Contributors	v
Preface	vii

PART I. Introduction

1. The Moscow Signal— <i>Bary W. Wilson</i>	3
2. Overview: ELF and Carcinogenesis— <i>Richard G. Stevens</i>	9

PART II. Background

3. Physical Aspects of ELF Electric and Magnetic Fields: Measurements and Dosimetry— <i>William T. Kaune</i> and <i>Larry E. Anderson</i>	17
4. Chronobiological Effects of Electric Fields— <i>Kenneth R. Groh,</i> <i>Marijo A. Readey, and Charles F. Ehret</i>	47
5. Effects of Light and Stress on Pineal Function— <i>Russel J. Reiter</i>	87
6. Oncogenes and Leukemia— <i>William P. Hammond, IV</i>	109

PART III. Observed ELF Effects

7. Interaction of ELF Electric and Magnetic Fields with Neural and Neuroendocrine Systems— <i>Larry E. Anderson</i>	139
8. ELF Electromagnetic-Field Effects on the Pineal Gland— <i>Bary W. Wilson and Larry E. Anderson</i>	159
9. ELF Effects on Calcium Homeostasis— <i>Carl F. Blackman</i>	187

PART IV. Possible Mechanisms

10. Electromagnetic Fields, Cell Membrane Amplification,
and Cancer Promotion—*W. Ross Adey* 211
11. Ion Cyclotron Resonance Effects of ELF Fields
in Biological Systems—*Abraham R. Liboff,*
Bruce R. McLeod, and Stephen D. Smith 251
12. Biological Interactions and Human Health Effects of
Extremely Low Frequency Magnetic Fields—
Thomas S. Tenforde 291

PART V. Possible Consequences

13. The Emerging Role of the Pineal Gland and Melatonin
in Oncogenesis—*David E. Blask* 319
 14. Calcium Homeostasis and Oxidative Stress—
Gary A. Pascoe 337
 15. The Question of Cancer—*Richard G. Stevens,*
Bary W. Wilson, and Larry E. Anderson 361
- Glossary 373
- Index 375
