Preface	vii
Chapter 1. Thermoelastic Contact Problems	
<i>by J.R. Barber and M. Comninou</i>	1
1. Introduction	2
2. Boundary conditions	3
3. Some general results	24
4. Mathematical methods	40
5. Results and applications	71
6. Future directions.	100
References.	102
Chapter 2. Thermoelastic Stability	
<i>by F. Ziegler and F.G. Rammerstorfer</i>	107
1. Introduction	108
2. Plates	126
3. Shells	147
4. Numerical methods	160
5. Lifetime problems	180
References.	186
Chapter 3. Inelastic Constitutive Relationships and Applications to Some Thermomechanical Processes Involving Phase Transformations	
<i>by T. Inoue</i>	191
1. Introduction	192
2. Constitutive relation of thermoplastic body	192
3. Time-dependent inelastic constitutive relationship.	212
4. Constitutive relation of inelastic materials involving phase transformation: Metallo-thermomechanical consideration	234
5. Analyses of some engineering processes with phase transformation	248
6. Concluding remarks.	274
Acknowledgment	274
References.	274
Chapter 4. Generalized Thermoelasticity and its Applications	
<i>by J. Ignaczak</i>	279
1. Introduction	280
2. The foundations of the linear thermoelasticity with finite wave speeds	282
3. Formulations of the initial boundary value problems in the L-S and G-L theories.	297
4. Domain of influence in generalized thermoelasticity	305
5. Potential temperature disturbances in homogeneous and isotropic bodies	307
6. Applications of generalized thermoelasticity	325
7. Closure	352
References	353

Chapter 5. Thermal Stresses in Shells	
by <i>S.A. Łukasiewicz</i>	355
Introduction	356
1. Fundamental equations of the theory of thermoelasticity	357
References 1.	376
2. Fundamental results from the theory of surfaces.	377
References 2.	394
3. Geometrical equations of the theory of shells.	394
References 3.	413
4. Static equations of the theory of shells	414
References 4.	429
5. Energy equations of thermoelasticity of shells	430
References 5.	444
6. Fundamental equations of heat conduction in shells	444
References 6.	452
7. Simplified equations of the theory of shells	453
References 7.	462
8. Shells of slowly varying curvatures and shallow shells	462
References 8.	476
9. Shells of revolution	476
References 9	502
10. Thick, anisotropic and heterogeneous shells	503
References 10	528
11. Selected thermal problems of shells	528
References 11	549
List of Symbols for Chapter 4	555
Errata for Thermal Stresses I	557
Errata for Thermal Stresses II	559
Author Index	561
Subject Index	567
