Contributors	v
Foreword	
D. GABOR	ix
Editor's Preface	xi
Acknowledgments	xvii
Thermodynamics of Living Systems: The Contributions of Aharon Katzir-Katchalsky	
PETER F. CURRAN	xix
 <b>PART I. LARGEST TO MEDIUM-SCALE IRREVERSIBILITIES: THE NEW ASTROPHYSICAL SCHOOL OF UNIFIED THERMODYNAMICS</b>	
Statistical Mechanics, Fallacy and a New School of Thermodynamics	
B. GAL-OR	3
Thermodynamics and Cosmology	
J. V. NARLIKAR	53
The World Map and the Apparent Flow of Time	
T. GOLD	63
On World Expansion and the Time Arrow	
O. COSTA DE BEAUREGARD	73
Photons as the Origin of Irreversibility	
M. TODA	79
On Deriving Irreversible Electrodynamics	
L. S. SCHULMAN	81

**PART II. SMALLEST-SCALE IRREVERSIBILITY: *T*-VIOLATIONS  
AND MICROSCOPIC IRREVERSIBILITY IN ELEMENTARY  
PARTICLES**

- Time Reversal Asymmetry at the Fundamental Level—and its Reflection  
on the Problem of the Arrow of Time  
Y. NE'EMAN 91
- Microscopic Irreversibility, Unitarity and the H-Theorem  
A. AHARONY 95

**PART III. CONTINUUM AND CANONICAL THERMODYNAMICS**  
*(Including Variational Considerations)*

- The Role of the Second Law of Thermodynamics in Classical Continuum  
Physics  
W. NOLL 117
- On Nonlocal Continuum Thermodynamics  
A. C. ERINGEN 121
- Canonical Fluid Thermodynamics  
L. A. SCHMID 143
- The Bisymplectic Formalism and its Application to the Relativistic and to  
the Non-Relativistic Hydrodynamics of an Adiabatic Perfect Fluid  
P. V. GROSJEAN 181
- A Possible Experiment on the Principle of Objectivity  
I. MÜLLER 195

**PART IV. CLASSICAL AND RELATIVISTIC THERMODYNAMICS**

- A Note on the Third Law of Thermodynamics  
H. CALLEN 201
- Spin Temperature and Negative Absolute Temperatures  
N. F. RAMSEY 207
- Elements of Relativistic Kinetic Theory  
S. R. DE GROOT, W. A. VAN LEEUWEN and CH. G. VAN WEERT 221
- Heat Flow in Rotating Relativistic Perfect Fluids and Global  
Thermodynamic Parameters  
J. KATZ and G. HORWITZ 237

On a General Relativistic Statistical Mechanics of Interacting Particles G. E. TAUBER	247
Relativistic Theory of Waves in Dissipative Media M. KRANYŠ	259
<b>PART V. MICRO-INSTABILITY AND STATISTICAL MECHANICS</b>	
Macroscopic Irreversibility as a Manifestation of Micro-Instabilities T. ERBER and A. SKLAR	281
The Direction of Time and the Microcanonical Ensemble O. PENROSE and A. LAWRENCE	303
Statistical Thermodynamics of Imperfect Gases and Condensation Phenomena K. IKEDA	311
Ergodicity, Monotonicity and Unattainability in Correlation of Entropy and Energy R. J. THORN	343
The Perfect Quantum Gases W. D. BAUER, E. HILF, K. KOEBKE and F. SCHMITZ	371
A New Irreversibility Postulate in Classical Statistical Mechanics J. FREY and J. SALMON	391
<b>PART VI. PHILOSOPHICAL PROBLEMS IN THERMODYNAMICS AND THE THEORY OF TIME</b>	
Is the Coarse-Grained Entropy of Classical Statistical Mechanics an Anthropomorphism? A. GRÜNBAUM	413
On a Paradox-Free Definition of Time and Irreversibility B. GAL-OR	429
Thought-Provoking and Thought-Depressing Quotations (Selected by B. GAL-OR)	435
Author Index	443
Subject Index	449
