVES ONLY	85
3.11	AMPLIFIERS USING A BEAM AND ANOTHER TRANSMISSION SYSTEM	88

Chapter 4 • Anisotropic Media 94

4.1	PHENOMENOLOGICAL MODEL OF A FERRITE	95
4.2	MECHANICAL ANALOG	99
4.3	PLANE WAVES IN A FERRITE MEDIUM	101
4.4	FARADAY ROTATION DEVICES	105

4.5	TRANSVERSE D-C MAGNETIZATION	107	
4.6	FIELD DISPLACEMENT DEVICES	111
