	Page
Summary . . . . .	3
Preface . . . . .	5
<b>1. Electron orbits in a magnetic field of hyperbolic character . . . . .</b>	<b>7</b>
1.1. Introduction . . . . .	7
1.2. The general motion . . . . .	11
1.2.1. The vector potential . . . . .	11
1.2.2. The Hamiltonian . . . . .	11
1.2.3. Constants of motion . . . . .	12
1.2.4. The scalar potential $\psi$ . . . . .	12
1.2.5. Calculation of the vector potential . . . . .	14
1.2.6. The magnetic field . . . . .	17
1.2.7. Accessible regions. Dimensionless parameters . . . . .	17
1.3. Plane motion . . . . .	19
1.3.1. Simple relations . . . . .	19
1.3.2. The equation of motion . . . . .	22
1.3.3. Approximate solution . . . . .	22
1.3.4. Qualitative discussion of the orbits . . . . .	24
1.3.5. The drift velocity . . . . .	26
1.4. Stability . . . . .	26
1.4.1. Qualitative discussion of stability . . . . .	26
1.4.2. Quantitative discussion . . . . .	27
<b>2. Theoretical and experimental investigation of meander orbits without and with interaction with a hf electric field . . . . .</b>	<b>31</b>
2.1. Working principle of the meander tube . . . . .	31
2.2. Equations of the electron motion . . . . .	33
2.3. Numerical calculations of orbits . . . . .	34
2.4. Experimental tube . . . . .	36
2.5. Experiments . . . . .	40
2.6. Stability measurements . . . . .	44
2.7. Comparison between theoretical and experimental data . . . . .	46
2.8. Electron orbits with hf field . . . . .	46
2.9. Numerical calculation of electron orbits with hf field . . . . .	50
<b>3. Microwave meander tubes . . . . .</b>	<b>59</b>
3.1. Construction . . . . .	59
3.2. Operation . . . . .	60
3.3. A pulsed meander tube . . . . .	62
3.4. Measurements of the magnetic field . . . . .	63
3.5. Experimental results . . . . .	64

	Page
4. Measurements on a meander tube at 50 cm wave length . . . . .	67
4.1. The experimental tube . . . . .	67
4.2. Survey measurements on the meander tube at 50 cm wave length	68
4.3. A secondary emission discharge . . . . .	71
4.4. Influence of space charge and ions . . . . .	72
4.5. Electronic tuning . . . . .	74
5. General discussion of the meander tube based on energy phase diagrams . . . . .	81
5.1. Conditions for efficient sorting out . . . . .	81
5.2. Construction of energy-phase diagrams . . . . .	82
5.3. Conclusions from the energy-phase diagrams . . . . .	84
5.4. Other types of magnetic field . . . . .	85
5.5. Upper frequency limitations of the meander tube . . . . .	88
6. References . . . . .	90
