

## CONTENTS

PREFACE	vii
INTRODUCTION	ix
<i>P. I. Kuznetsov and R. L. Stratonovich:</i>	
1 Electromagnetic processes in a multi-conductor system	1
2 Electromagnetic processes in a two-wire system	34
3 Non-uniform long lines	60
4 The optimum transition between two different uniform long lines	76
5 Non-uniform long lines with varying propagation coefficients	87
<i>P. I. Kuznetsov:</i>	
6 The propagation of electromagnetic waves along two parallel single-wire lines	91
7 The propagation of electromagnetic waves on lines	106
8 The representation of a contour integral	116
9 Lommel functions of two imaginary arguments	123
10 The propagation of electromagnetic waves in a multi-conductor system	134
11 The calculation of transient processes in long lines using cylindrical functions of two independent variables	141
12 Asymptotic expansions of cylindrical functions of two imaginary variables	158
