PREFACE TO THE RUSSIAN EDITION	ix
PREFACE TO THE ENGLISH EDITION	xi
INTRODUCTION	1
 CHAPTER 1. Fundamental Equations of Wave Propagation	7
§ 1. Propagation of sound in liquids and gases	7
§ 2. Electromagnetic wave propagation	21
 CHAPTER 2. Statistical Formulation of the Diffraction Problem	31
§ 3. Statistically rough surfaces	32
§ 4. Random wave fields	56
 CHAPTER 3. Wave Scattering from a Slightly Rough Surface	72
§ 5. Scattering of sound from a perfectly free, statistically rough surface	72
§ 6. Scattering of sound from a statistically rough surface characterized by an impedance	84
§ 7. Boundary conditions for average and fluctuation electro- magnetic fields	90
 CHAPTER 4. Fluctuations in the Wave Field Scattered by a Statistically Rough Surface	103
§ 8. Intensity of sound fluctuations in the Fraunhofer zone	103
§ 9. Electromagnetic field fluctuations in the Fraunhofer zone	111
§ 10. Fluctuation intensity in the near zone	117
§ 11. Amplitude and phase fluctuations	133
 CHAPTER 5. Wave Scattering from a Moving Rough Surface	150
§ 12. Random oscillations of an interface	150
§ 13. Energy spectrum of the scattered field	162
§ 14. Amplitude and phase fluctuation spectrum	174
 CHAPTER 6. Correlation Functions for a Field Scattered by a Rough Surface	185

§ 15. Correlation functions in the far zone	185
§ 16. Correlation of field fluctuations for scattering at angles away from grazing incidence	194
§ 17. Fluctuations of a scalar field for scattering near grazing incidence	206
§ 18. Fluctuations in the field of a vertical dipole scattered by an oscillating, rough surface	216
CHAPTER 7. Scattering from Large-Scale Irregularities	220
§ 19. Tangent plane method	220
§ 20. Scattered intensity pattern of a scalar field	229
§ 21. Electromagnetic wave scattering	263
§ 22. Calculation of shadowing for wave scattering from a statistically rough surface	275
§ 23. Effective distribution functions for height and slope when shadowing is present	297
CHAPTER 8. Field Fluctuations for Scattering from Large-Scale Irregularities	316
§ 24. Mean field and fluctuation intensity for scattering from an infinite surface	316
§ 25. Intensity fluctuations for scattering from a surface with gently sloping irregularities	335
§ 26. Spatial correlation functions	346
§ 27. Frequency spectrum of the scattered field	357
CHAPTER 9. Scattering from Rough Bodies of Finite Dimension	381
§ 28. Reflection and refraction at a curvilinear surface	381
§ 29. Scattering cross section for a smooth body	390
§ 30. Scattering from a rough body	396
§ 31. Fluctuations of the scattering cross section, amplitude and phase	411
CHAPTER 10. The Two-Scale Rough Surface Scattering Model	418
§ 32. Scattering from statistically rough surfaces: experimental results	418
§ 33. Perturbation method for a curvilinear surface	428
CHAPTER 11. Green's Function Methods in the Theory of Multiple Scattering	443
§ 34. Feynman diagrams	443
§ 35. Mean field in a plane parallel waveguide with rough boundaries	451

§ 36. Normal mode attenuation in a closed, hollow waveguide	463
§ 37. Radiative transfer equations	482
BIBLIOGRAPHY	495
INDEX	518
OTHER TITLES IN THE SERIES	527
