

## CONTENTS

### Chapter

1. Elements of quantum theory . . . . .	1
2. Temperature and partition functions . . . . .	9
3. Separable, unexcited and classical degrees of freedom. Harmonic oscillator . . . . .	13
4. Ideal monatomic gas . . . . .	16
5. Free energy and total energy . . . . .	22
6. Equilibrium . . . . .	29
7. Equipartition of kinetic energy . . . . .	34
8. Simple crystal . . . . .	37
9. Ideal diatomic gas . . . . .	42
10. Phase equilibrium . . . . .	47
11. Dielectric constant of a gas . . . . .	50
12. Chemical equilibrium . . . . .	54
13. Fermi-Dirac and Bose-Einstein distributions . . . . .	59
