

Contents

1	Finite Element Methods in Thermal Problems	1
	<i>O. C. Zienkiewicz</i>	
2	Automatic Solution of Thermal Problems	27
	<i>M. D. Mikhailov and M. A. Aladjem</i>	
3	Heat Transfer Simulation of Composite Devices	51
	<i>L. Imre</i>	
4	A Comparison of Two- and Three-Level Integration Schemes for Non-Linear Heat Conduction	75
	<i>M. A. Hogge</i>	
5	Boundary Elements in Thermal Problems	91
	<i>L. C. Wrobel and C. A. Brebbia</i>	
6	Boundary Integral Equations used to solve Thermoelastic Problems: Application to Standard and Incompressible Materials	115
	<i>A. Chaudouet and G. Loubignac</i>	
7	On a Boundary Solution Approach for the Dynamic Problem of Thermoviscoelasticity Theory	135
	<i>M. Predeleanu</i>	
8	Thermal and Stress Analysis of Composite Nuclear Fuel Rods by Numerical Methods	151
	<i>H. Wolf, L. D. Wills, R. M. Krudener and M. D. Almond</i>	
9	How to Deal with Moving Boundaries in Thermal Problems .	177
	<i>J. Crank</i>	

10	Multidimensional Integral Phase Change Approximations for Finite Element Conduction Codes	201
	<i>E. C. Lemmon</i>	
11	A Finite Element Solution for Freezing Problems, using a Continuously Deforming Coordinate System	215
	<i>K. O'Neill and D. R. Lynch</i>	
12	Coupled Seepage, Heat Transfer, and Stress Analysis with Application to Geothermal Problems	233
	<i>M. Borsetto, G. Carradori and R. Ribacchi</i>	
13	Coupled Convective and Conductive Heat Transfer in the Analysis of Hot, Dry Rock Geothermal Sources	261
	<i>R. J. Hopkirk, D. Sharma and P.-J. Pralong</i>	
14	A Survey of Some Simulation Models for Industrial Processes	307
	<i>H. Moen</i>	
15	Heat Flow Modelling in Underground Coal Liquefaction	327
	<i>D. R. Skidmore and F. K. Fong</i>	
16	The Effect of Free Convection on Entry Flow between Horizontal Parallel Plates	349
	<i>T. V. Nguyen, I. L. MacLaine-cross and G. de Vahl Davis</i>	
17	A Characteristics Based Finite Element Method for Heat Transport Problems	373
	<i>W. D. L. Finn and E. Varoğlu</i>	
18	Convective Flows in Closed Cavities with Variable Fluid Properties	387
	<i>E. Leonardi and J. A. Reizes</i>	
19	A Program for Calculating Boundary Layers and Heat Transfer along Compressor and Turbine Blades	413
	<i>D. Dutoya and P. Michard</i>	
20	Finite Element Thermal Analysis of Convectively-Cooled Aircraft Structures	431
	<i>A. R. Weiting and E. A. Thornton</i>	
21	A Computational Procedure for Three-Dimensional Recirculating Flows inside Can Combustors	445
	<i>M. A. Serag-Eldin and D. B. Spalding</i>	

22	Enclosed Radiation and Turbulent Natural Convection Induced by a Fire	467
	<i>D. W. Larson</i>	
23	Numerical Computations of Turbulent Reacting Combustor Flows	489
	<i>E. E. Khalil</i>	
24	A Heat Transfer Analysis of Automotive Internal Combustion Gasoline Engines	511
	<i>H. Wu and R. A. Knapp</i>
