

## INDICE

P. CALDIROLA - Prolusione al Corso . . . . .	pag. ix
Gruppo fotografico dei partecipanti al Corso . . . . .	fuori testo

### LEZIONI

L. ROSENFELD - Questions of irreversibility and ergodicity . . . . .	pag. 1
C. TRUESDELL - Ergodic theory in classical statistical mechanics . . . . .	» 21
G. LUDWIG - Axiomatic quantum statistics of macroscopic systems (ergodic theory) . . . . .	» 57
A. LOINGER - A study of the quantum ergodic problem . . . . .	» 133
L. VAN HOVE - The problem of master equations . . . . .	» 155

### SEMINARI

D. L. FALKOFF - Master equations and $H$ -theorems . . . . .	pag. 170
J. L. LEBOWITZ - Phase-space description of non-uniform systems . . . . .	» 177
U. UHLHORN - On the mathematical structure of the quantum statistics for time dependent phenomena . . . . .	» 195
E. G. D. COHEN - Generalization of the Boltzmann equation to higher densities . . . . .	» 207
P. RÉSIPOIS - Invariants in $N$ -body systems . . . . .	» 219
E. VERBOVEN - On the theory of electron transport . . . . .	» 226
