## CHAPTER 1. THERMODYNAMIC STATE AND THE FIRST LAW OF THERMODYNAMICS

### *Fundamental Topics*

§ 1.1	The Objects of Thermodynamics . . . . .	1
§ 1.2	The Concept of Thermal Equilibrium (The Zeroth Law of Thermodynamics) . . . . .	2
§ 1.3	Thermodynamic Contact . . . . .	2
§ 1.4	Thermodynamic Quantities . . . . .	3
§ 1.5	Processes of Change . . . . .	4
§ 1.6	The First Law of Thermodynamics . . . . .	5
§ 1.7	Heat and Enthalpy . . . . .	8
§ 1.8	The First Law of Thermodynamics Applied to Infinitesimal Processes . . . . .	9
§ 1.9	Temperature . . . . .	10
§ 1.10	Heat Capacity, Specific Heat . . . . .	11
§ 1.11	Equation of State . . . . .	12
§ 1.12	Change of Independent Variables . . . . .	16
<i>Examples</i>	. . . . .	18
<i>Problems</i>	. . . . .	30
<i>Solutions</i>	. . . . .	37

## CHAPTER 2. THE SECOND LAW OF THERMODYNAMICS AND ENTROPY

### *Fundamental Topics*

§ 2.1	Reversible and Irreversible Process . . . . .	61
§ 2.2	A Lemma (Carnot Cycle) . . . . .	62
§ 2.3	The Second Law of Thermodynamics . . . . .	63
§ 2.4	The Efficiency of a General Carnot Cycle . . . . .	63
§ 2.5	Absolute Temperature . . . . .	65
§ 2.6	Clausius' Inequality for an Arbitrary Cycle . . . . .	69
§ 2.7	Entropy . . . . .	70
§ 2.8	Additivity of Entropy . . . . .	74
§ 2.9	General Expression of the Second Law . . . . .	74

§ 2.10 The Direction of an Actual Change . . . . .	75
§ 2.11 Maximum Work and Minimum Work . . . . .	77
<i>Examples</i> . . . . .	78
<i>Problems</i> . . . . .	85
<i>Solutions</i> . . . . .	95

### CHAPTER 3. THERMODYNAMIC FUNCTIONS AND EQUILIBRIUM CONDITIONS

#### *Fundamental Topics*

§ 3.1 Thermodynamic Functions . . . . .	133
§ 3.2 Legendre Transformation . . . . .	136
§ 3.3 Gibbs-Duhem Relation . . . . .	137
§ 3.4 Definitions of Thermodynamic Quantities and Thermodynamic Relations . . . . .	137
§ 3.5 The Third Law of Thermodynamics (Nernst-Planck Theorem). . . . .	140
§ 3.6 Equilibrium between Two Systems . . . . .	140
§ 3.7 Equilibrium Condition for a Given Environment . . . . .	141
§ 3.8 Inequalities of Thermodynamics . . . . .	143
§ 3.9 Le Chatelier-Brown's Principle. . . . .	145
<i>Examples</i> . . . . .	147
<i>Problems</i> . . . . .	159
<i>Solutions</i> . . . . .	166

### CHAPTER 4. PHASE EQUILIBRIUM AND CHEMICAL EQUILIBRIUM

#### *Fundamental Topics*

§ 4.1 Phase . . . . .	190
§ 4.2 Equilibrium between Different Phases of a Pure Substance . . . . .	190
§ 4.3 Surface Tension . . . . .	192
§ 4.4 Equilibrium of a Many-Component System in Different Phases . . . . .	193
§ 4.5 Gibbs' Phase Rule . . . . .	195
§ 4.6 The Chemical Potential of a Gas . . . . .	197
§ 4.7 Chemical Potential and Saturation Vapor Pressure of Liquids and Solids . . . . .	199
§ 4.8 Dilute Solutions . . . . .	200
§ 4.9 Ideal Solution (Ideal Solid-Solution) and Regular Solution. . . . .	201
§ 4.10 Expressions for Concentration of Solutions . . . . .	202
§ 4.11 <sup>+</sup> Activity and Activity Coefficient . . . . .	202
§ 4.12 Solution of Strong Electrolytes. . . . .	203

§ 4.13 Chemical Equilibrium . . . . .	205
§ 4.14 Thermodynamics of Electrochemical Cells . . . . .	206
§ 4.15 Application of the Third Law of Thermodynamics . . . . .	209
<i>Examples</i> . . . . .	210
<i>Problems</i> . . . . .	228
<i>Solutions</i> . . . . .	244

## DIVERTISSEMENTS

### *Chapter 1*

1. Founders of the first law of thermodynamics . . . . .	8
2. Why do we have winter heating? . . . . .	11
3. Nicolas Leonard Sadi Carnot . . . . .	36

### *Chapter 2*

4. Absolute temperature . . . . .	65
5. International practical temperature scale. . . . .	68
6. Axiomatic foundation of thermodynamics . . . . .	77
7. Kapitza's helium liquefier . . . . .	128

### *Chapter 3*

8. On the names of thermodynamic functions . . . . .	147
9. Thermodynamic mnemonic diagrams . . . . .	161

### *Chapter 4*

10. Equilibrium of heterogeneous substances . . . . .	194
11. Classification of phase transitions . . . . .	196
12. Thermodynamics and life . . . . .	249
