CONTENTS

Section	*Page*
1. Introduction	1
2. Survey of the Literature on Slots and Related Topics	3
3. Axial Dipole Within a Corner Reflector and Slots on Wedges	9
a. Statement of the Problem	9
b. Formal Solution	10
c. Representation by Images	13
d. Asymptotic Evaluation of an Integral	16
e. The Radiation Fields	18
f. Alternative Expansions for the Pattern Factors $T(\theta, \phi)$ and $T^*(\theta, \phi)$	20
4. The Fields of Axial Dipoles in the Presence of a Circular Conducting Cylinder	23
a. Statement of the Problem	23
b. Formal Solution	23
c. The Radiation Fields	27
d. Extension to Axial Magnetic Dipole and the Slotted-cylinder Antenna	28
5. Slots on a Cylindrically-tipped Wedge	31
a. The Transverse Slot	31
b. Arbitrary Slot	35
6. Transverse Half-wave Slots on Isolated Cylinders	43
7. Conductance of Axial Slots on Infinite Cylinders and Wedges	48
8. Residue Series Representation for the Fields of an Axial Slot	54
9. Fields of the Axially Slotted Cylinder in Terms of Fock Functions	61

Section	*Page*
10. Residue Series Representation for Circumferential Slots on Cylinders	69
11. Fields of Current Distributions in Wedge Regions	72
12. Radial Electric Dipoles in Cylindrical Wedge Regions	76
13. Field of a Slot on an Elliptic Cylinder	88
a. Introduction	88
b. Statement of Problem	88
c. Formal Solution	89
d. The Far Fields	93
14. Calculated Radiation Characteristics of Slots in Metal Sheets	97
a. Introduction	97
b. Field of the Axial Slot on a Ribbon	97
c. Conductance of an Axial Slot in a Ribbon	105
d. Comparison with Slot on Knife Edge	107
15. Radiation from Slot Arrays on a Half-plane	118
16. Slotted-cylinder Antenna with a Dielectric Coating	125
a. Introduction	125
b. Formal Solution	125
c. The Far-zone Fields	129
d. The Equatorial-plane Fields	130
e. Approximations for Thin Dielectric Coating	133
f. The Corrugated Cylinder	135
g. Further Numerical Results	138
17. Scattering of a Plane Wave from a Dielectric Circular Cylinder at Oblique Incidence	142
a. Introduction	142
b. The Solution	142
c. Some Special Cases	145
d. Currents Excited on the Cylinder	148
18. Diffraction by a Convex Cylindrical Surface	149
a. Introduction	149
b. Formulation	149
c. Approximate Solution	151
Bibliography	160

Appendix. Radiation From Current Distributions

Section		*Page*
1.	Maxwell's Equations and Basic Concepts	167
2.	Plane Waves in Unbounded Homogeneous Media	169
3.	Radiation from a Dipole in a Homogeneous Medium	170
4.	The Hertz Vector	172
5.	Fields of a Linear Radiator	174
6.	Exact Fields of a Linear Radiator with a Sinusoidal Current	178
7.	The Magnetic Current Concept	180
8.	The Magnetic Dipole	182
9.	Fields of a Solenoid	185
10.	The Fields of Line Sources	188
11.	Radiation from Slots on Infinite Ground Planes	190
12.	Energy Flow and Radiation Resistance	194
	References to Appendix	200
