

# CONTENTS

## PART 1 NON-EQUILIBRIUM THERMODYNAMICS I

<i>I. Prigogine</i>	1	EVOLUTION CRITERIA, VARIATIONAL PROPERTIES, AND FLUCTUATIONS	3
<i>D. F. Hays</i>	2	VARIATIONAL FORMULATION OF THE HEAT EQUATION: TEMPERATURE-DEPENDENT THERMAL CONDUCTIVITY	17
<i>P. Glansdorff</i>	3	MECHANICAL FLOW PROCESSES AND VARIATIONAL METHODS BASED ON FLUCTUATION THEORY	45
<i>R. S. Schechter</i>	4	VARIATIONAL PRINCIPLES FOR CONTINUUM SYSTEMS	55

## PART 2 NON-EQUILIBRIUM THERMODYNAMICS II

<i>J. Meixner</i>	5	THERMODYNAMIC THEORY OF RELAXATION PHENOMENA	73
<i>G. A. Kluitenberg</i>	6	APPLICATION OF THE THERMODYNAMICS OF IRREVERSIBLE PROCESSES TO CONTINUUM MECHANICS	91
<i>C. Truesdell</i>	7	THERMODYNAMICS OF DEFORMATION	101

## PART 3 HYDRODYNAMIC STABILITY I

<i>W. H. Reid</i>	8	ASYMPTOTIC APPROXIMATIONS IN HYDRODYNAMIC STABILITY	115
<i>P. H. Roberts</i>	9	ON NON-LINEAR BÉNARD CONVECTION (WITH AN APPENDIX BY K. STEWARTSON)	125

<b>PART 4</b>	<b>HYDRODYNAMIC STABILITY II</b>	
<i>L. A. Segel</i>	<b>10</b>	NON-LINEAR HYDRODYNAMIC STABILITY THEORY AND ITS APPLICATIONS TO THERMAL CONVECTION AND CURVED FLOWS <b>165</b>
<i>N. R. Lebovitz</i>	<b>11</b>	CONVECTIVE INSTABILITY IN STARS <b>199</b>
<i>M. J. Clement</i>	<b>12</b>	CONVECTIVE INSTABILITY IN STARS WITH SMALL ROTATION <b>207</b>
<i>G. Nicolis</i>	<b>13</b>	VARIATIONAL APPROACH TO THE STABILITY PROBLEM OF THE PARTICLE DISTRIBUTION FUNCTION IN THE PRESENCE OF EXTERNAL FIELDS <b>213</b>
<b>PART 5</b>	<b>STATISTICAL PHYSICAL ASPECTS</b>	
<i>H. Callen</i>	<b>14</b>	THERMODYNAMIC FLUCTUATIONS <b>227</b>
<i>P. Résibois</i>	<b>15</b>	ENTROPY AND IRREVERSIBILITY <b>239</b>
<i>R. Balescu</i>	<b>16</b>	STATISTICAL ASPECTS OF PLASMA INSTABILITY <b>249</b>
<i>B. Coppi</i>	<b>17</b>	INSTABILITIES INDUCED BY PARTICLE COLLISIONS IN CONFINED PLASMAS <b>259</b>
<b>PART 6</b>	<b>DISCUSSIONS</b>	
<i>R. J. Donnelly</i>		STABILITY IN QUANTUM HYDRODYNAMICS <b>273</b>
<i>H. L. Frisch</i>		IRREVERSIBLE THERMODYNAMICS OF INTERNALLY RELAXING SYSTEMS IN THE VICINITY OF THE GLASS TRANSITION <b>277</b>
<i>J. S. Kirkaldy</i>		INTERFACE STABILITY DURING STEADY-STATE PHASE TRANSFORMATIONS <b>281</b>
<i>D. H. Gage, M. Schiffer, S. J. Kline, and W. C. Reynolds</i>		THE NON-EXISTENCE OF A GENERAL THERMOKINETIC VARIATIONAL PRINCIPLE <b>283</b>
<i>M. Kruskal</i>		CONVERGENCE OF ITERATION BASED ON PRIGOGINE'S AND GLANSDORFF'S GENERALIZED VARIATIONAL PRINCIPLE <b>287</b>

<i>B. A. Finlayson and L. E. Scriven</i>	GALERKIN'S METHOD AND THE LOCAL POTENTIAL	291
<i>P. Weiss</i>	RITZ METHOD AND UNIQUENESS IN NON-LINEAR HEAT CONDUCTION THEORY	295
<i>P. H. Roberts</i>	ON THE RELATIONSHIP BETWEEN GALERKIN'S METH- OD AND THE LOCAL POTENTIAL METHOD	299
<i>I. Prigogine</i>	REMARKS ON VARIATIONAL PRINCIPLES	303
<i>G. Thomaes</i>	REMARK ON THE CONVERGENCE OF THE PRIGOGINE- GLANSDORFF VARIATIONAL METHOD	305
	PARTICIPANTS	307
	INDEX	311
