

CONTENTS

FOUNDATIONS	1
Approach to Thermodynamic Equilibrium (and Other Stationary States)	3
W. E. Lamb, Jr.	
"Physics as Meaning Circuit": Three Problems	25
J. A. Wheeler	
Predictive Statistical Mechanics	33
E. T. Jaynes	
Bifurcation Geometry in Physics	57
W. Güttinger	
Quantum Distribution Functions in Non-Equilibrium Statistical Mechanics	83
R. F. O'Connell	
Positive and Negative Joint Quantum Distributions	97
L. Cohen	
Three Lectures on the Foundations of Quantum Theory and Quantum Electrodynamics	119
A. O. Barut	
THE INTERFACE BETWEEN QUANTUM MECHANICS AND STATISTICAL MECHANICS	129
How to Make Quantum Mechanics Look Like a Hidden-Variable Theory and Vice Versa	131
M. O. Scully	
A Classical Model of EPR Experiment with Quantum Mechanical Correlations and Bell Inequalities	139
A. O. Barut and P. Meystre	
Reduction of the Wavepacket: How Long Does it Take?	145
W. H. Zurek	
Maxwell's Demon, Szilard's Engine and Quantum Measurements	151
W. H. Zurek	
Experimental Tests of Bell's Inequalities With Pairs of Low Energy Correlated Photons	163
A. Aspect	

Comment on "A Classical Model of EPR Experiment with Quantum Mechanical Correlations and Bell Inequalities"	185
A. Aspect	
FLUCTUATIONS, IRREVERSIBILITY, AND CHAOS	191
A General Nonlinear Evolution Equation for Irreversible Conservative Approach to Stable Equilibrium	193
G. P. Beretta	
Intrinsic Entropy and Intrinsic Irreversibility for a Single Isolated Constituent of Matter: Broader Kinematics and Generalized Nonlinear Dynamics	205
G. P. Beretta	
Use of Quantum Trajectories for Time-Dependent Problems	213
M. Kleber	
Equation of Motion for Correlation Function of Strongly-Coupled Plasma	221
R. L. Liboff	
Quantum Brownian Motion	231
V. Ambegaokar	
The Scaling Relation Between the Microscopic (Kinetic) and Macroscopic (Hydrodynamic) Descriptions	241
L. Bányai	
Retarded Systems: The Road to Chaos	259
J. M. Aguirregabiria and L. Bel	
QUANTUM OPTICS	269
The One-Atom Maser - A Test System for Simple Quantum Electro-Dynamic Effects	271
H. Walther	
What are Squeezed States Really Like?	287
M. M. Nieto	
Quantum Statistics of Nonlinear Optics	309
D. F. Walls	
Photon Statistics, Antibunching and Squeezed States	329
G. Leuchs	
Empty Nonlinear Optical Resonators	361
A. Dorsel, W. J. Firth, A. Guzman de Garcia, J. D. McCullen, F. Marquis, P. Meystre, D. P. J. O'Brien, G. Reiner, M. Sargent III, K. Ujihara, E. Vignes, H. Walther, and E. M. Wright	
An Example of Symmetry Breaking in Nonlinear Optics	375
J. Bergou and M. O. Scully	
Nonequilibrium Statistical Physics in a Dithered Ring Laser Gyroscope or Quantum Noise in Pure and Applied Physics . . .	385
W. Schleich, P. Dobiash, V. E. Sanders, and M. O. Scully	

Darwinian Evolution in Physics and Biology: The Dilemma of Missing Links	411
F. A. Hopf and F. W. Hopf	
Self-Consistent Mean Field Theories	431
A. Elci	
Entropy, Information and Quantum Geometry	453
E. R. Caianiello	
Phase Transitions in Nonequilibrium Systems: Dye Lasers and Lasers with Saturable Absorbers	465
J. F. Scott	
Nonequilibrium Phenomena at Incommensurate Phase Transitions . . .	473
J. F. Scott	
On the Quasiparticle- and Super-Current at the Finite Temperature Josephson Junction	483
A. Rieckers	
Contributors	493
Index	497
