## Table of Contents

1	Introduction 1			
	1.1	The Direct Scattering Problem		
	1.2	The Inverse Scattering Problem		
2	The Helmholtz Equation			
	2.1	Acoustic Waves		
	<b>2.2</b>	Green's Theorem and Formula		
	2.3	Spherical Harmonics 20		
	2.4	Spherical Bessel Functions		
	2.5	The Far Field Mapping		
3	Dire	ct Acoustic Obstacle Scattering		
	3.1	Single- and Double-Layer Potentials		
	<b>3.2</b>	Scattering from a Sound-Soft Obstacle 45		
	3.3	The Reciprocity Relation		
	3.4	The Two-Dimensional Case		
	3.5	On the Numerical Solution in $\mathbb{R}^2$		
	3.6	On the Numerical Solution in $\mathbb{R}^3$		
4	Ill-Posed Problems			
	<b>4</b> .1	The Concept of Ill-Posedness		
	4.2	Regularization Methods		
	4.3	Singular Value Decomposition		
	4.4	Tikhonov Regularization		
	4.5	Nonlinear Operators 101		
5	Inverse Acoustic Obstacle Scattering			
	5.1	Uniqueness		
	5.2	Physical Optics Approximation 112		
	5.3	The Direct Approach to the Inverse Problem		
	5.4	Approximation of the Scattered Field		
	5.5	Superposition of the Incident Fields		

## X Table of Contents

6	The	Maxwell Equations
	6.1	Electromagnetic Waves
	6.2	Green's Theorem and Formula
	6.3	Vector Potentials
	6.4	Scattering from a Perfect Conductor
	6.5	Vector Wave Functions
	6.6	The Reciprocity Relation
7	Inve	rse Electromagnetic Obstacle Scattering
	7.1	Uniqueness
	7.2	Continuous Dependence on the Boundary
	7.3	Approximation of the Scattered Field
	7.4	Superposition of the Incident Fields
8	Acc	ustic Waves in an Inhomogeneous Medium
	8.1	Physical Background
	8.2	The Lippmann-Schwinger Equation
	8.3	The Unique Continuation Principle
	8.4	Far Field Patterns 215
	8.5	The Analytic Fredholm Theory
	8.6	Transmission Eigenvalues
	8.7	Numerical Methods
9	Elec	tromagnetic Waves in an Inhomogeneous Medium
	9.1	Physical Background
	9.2	Existence and Uniqueness 240
	9.3	Far Field Patterns
	9.4	The Spherically Stratified Dielectric Medium
	9.5	The Exterior Impedance Boundary Value Problem
10	The	Inverse Medium Problem
	10.1	The Inverse Medium Problem for Acoustic Waves 260
	10.2	A Uniqueness Theorem
	10.3	A Dual Space Method
	10.4	A Modified Dual Space Method
	10.5	The Inverse Medium Problem for Electromagnetic Waves 275
	10.6	Numerical Examples
