

CONTENTS

Foreword by P. G. de Gennes	v
Preface	vii
Guidelines for a Beginner	ix
Chapter 1. Introduction: Superconductivity and Superconducting Materials	1
Chapter 2. Characteristic Properties	21
Chapter 3. Elementary Phenomenological Theory	49
Chapter 4. Critical Current of Type-II Superconductors	75
Chapter 5. Results from the Microscopic Theory	103
Chapter 6. Josephson Effects	129
Chapter 7. High-Temperature Superconducting Oxides	167
Chapter 8. Technology and Applications	201
Appendices	225
Questions and Exercises	229
References Concerning Figures and Tables	235
Index	239
