- Page No.* 114 *N. Chr. Albertsen and P. L. Christiansen*
Diffraction of creeping waves by an edge
- 75 *C. Altman, E. Fijalkow and K. Suchy*
Generalised reciprocity relations in plane-stratified magneto-plasmas
- 130 *J. A. Arnaud*
Application of the mechanical theory of light to fiber optics
- 258 *T. I. Arsen'ian and A. A. Semenov*
Use of the slot antenna for the investigation of the troposphere stochastic properties
- 48 *H. M. Barlow*
Dipole-mode propagation in hollow tubular waveguides
- 236 *F. G. Bass, V. G. Bezrodny, P. V. Bliokh, V. D. Freulicher and I. M. Fuks*
Propagation of electromagnetic waves in statistically irregular waveguides
- 24 *W. R. Belcher and J. Brown*
Wave propagation in a structure of interest in the design of phased arrays

Contents

- Page No.* 192 *V. G. Bezrodny, P. V. Bliokh and Yu. M. Yampolsky*
The anomalous growth of wave fluctuations near interference minima in wave guides
- 46 *H. Blok and N. P. de Koo*
Diffraction theory of an open resonator embedded in an uniaxial medium
- 105 *J. C. Bolomey and A. Wirgin*
Theoretical determination of the electromagnetic field in the neighborhood of a parabolic cylinder antenna
- 267 *V. E. Budanov, A. A. Kirilenko, S. A. Masalov and V. P. Shestopalov*
Diffraction of plane waves by an echelette grating
- 160 *S. K. Chang and K. K. Mei*
Scattering by dielectric cylinders
- 38 *P. F. Checcacci, R. Falciai and A. M. Scheggi*
Rimmed Cassegrain open resonator
- 40 *P. F. Checcacci, R. Falciai and A. M. Scheggi*
Ring and 90° roof open resonators
- 188 *Cheng Donn and L. L. Bailin*
Computer-aided investigation of the scanning blockage of an array of closely spaced reflector antennas
- 54 *P. J. B. Clarricoats and A. D. Olver*
Low attenuation characteristics of corrugated circular waveguide

Contents

- Page No.* 44 *A. Consortini and F. Pasqualetti*
Comparison of different diffraction formulas by a numerical investigation of low-loss open resonators
- 229 *R. B. Dyott*
A survey of optical fibres
- 148 *P. Edenhofer*
Remote probing of inhomogeneous media by inversion of electromagnetic wave propagation data
- 248 *C. Elachi and G. Franceschetti*
Optical diffused waveguides
- 204 *M. N. I. Fahmy and F. M. El-Hefnawi*
On the synthesis of circular antenna arrays: a new method for equal ripple optimisation
- 35 *L. B. Felsen*
A guided mode approach to stable and unstable open resonators
- 177 *G. Franceschetti and C. H. Papas*
Pulsed antennas
- 124 *K. Furutsu*
Multiple scattering of waves in a medium of randomly distributed particles and transport equation
- 138 *R. L. Gallawa and M. Koyama*
An economic model of glass fiber waveguide communications

Contents

- Page No.* 261 *V. D. Gusev, T. A. Gaylit and L. I. Prihodko*
Fluctuations of radiowave arrival angles under vertical and inclined sounding of ionosphere
- 179 *R. C. Hansen*
Near field determination of antenna difference patterns
- 207 *A. Hessel, Y.-L. Liu and J. Shmoys*
Mutual coupling in spherical arrays of circular waveguide elements
- 72 *R. A. Hurd*
A quasi-static method for open-region scattering problems
- 154 *H. Inada*
Application of the FFT to the short pulse response in the time domain for surface waves from dielectric spheres
- 7 *A. Ishimaru*
Pulse propagation in time-varying random media
- 103 *J. R. James*
Pattern synthesis of arbitrarily shaped antennas using spherical harmonic wavefunctions
- 9 *D. S. Jones*
Integral equations in scattering problems
- 172 *L. G. Josefsson*
Computer analysis and synthesis of polarization changing wire grid structures at oblique angles of incidence

Contents

- Page No.* 109 *E. V. Jull*
Improvements in the theory of antenna gain
- 51 *H. Kikuchi*
Characteristics of a screened dielectric waveguide with fast wave transition
- 269 *A. A. Kirilenko, L. A. Rud' and V. P. Shestopalov*
Strong calculation of complicated angled bends in rectangular waveguides
- 223 *G. H. Knittel*
Current research in phased arrays
- 112 *E. F. Knott, T. B. A. Senior and P. L. E. Uslenghi*
High-frequency electromagnetic scattering from a finite circular cylinder
- 63 *F. M. Landstorfer*
A new and simple computing method for the nearfield of a diffracting screen
- 169 *H. Lessow, W. V. T. Rusch and H. Schjaer-Jacobsen*
Numerical evaluation of two-dimensional phase integrals
- 251 *H. K. Lindenmeier*
Investigation of the validity of an efficient computation method for current distributions on antennas

Contents

- Page No.* **195** *L. N. Litvinenko, S. L. Prosvirnin and V. P. Shestopalov*
Method of more accurate successive approximations for solutions of linear equations with Fredholm operator in some problems of wave diffraction
- 198** *A. V. Lugovoy and V. G. Sologub*
Scattering of electromagnetic waves by a disk placed over a lossy dielectric halfspace
- 66** *E. Lüneburg and K. Westpfahl*
Uniform high-frequency asymptotics for the diffraction of plane waves by a slit
- 278** *R. J. Lytle, D. L. Lager, E. K. Miller and F. J. Deadrick*
The Beverage antenna – a multiconductor antenna that significantly interacts with the ground
- 275** *R. J. Lytle, E. F. Laine, D. L. Lager and J. T. Okada*
Subsurface electrical profile determination – theory and experiment
- 18** *R. H. MacPhie*
Uniform redundancy correlator arrays
- 89** *S. F. Mahmoud and J. R. Wait*
EM wave propagation in rectangular mine tunnels containing an axial wire
- 78** *L. Mandel and M. Tehrani*
Frequency content of the electromagnetic field seen by an atom passing through focus

Contents

- Page No.* *10* *J. R. Mautz and R. F. Harrington*
Computational methods for antenna pattern synthesis
- 27* *V. N. Melekhin and L. A. Wainstein*
Open resonators: new analytical solutions of some old problems
- 15* *E. K. Miller and J. A. Landt*
Time domain computer models for wire structures
- 255* *S. F. Mirkotan*
Structure of ionospheric echos and the signal-noise ratio
- 216* *R. Mittra*
Toward a better understanding of the computational aspects of
numerical solution of electromagnetic radiation and scattering
problems
- 135* *Y. Miyazaki*
Green's dyadic and partially coherent pulses in optical gradient fibers
- 163* *M. A. Morgan and K. K. Mei*
Computation of scattering by inhomogeneous dielectric bodies of
revolution
- 86* *N. Nessler and M. Wieser*
Small selfresonant helical antennas for subsurface VLF-transmission
- 12* *S. A. Nokes, M. J. M. Bernal and J. B. Davies*
Fast direct methods for the finite-difference solution of electro-
magnetic problems

Contents

- Page No.* 92 *A. A. Oliner*
Microwave network analyses of waveguides for acoustic surface waves
- 185 *R. G. Olsen and D. C. Chang*
On a new modal representation of electromagnetic waves supported by a horizontal wire above a dissipative earth
- 127 *G. Papi, V. Russo and S. Sottini*
Microwave holographic technique for optical imaging microwave objects through aberrating media
- 43 *F. Pasqualetti and L. Ronchi*
Eigenfunctions and eigenvalues of a quasi-90-degree roof-mirror resonator
- 69 *S. Przeździecki*
Uniform asymptotic solution for diffraction of a dipole field by a half-plane in a uniaxially anisotropic medium
- 182 *D. R. Rhodes*
Observable stored energies of electromagnetic systems
- 98 *T. E. Rozzi*
Network modelling of discontinuities in standard and oversize guides
- 1 *V. H. Rumsey*
Scintillation theory
- 57 *S. S. Saad, J. B. Davies and O. J. Davies*
Computer analysis and design of gradually-tapered waveguide with arbitrary cross-sections

Contents

- Page No.* 218 *R. Sato*
Propagation in multi-conductor system
- 209 *J. Shapira and A. Hessel*
Mutual coupling in a semi-cylindrical cavity feed-through lens
- 213 *J. Shapira, L. B. Felsen and A. Hessel*
Rays and modes for fields excited and observed near a concave surface
- 106 *O. Sønder*
Theoretical and experimental investigation of a double-grid dual-polarised reflector antenna system
- 242 *O. Sørensen and W. V. T. Rusch*
Application of the geometrical theory of diffraction to Cassegrain subreflectors with laterally defocused feeds
- 166 *R. E. Stovall and K. K. Mei*
Numerical solutions of inhomogeneously loaded biconical antennas
- 151 *W. Tabbara*
On the reconstruction of refractive index profile by a Fourier transform method
- 122 *L. S. Taylor*
Diffraction theory of strong random phase-amplitude screens
- 117 *G. A. Thiele and T. H. Newhouse*
A hybrid technique for combining moment methods with the geometrical theory of diffraction

Contents

- Page No.* 157 *D. E. Tremain and K. K. Mei*
Numerical methods for the analysis of scattering from periodic dielectric structures
- 143 *P. M. van den Berg*
Smith-Purcell radiation from an electric charge moving parallel to a grating
- 141 *P. M. van den Berg and J. C. M. Borburgh*
Reflection by a grating consisting of grooves in the surface of a semiconductor plasma (InSb). Dispersion of surface plasmons
- 21 *H. J. van Schaik*
Theory of the infinite phased-array antenna composed of iris loaded waveguides
- 80 *J. R. Wait*
Propagation under the earth's surface
- 201 *J. Watkins*
Computational aspects of radiation problems associated with open-circuited dielectric resonators
- 145 *L. A. Węgrowicz*
Inverse electromagnetic problem for line and strip sources over the plane imperfectly conducting ground
- 245 *R. Wohlleben*
Characteristic impedance of some open coaxial lines

Contents

- Page No.* 120 *R. Woo and A. Ishimaru*
Theory for the effects of turbulence in a planetary atmosphere on radio occultation
- 175 *J. W. Wright and M. L. V. Pitteway*
Computer simulation of randomly moving, diffracting screens in the ionosphere
- 60 *K. Yasuura*
Smoothing process on mode-matching technique for solving Helmholtz equation
- 133 *C. Yeh*
Modes in weakly guiding elliptical optical fibers
- 272 *G. L. Yip and Y. H. Ahmew*
Propagation characteristics of a radially inhomogeneous optical fibre
- 88 *Yu-Ping Liu and Chen-To Tai*
Propagation of waves between two planar interfaces
- 265 *E. V. Zvereva, A. M. Ryazantsev and D. N. Shachsuvarov*
Soviet theoretical and experimental work on electromagnetic wave propagation in the Earth's crust
