Contents

Basic Conventions and Notations ix

Chapter 1. **Preliminaries** 1

1-1 Introduction 1
1-2 Maxwell's Equations 1
1-3 Radiation Condition and Edge Condition 4
1-4 Some Formulas for Asymptotic Expansion 11
1-5 Cylindrical Waveguides and Periodic Structures 15
1-6 Modal Representation for Fields in an Open Region 20
1-7 Saddle-Point Method of Integration 23

Chapter 2. **Mode-Matching Techniques** 30

2-1 Introduction 30
2-2 Bifurcated Waveguide I: Formulation 30
2-3 Bifurcated Waveguide II: Solution by the Direct-Inversion Method 35
2-4 Bifurcated Waveguide III: Discussion of Solution 42
2-5 Bifurcated Waveguide IV: Solution by the Residue-Calculus Method 45
2-6 Radiation from an Infinite Array of Waveguides with Periodic Excitation 50
2-7 Radiation from an Infinite Array of Waveguides with Aperiodic Excitation 54

PROBLEMS 61

Chapter 3. **Wiener–Hopf Techniques** 73

3-1 Introduction 73
3-2 Fourier Transform 74
3-3 Properties of Fourier Transform in the Complex α-Plane 76
3-4 Integral-Equation Formulation 80
3-5 Solution of the Wiener–Hopf Equation 82
3-6 Bifurcated Waveguide 84
3-7 Jones's Method of Formulation 97

3-8 Radiation from an Infinite Array of Waveguides with Periodic Excitation 99
3-9 General Factorization and Decomposition Formulas 104
3-10 Alternative Factorization Formulas 113
3-11 Radiation from an Open-Ended Waveguide 125
3-12 Diffraction by an Open-Ended Waveguide 137
3-13 Mode-Matching and Wiener–Hopf Techniques 150

PROBLEMS 153

Chapter 4. **Generalization of the Mode-Matching Technique** 160

4-1 Introduction 160
4-2 Determinant Expansion Method 161
4-3 Modified Residue-Calculus Method 168
4-4 Mode Matching in the Fourier Transform Domain 180
4-5 Mode-Matching Technique for Open-Region Problems 196
4-6 Generalized Scattering-Matrix Technique 207

PROBLEMS 217

Chapter 5. **Approximate Methods Related to the Wiener–Hopf Technique** 226

5-1 Introduction 226
5-2 Semi-infinite Solid Cylindrical Antenna 229
5-3 Bifurcated Waveguide with Dielectric Loading 242
5-4 Slit-Coupled Parallel-Plate Waveguide 252
5-5 Diffraction by a Finite Waveguide 263
5-6 Radiation from Flanged Waveguide 273

PROBLEMS 276

Appendix **Proof of the Convergence of the Neumann Series Expansion** 287
