INTRODUCTION

R. VAN GEEN: The Meaning of the Photoelastic Effect	1
---	---

I. GENERAL REPORTS

J. W. DALLY: Classical and Advanced Methods of Photoelasticity	17
Addendum by P. S. THEOCARIS: A Critical Review on the Use of Polymers in Photoplasticity	102
G. MAYNE: The Interaction of a Material Continuum with an Electro- magnetic Field in the Frame of the Classical Theory of Field	115
P. S. THEOCARIS: Phenomenological Analysis of Mechanical and Opti- cal Behavior of Rheo-Optically Simple Materials	146
S. PAUTHIER-CAMIER: The Available Experimental Methods for Mea- suring the Optical Properties of Matter	231
J. DURAN: The Use of Atomic Gauges for Studying Local Stress Effects in Crystals	257
H. JANESCHITZ-KRIEGL and J. L. S. WALES: Streaming Double Re- fraction, a General Report	271
H. ABEN: Additional Physical Fields in Photoelasticity	294

II. THE PHOTOELASTIC EFFECT FROM A THEORETICAL POINT OF VIEW

D. F. NELSON, M. LAX and P. O. LAZAY: Electrodynamics of Photo- elastic Media Theory and Experiment	316
D. F. NELSON and M. LAX: Higher Order Photoelastic Interaction Theory and Experiment	351
R. D. MINDLIN: Rotation-Dependence of the Photoelastic Effect	376
P. BOULANGER: Some Magneto-Optical Effects Related to the Faraday and Hall Effects	389

R. S. RIVLIN: Electro-Optical and Magneto-Optical Effects 406

R. BENACH: A Note on Rational Continuum Mechanics and the Description of Magnetizable Dielectric Fluid Mixtures 425

III. APPLICATIONS OF THE PHOTOELASTIC EFFECT

B. D. COLEMAN and E. H. DILL: Photoviscoelasticity: Theory and Practice 455

A. ROBERT: Polarimétrie et Photoélasticimétrie 506

A. KUSKE: Photoelastic Effect Analysed by Means of the j-Circle Method 507

A. LAGARDE and P. OHEIX: Static and Dynamic Punctual Method for the Determination of the Neutral Axis and the Algebraic Value of the Birefringence for a Plane Plate 525

J. DER HOVANESIAN: Recent Work in Absolute Measurement of Birefringence 532

J. GROSS-PETERSEN: Method in Scattered Light Photoelasticity 547

K. H. LAERMANN: On the Determination of Scale Functions for the Transmission of Results in Photoelastic Analysis of Plate Problems . . . 573

J. TRÄGER: Some Remarks to the Photoelastic Investigations of Dynamic Problems 596

J. STUPNICKI, E. KWASNIAK and W. MIRSKI: Photoelastic Study of Elastohydrodynamics Lubrification 605

I. M. ALLISON and R. J. MAJOR: Stress Concentrations in Monolithic Structures Subjected to Mechanical and Thermal Loading 624

IV. CONCLUSIONS

D. C. DRUCKER: Concluding Summary 635
