## Part I Correlation Functions and Kinetic Equations

---

<b>1. Introduction</b> .....	3
<b>2. General Equations of Motion of Statistical Physics</b> .....	6
2.1 Quantum Statistics .....	6
2.2 Classical Statistics .....	10
2.3 Approximations .....	12
Problems .....	13
<b>3. Small Amplitude Perturbation Theory (Linear Response)</b> ....	14
Problems .....	20
<b>4. Brownian Motion (Relaxator)*</b> .....	22
Problems .....	27
<b>5. Brownian Motion (Oscillator)*</b> .....	29
Problems .....	32
<b>6. Dispersion Relations and Spectral Representations</b> .....	33
Problems .....	36
<b>7. Symmetry Properties of Correlation Functions</b> .....	37
Problems .....	41
<b>8. Detailed Balance, Fluctuations and Dissipation</b> .....	42
Problems .....	44
<b>9. Scattering of Particles and Light**</b> .....	45
Problems .....	50
<b>10. Energy Dissipation, Detailed Balance and Passivity</b> .....	52
10.1 The Response of Conserved Quantities to External Forces ..	52
10.2 Energy Dissipation and Passivity .....	53
Problems .....	55
<b>11. The High-Frequency Behaviour of Response Functions</b> .....	56
Problems .....	58
<b>12. The Low-Frequency Behaviour of Response Functions</b> .....	59
Problems .....	62
<b>13. Stochastic Forces, Langevin Equation</b> .....	63
13.1 The Subtraction Method (Langevin) .....	63

13.2	The Projection Method (Zwanzig and Mori)	66
	Problems	68
<b>14.</b>	<b>Brownian Motion: Langevin Equation*</b>	<b>69</b>
	Problems	72
<b>15.</b>	<b>Nonlinear Response Theory</b>	<b>73</b>
15.1	The General Initial Value Case	73
15.2	Low-Frequency Perturbation Theory	75
	Problems	77
<b>16.</b>	<b>The Increase of Entropy and Irreversibility</b>	<b>78</b>
16.1	General	78
16.2	Linear Response	79
16.3	Low-Frequency Response	81
	Problems	81
<b>17.</b>	<b>The Increase of Entropy: A Critical Discussion**</b>	<b>82</b>
17.1	Maxwell's Demon	82
17.2	Gibbs' Ink Parable	83
17.3	Zermélo's Recurrence Paradox	84
17.4	Loschmidt's Reversibility Objection	86
	Problems	87

---

## Part II Irreversible Thermodynamics

---

<b>18.</b>	<b>The Nyquist Formula</b>	<b>90</b>
	Problems	92
<b>19.</b>	<b>Thermomechanical Effects</b>	<b>93</b>
19.1	Diffusion and the Mechanocaloric Effect ( $\Delta T = 0$ )	95
19.2	Heat Diffusion and Thermomechanical Pressure Difference ( $\dot{N} = 0$ )	95
	Problems	98
<b>20.</b>	<b>Diffusion and Thermodiffusion</b>	<b>99</b>
	Problems	103
<b>21.</b>	<b>Thermoelectric Effects</b>	<b>104</b>
	Problems	107
<b>22.</b>	<b>Chemical Reactions</b>	<b>108</b>
	Problems	111
<b>23.</b>	<b>Typical Time Evolutions of Simple Chemical Reactions</b>	<b>112</b>
23.1	Zero-Order Reactions	112
23.2	First-Order Reactions	113
23.3	Second-Order Reactions	113
23.4	Third-Order Reactions	114
	Problems	115

<b>24. Coupled Nonlinear Reactions</b> .....	116
24.1 Nonequilibrium Phase Transitions .....	116
24.2 Kinetic Oscillations .....	117
24.3 "Chaos" .....	120
Problems .....	121
<b>25. Chemical Fluctuations</b> .....	123
Problems .....	126
<b>26. Sticking, Desorption, Condensation and Evaporation</b> .....	127
Problems .....	130
<b>27. Nucleation</b> .....	131
Problems .....	136
<b>28. The Oscillator with Mechanical and Thermal Attenuation*</b> ...	137
Problems .....	141
<b>29. Hydrodynamics</b> .....	142
Problems .....	148
<b>30. Hydrodynamic Long-Time Tails</b> .....	149
Problems .....	151
<b>31. Matter in Electromagnetic Fields</b> .....	152
Problems .....	157
<b>32. Rate Equations (Master Equation, Stosszahlansatz)</b> .....	158
Problems .....	163
<b>33. Kinetic Transport Equations</b> .....	164
Problems .....	168
<b>34. The Dynamic Conductivity in the Relaxation Time Model</b> ...	169
34.1 Longitudinal Excitations .....	169
34.2 Transverse Excitations .....	170
34.3 Discussion of $\sigma^l(k, \omega)$ and $\sigma^t(k, \omega)$ .....	171
34.4 Quantum Corrections .....	174
Problems .....	176
<b>35. Zero Sound</b> .....	177
Problems .....	179
<b>36. The Fokker–Planck Approximation</b> .....	180
Problems .....	183
<b>37. Brownian Motion and Diffusion*</b> .....	184
Problems .....	187
<b>38. Fokker–Planck and Langevin Equations</b> .....	188
<b>39. Transport Equations in the Hydrodynamic Regime</b> .....	193
39.1 The Hydrodynamic Approximation .....	193
39.2 Diffusion of Particles and Heat .....	195
39.3 The Viscosities .....	198
Problems .....	200

<b>40. The Minimum Entropy Production Variational Principle</b> .....	201
40.1 The Principle of Minimum Entropy Production .....	201
40.2 The Classical Boltzmann Gas .....	202
40.3 The Electron-Phonon System .....	206
40.4 Fermi Liquids .....	210
Problems .....	211

---

**Part III Calculation of Kinetic Coefficients**

---

<b>41. Approximation Methods</b> .....	214
<b>42. Correlation Functions for Single-Particle Problems</b> .....	217
42.1 General .....	217
42.2 Impurity Conduction (Greenwood Formula) .....	219
Problems .....	220
<b>43. Perturbation Theory for Impurity Conduction</b> .....	221
Problems .....	226
<b>44. Electron-Phonon Conduction</b> .....	227
Problems .....	229
<b>45. Mode-Coupling Theory for Impurity Conduction</b> .....	230
45.1 Particle Diffusion and Current Relaxation .....	230
45.2 Backscattering Effects .....	231
45.3 Self-Consistency Relations .....	234
Problems .....	236
<b>46. Electron Localization</b> .....	237
46.1 Breakdown of Perturbation Theory .....	239
46.2 Localization and Nonergodicity .....	239
46.3 Critical Behaviour and Scaling Laws .....	241
Problems .....	242
<b>47. Localization and Quantum Interference*</b> .....	244
<b>48. Scaling Laws for Dynamic Critical Phenomena</b> .....	247
48.1 General .....	247
48.2 The Lambda Transition in Liquid Helium .....	250
Problems .....	252
<b>49. Applications of Dynamic Scaling Laws</b> .....	254
49.1 Isotropic Ferromagnets .....	254
49.2 Uniaxial Antiferromagnets, Structural Phase Transitions ....	257
49.3 Anisotropic Ferromagnets .....	258
49.4 Liquid-Gas Transition .....	259
<b>50. Mode-Coupling Theory for Dynamic Critical Phenomena</b> ....	260
<b>51. Broken Symmetry and Low-Frequency Modes**</b> .....	264

<b>52. Collision Rates</b> .....	269
52.1 Perturbation Theory .....	269
52.2 Impurity Scattering .....	270
52.3 Chemical Reaction Rates .....	271
Problems .....	273
<b>53. Many-Body Effects in Collision Rates</b> .....	274
Problems .....	276
<b>References</b> .....	277
<b>Subject Index</b> .....	287
