

CONTENTS

Preface

I. E. Farquhar

Ergodic Theory in Classical Statistical Mechanics 1

P. Bocchieri and G. M. Prosperi

Recent Developments in Quantum Ergodic Theory 17

L. Lanz, G. Ramella Lanz, and A. Scotti

Considerations on the Problem of Deriving the Master Equation
and Characterizing Macroscopic Observables 32

H. Haken and W. Weidlich

A Contribution to the Theory of Quantum Mechanical Fluctuations
far from Equilibrium 43

E. J. Verboven

Quantum Thermodynamics of an Infinite System of Harmonic
Oscillators 49

M. Winnink

On the Equilibrium States of Infinite Quantum Systems at $T \neq 0$. 59

P. Mazur

On the Asymptotic Equivalence of Various Ensembles for a
Real System 72

J. Van Der Linden	Rigorous Results for some Thermodynamic Limit Problems . . .	89
O. Penrose	Convergence of Fugacity Expansions for Classical Systems . . .	101
J. Groeneveld	Rigorous Bounds for the Equation of State and Pair Correlation Function of Classical Many-Particle Systems	110
J. Ginibre	Convergence of the Fugacity Expansions for Quantum Systems .	148
J. L. Lebowitz	Rigorous Treatment of Systems with Long Range Potentials and Other Topics	164
D. C. Mattis	On the Three-Dimensional Ising Model	178
L. Witten	Structure of the Fermion Density Matrix	189
G. W. Lehman	Thermal Properties of Linearly Associated Systems with Random Elements: Helix - Coil Transition in DNA	204
H. G. Zachmann	The Entropy of Crystallized Solids Composed of Long Chain Molecules	237
G. M. Bell and S. Levine	Correlation Functions in Non-Homogeneous Charged Regions . .	258

J. L. Jackson and L. S. Klein	
Statistical Mechanics of a Partially Ionized Plasma	275
F. Schögl	
On the Statistical Theory of Entropy-Production	284
E. G. D. Cohen	
On the Non-Existence of Density Expansions for the Transport Coefficients in Classical Gases	291
K. Kawasaki and I. Oppenheim	
Logarithmic Terms in the Density Expansions of Transport Coefficients	313
J. M. J. van Leeuwen and A. Weijland	
The Density Expansion of the Diffusion Coefficients of a Lorentz Gas	335
R. Goldman and E. A. Frieman	
On the Structure of the BBGKY Hierarchy for a Boltzmann Gas .	350
H. N. V. Temperley	
On Phase-Transitions of Simple Liquids	368
A. Bellemans	
Phase Transitions in Hard-Square Lattice Gases	373
W. A. Steele	
Orientational Correlations in Liquids and the Depolarization of Scattered Light	385
V. Ardente, G. F. Nardelli, and L. Reatto	
Velocity Autocorrelation Function in Liquid Argon: A Hindered- Translator Model	401
J. Philippot and D. Walgraef	
Non Markovian Effects and Evolution of Entropy in Spin Systems	414

I. Prigogine and F. Henin	
Kinetic Equation, Quasiparticles and Entropy	421
M. D. Girardeau	
Thermodynamically-Equivalent Hamiltonian Method in Nonequilibrium Statistical Mechanics	463
S. A. Rice	
Some Comments on the Usefulness of the Concept of Coherence Time in the Statistical Theory of Liquids	475
P. C. Martin	
Fluctuations and Correlations in Superfluid Helium	511
A. Isihara	
The Pair Distribution Function of a Hard Sphere Bose Gas at Low Temperature	525
Ja. G. Sinai	
Ergodicity of Boltzmann's Gas Model	559
G. E. Uhlenbeck	
Summarizing Remarks	574
