

CONTENTS

Editor's Foreword	xiii
Preface	xvii
CHAPTER 1. INTRODUCTION	1
CHAPTER 2. A SIMPLE EXAMPLE-- SPIN DIFFUSION	7
2.1 Hydrodynamic Description	9
2.2 Spin Correlation Function (Roughly)	12
2.3 Magnetic Neutron Scattering	16
2.4 The Static Susceptibility	18
2.5 Linear Dynamical Response	20
2.6 Hydrodynamics and Correlation Function	24
2.7 The Fluctuation-Dissipation Theorem	26
2.8 Positivity of $\omega\chi''(k\omega)$	30
2.9 Sum Rules	31
2.10 Relaxation Time Approximation	33
2.11 Dispersion Relation Representation	38
CHAPTER 3. FORMAL PROPERTIES OF CORRELATION FUNCTIONS	44
3.1 Linear Dynamical Response	45
3.2 Symmetry Properties	48
3.3 Positivity of $\omega\chi''(k\omega)$ and Dissipation	52
3.4 Sum Rules	53
3.5 The Fluctuation-Dissipation Theorem	54
CHAPTER 4. THE NORMAL FLUID	60
4.1 The Equations of Fluid Dynamics	63
4.2 Solution of the Hydrodynamic Equations	67
4.3 Thermodynamic Sum Rules	71
4.4 The Hydrodynamic Correlation Functions	75
4.5 Light Scattering	79
4.6 Kubo Expressions for the Transport Coefficients	83
4.7 Free Particle Behavior	87
4.8 Sum Rule Calculations	88

CHAPTER 5. THE MEMORY FUNCTION FORMALISM	95
5.1 Projectors and Memory Functions	96
5.2 Memory Function Matrices	103
5.3 Extension to Quantum Mechanics	105
5.4 Spin Diffusion Revisited	109
CHAPTER 6. BROWNIAN MOTION	121
6.1 The Momentum Autocorrelation Function	121
6.2 The Generalized Langevin Equation	131
6.3 Diffusion of a Heavy Particle	137
6.4 The Fokker-Planck Equation	139
CHAPTER 7. BROKEN SYMMETRY	146
7.1 Long-Ranged Correlations and Slow Modes	149
7.2 Broken Symmetry in a Ferromagnet	154
7.3 The Bogoliubov Inequality	161
7.4 The Goldstone Theorem	163
7.5 Some Additional Considerations	166
7.6 Hydrodynamic Goldstone Modes	171
CHAPTER 8. HYDRODYNAMIC SPIN WAVES IN FERROMAGNETS	180
8.1 Symmetry Properties	181
8.2 Undamped Spin Waves	183
8.3 Damped Spin Waves	185
8.4 Sum Rules and Kubo Formulae	189
8.5 Corrections	192
8.6 Longitudinal Fluctuations	193
CHAPTER 9. HYDRODYNAMIC SPIN WAVES IN ANTIFERROMAGNETS	195
9.1 Long-Ranged Order	197
9.2 Symmetry Considerations	200
9.3 Undamped Spin Waves	203
9.4 Spin Wave Damping	206
9.5 Para-, Ferro-, and Antiferromagnets	210
CHAPTER 10. SUPERFLUIDS	214
10.1 Superflow and Long-Ranged Correlations	215
10.2 Broken Gauge Symmetry	223
10.3 Bose Condensation and the Order Parameter	226
10.4 Long-Ranged Phase Coherence	232
10.5 Hydrodynamics without Dissipation	235
10.6 Dissipation	240
10.7 Kubo Relations	246
10.8 The Phenomenological Two-Fluid Equations	248
10.9 Absence of Bose Condensation in 2 Dimensions	251

CHAPTER 11. NEMATIC LIQUID CRYSTALS	255
11.1 The Free Energy of Distortion	257
11.2 The Order Parameter	260
11.3 The Light Scattering Intensity	264
11.4 Transverse Hydrodynamic Fluctuations	266
11.5 Longitudinal Hydrodynamic Fluctuations	274
11.6 The Phenomenological Equations of Motions	278
11.7 What is a Solid?	281
CHAPTER 12. SUPERCONDUCTORS	288
12.1 Bose Condensation in a Fermi System	288
12.2 Superconductivity and Meissner Effect	293
12.3 Coulomb Forces	296
12.4 Linear Response of Charged Systems	298
APPENDIX	311
A.1 Electron Scattering	311
A.2 Neutron Scattering	313
A.3 Magnetic Neutron Scattering	314
A.4 Light Scattering	315
References	319
Index	323
