CONTENTS

Preface	vii
Donors	ix
Bayesian Methods: General Background *E. T. Jaynes*	1
Monkeys, Kangaroos, and N *E. T. Jaynes*	26
The Theory and Practice of the Maximum Entropy Formalism *R. D. Levine*	59
Bayesian Non-Parametric Statistics *Stephen F. Gull & John Fielden*	85
Generalized Entropies and the Maximum Entropy Principle *J. Aczél & B. Forte*	95
The Probability of a Probability *John F. Cyranski*	101
Prior Probabilities Revisited *N. C. Dalkey*	117
Band Extensions, Maximum Entropy and the Permanence Principle *Robert L. Ellis, Israel Gohberg & David Lay*	131
Theory of Maximum Entropy Image Reconstruction *John Skilling*	156
The Cambridge Maximum Entropy Algorithm *John Skilling*	179
Maximum Entropy and the Moments Problem: Spectroscopic Applications *C. G. Gray*	194
Maximum-Entropy Spectrum from a Non-Extendable Autocorrelation Function *Paul F. Fougere*	207
Multichannel Maximum Entropy Spectral Analysis Using Least Squares Modelling *P. A. Tyraskis*	212
Multichannel Relative-Entropy Spectrum Analysis *Bruce R. Musicus & Rodney W. Johnson*	235
Maximum Entropy and the Earth's Density *E. Rietsch*	254

Entropy and Some Inverse Problems in Exploration Seismology 269
James H. Justice

Principle of Maximum Entropy and Inverse Scattering Problems 300
Ramarao Inguva & James Baker-Jarvis

Index 317
