

# CONTENTS

## Statistical Physics of Random Systems

Stochastic Theories of Randomly Modulated Systems . . . . .	Ryogo Kubo	1
Random Walks on Lattices Containing Traps . . . . .	Elliott W. Montroll	6
Phase Transitions in Lattice Systems with Random Local Properties . . . . .		
. . . . .	P. W. Kasteleyn and C. M. Fortuin	11
The Effect of Constraints on the Statistical Mechanics of Disordered Systems . . . . .		
. . . . .	S. F. Edwards	15
Remarks on the Vibrations of Disordered Systems . . . . .	Paul Dean	20
Statistical Mechanics of Stellar Systems . . . . .	D. ter Haar	25
Random Matrices and Information Theory . . . . .	R. Balian	30
Molecular Derivation of the Langevin Equation . . . . .	P. Mazur and I. Oppenheim	35
Energy Transport in the Disordered Harmonic Chain and the Correlation-Function Formula . . . . .	Marvin Rich and William M. Visscher	37
Localization of Eigenfunctions in Disordered Systems . . . . .		
. . . . .	Hirotsugu Matsuda, Takashi Miyata and Kazushige Ishii	40
Statistics of Long Chains with Repulsive Interactions . . . . .	Jacques des Cloizeaux	42
Stochastic Theory of Bimolecular Reaction Processes . . . . .	Ei Teramoto and Nanako Shigesada	46
Perturbation Theory of Chemically Reacting Gases . . . . .	Chong Wha Pyun	48
The Role of Statistical Mechanics in Neurobiology . . . . .		
. . . . .	Jack D. Cowan and Morrel H. Cohen	51
Transmission Properties of an Isotopically Disordered One-Dimensional Harmonic Crystal . . . . .	Robert J. Rubin	54
Analyticity Properties of Regular and Random Systems . . . . .	Joel L. Lebowitz	55
Statistical Distributions for Random Nuclear Hamiltonians . . . . .	C. Bloch	57
Localized Magnons in Ferromagnet with Impurity Spins. II . . . . .		
. . . . .	T. Oguchi, I. Ono, T. Ishikawa and N. Fuchigami	61
Generalized Special Frequencies of a Lattice with Low Concentration of Isotopic Impurities . . . . .	Koh Wada and Jun-ichi Hori	64
Energy Spectrum of a Disordered Lattice . . . . .	Shozo Takeno	66
A Systematic Approach to the Problem of the Exclusion Effect in Random Lattices . . . . .	Fumiko Yonezawa and Shizuo Homma	68
Clusters in Random Systems . . . . .	Kikuo Cho and Yutaka Toyozawa	71
Generalized Friedel's Sum Rule in Multiple-Scattering Theory . . . . .		
. . . . .	Hiroshi Hasegawa and Fumiko Yonezawa	74

## Plasma Physics

Kinetic Theory of Fluctuations in Turbulent Plasmas . . . . .	Setsuo Ichimaru	76
Conductivity of a Plasma with Random and Coherent Fluctuations . . . . .		
. . . . .	K. Nishikawa and Y. Ichikawa	78
Electrical Conductivity of Weakly Ionized Gases in Quiescent and Turbulent States . . . . .	Taro Kihara and Hiroo Totsuji	80
The Quantum Nature of the Fully-Ionized Gas . . . . .	W. T. Grandy, Jr.	82

## Statistics of Phase Transition

A Generalized Ornstein-Zernicke Approach to Critical Phenomena . . . . .	Melville S. Green	84
Aspects of Equilibrium Critical Phenomena . . . . .	Michael E. Fisher	87
Two-Dimensional Ferroelectric Models . . . . .	Elliott H. Lieb	94

<b>On the Relation between Phase Transition and Distribution of Zeros of Partition Function</b> . . . . .	Syu Ono, Masuo Suzuki, Chikao Kawabata and Yukihiko Karaki	96
<b>Relation among Ising, Heisenberg, and Spherical Models: Properties of Isotropically-Interacting Spins of Arbitrary Dimensionality</b> . . . . .	H. E. Stanley	102
<b>Perturbational Approach to the Rectangular Ising Problem with the Next Nearest Neighbor Interaction</b> . . . . .	A. Kawakami and T. Osawa	105
<b>Orderings in Certain Decorated Ising Lattices</b> . . . . .	Itiro Syozi, Sasuke Miyazima, Masumi Hattori, Huzio Nakano and Keiji Yamada	107
<b>Critical Phenomena of Ferromagnetic Fermi Liquid</b> . . . . .	Takeo Izuyama	109
<b>First Order Green Function Theory of Ferromagnetism</b> . . . . .	Shigetoshi Katsura and Tsuyoshi Horiguchi	112
<b>Phase Transitions and Distribution of Zeros</b> . . . . .	W. Bestgen, S. Grossmann and W. Rosenhauer	115
<b>Molecular Rotation and Phase Transitions in Solid Methanes</b> . . . . .	Tsunenobu Yamamoto, Yosuke Kataoka, Kenkichi Okada, Hideo Yasuda, Ken'ichi Nishiyama and Shoji Hirokawa	118
<b>Critical-Exponent Scaling Relations and a Generalized Landau Theory</b> . . . . .	Marshall Luban and Daniel J. Amit	120

### Dynamics of Phase Transition

<b>Mode-Mode Coupling near the Critical Point</b> . . . . .	Leo P. Kadanoff	122
<b>Critical Time-Dependent Fluctuations in Heisenberg Spin Systems</b> . . . . .	P. Résibois	127
<b>Scaling Laws for Dynamic Phenomena near a Critical Point</b> . . . . .	B. I. Halperin and P. C. Hohenberg	131
<b>Statistical Theory of Nucleation Processes</b> . . . . .	Ryoichi Kikuchi	136
<b>Dynamic Critical Phenomena in Magnetic Systems</b> . . . . .	H. Mori and H. Okamoto	141
<b>Computer Simulation of Order-Disorder Phenomena</b> . . . . .	Naofumi Ogita, Akira Ueda, Takeo Matsubara, Hirotsugu Matsuda and Fumiko Yonezawa	145
<b>Statistics of Ising Spin System</b> . . . . .	H. Mamada and F. Takano	150
<b>Dynamics of the Ising Model near the Transition Point</b> . . . . .	R. Abe and A. Hatano	152
<b>Dynamics of the Ising Model near the Critical Point</b> . . . . .	Masuo Suzuki, Hideo Ikari and Ryogo Kubo	153
<b>Quasi-Collective Modes in the Paramagnetic Phase</b> . . . . .	K. Tomita and T. Kawasaki	157
<b>Dynamics of Critical Fluctuations</b> . . . . .	Kyozi Kawasaki	160
<b>Anomaly in Electrical Resistivity of Ferromagnets near the Curie Point</b> . . . . .	Isao Mannari	162
<b>Some Dynamical Properties of the Ising Model</b> . . . . .	D. D. Betts and G. A. T. Allan	163
<b>Dynamics of Displacive-Type Ferroelectrics near the Curie Point</b> . . . . .	Kensuke Tani and Makoto Takemura	165
<b>Dynamical Properties of Crystals in External Fields Application to Phase Transitions</b> . . . . .	Nino Boccara	167

### Experimental Aspects of Critical Phenomena

<b>High Resolution Studies of the Critical Scattering of Neutrons from Iron</b> . . . . .	M. F. Collins, V. J. Minkiewicz, R. Nathans, L. Passell and G. Shirane	169
<b>Critical Phenomena in Ferroelectric Phase Transitions</b> . . . . .	Eiji Nakamura, Nobukatsu Takai, Kōji Ishida, Tatsuya Nagai, Yōichi Shiozaki and Toshio Mitsui	174
<b>Elastic and Inelastic Scattering of Light from a Binary Liquid Mixture near the Critical Point</b> . . . . .	S. H. Chen and N. Polorisky	179
<b>Inelastic Critical Neutron Scattering from Terbium</b> . . . . .	J. Als-Nielsen and O. W. Dietrich	183
<b>Ultrasonic and Infrared Studies of the <math>\lambda</math>-Transition in <math>\text{NaNO}_3</math></b> . . . . .	W. L. Craft, R. Eckhardt and L. J. Slutsky	184

<b>Mobility of Electric Charges at the Liquid-Gas Critical Point</b> . . . . .	
. . . . .	I. Modena and F. P. Ricci 187 ]

### Basic Problems in Statistical Mechanics

<b>General Remarks on the Connection of the Laws of Micro and Macro Physics</b> . . . . .	
. . . . .	H. Fröhlich 189
<b>Nonlinear Lattice Dynamics and Energy Sharing</b> . . . . .	N. J. Zabusky 196
<b>Some Applications of Bogoliubov's Inequality in Equilibrium Statistical Mechanics</b>	
. . . . .	N. D. Mermin 203
<b>Quantum Theory of Dissipative Processes and Non-Equilibrium Thermodynamics</b>	
. . . . .	I. Prigogine 208
<b>The Entropy Concept in Non-Equilibrium Thermodynamics</b> . . . . .	Josef Meixner 212
<b>Statistical Evolution Criteria</b> . . . . .	F. Schlögl 215
<b>Some Remarks on the Foundations of Thermodynamics and Statistical Mechanics</b>	
. . . . .	O. K. Rice 219
<b>Functional Formalism and Singular Normal Mode Technique in Statistical Mechanics</b>	
of Random Systems . . . . .	G. Vojta 221
<b>Information Theoretical Functional Formalism for Nonequilibrium Statistical</b>	
<b>Mechanics</b> . . . . .	Reinhold Haberlandt and Günter Vojta 222
<b>Functional Approach to Non-Equilibrium Statistical Mechanics and Its Irreversible</b>	
<b>Perspective</b> . . . . .	Iwao Hosokawa 224
<b>On the Theory of Irreversible Process</b> . . . . .	H. Mamada and T. Kotera 227
<b>On Metastable States</b> . . . . .	A. Compagner 229
<b>On the Quantum Statistical Theory of the Measuring Process</b> . . . . .	
. . . . .	W. Weidlich and F. Haake 231
<b>Computer Studies of Ergodicity in Coupled Anharmonic Oscillators</b> . . . . .	
. . . . .	N. Saitô, H. Hirooka and N. Ooyama 233
<b>Mechanics and Statistical Mechanics of Nonlinear Chains</b> . . . . .	Morikazu Toda 235

### Transport Phenomena

<b>Dependence of the Electrical Conductivity on the Impurity Concentration</b> . Shigeji Fujita 238	
<b>Collision Cross-Section and Reciprocity Relation on the Collision Process in the</b>	
<b>Kinetic Theory of Gases</b> . . . . .	Kodi Husimi and Huzio Nakano 244
<b>A Theory of Fluctuation Based on the Hierarchy Equation</b> . . . . .	S. Tsugé 246
<b>Quantum Corrections to the Neutron Transport Equation</b> . . . . .	E. Diana and A. Scotti 248
<b>A Case of Abnormal Diffusion</b> . . . . .	E. H. Hauge and E. G. D. Cohen 251

### Many-Body Problems

<b>Theory of a Lattice Bose Gas</b> . . . . .	
. . . . .	Toshiyuki Nishiyama, Masahisa Fukushima and Shokichi Kanno 254
<b>Theory of the Distribution Functions for Many Particle Systems</b> . . . . .	A. Isihara 256
<b>Statistical Mechanics of Quantum Mixtures</b> . . . . .	Hiroshi Ichimura 258
<b>Double Dispersion Relations in Quantum Statistical Mechanics</b> . . . . .	
. . . . .	A. K. Rajagopal and Morrel H. Cohen 261
<b>Plasmon Contribution to Magnetic Susceptibility of Solids in High Magnetic Fields</b>	
. . . . .	Norman J. Horing 264

### Statistical Mechanics of Fluids

Enhancement of Diffusion by Vortex-Like Motion of Classical Hard Particles . . .	B. J. Alder and T. E. Wainwright	267
Perturbation Theory in Classical Fluids . . . . .	Dominique Levesque	270
Pair Distribution Functions for Hard-Core Potentials near Close Packing . . . . .	Russell D. Larsen	272
Average Potential Models for Liquids . . . . .	A. Morales-Amado, E. Braun, Virgilio Beltrán-López, Ricardo Corona and A. Ponce	275
On the Average Potential Felt by a Particle in a Dense Medium . . . . .	E. Braun	278
Continuum Description of an Equilibrium Van der Waals Gas . . . . .	J. L. Jackson and Kathleen P. Coriell	280
Asymptotic Decay of the Pair Correlation Function in One-Dimensional Fluids . . . . .	B. Widom	283
Statistical Mechanics of Two- and Three-Body Interactions in Fluids . . . . .	J. A. Barker, D. Henderson and W. R. Smith	284
Derivation of the Generalized Vlasov Equation for Classical Fluids . . . . .	Tohru Morita	286
Correlation Times for Molecular Angular Momentum in Liquids . . . . .	D. Kivelson, M. G. Kivelson and I. Oppenheim	288
Self-Motion of Atoms in Simple Liquids . . . . .	G. Björkman, K. S. Singwi and A. Sjölander	290
A New Method of Study of Transfer Phenomena in Fluids . . . . .	J. Salmon and J. Frey	293
Molecular Theory of Light Scattering from Liquids . . . . .	Minoru Tanaka	298

### Mathematical Problems

Ergodic States and Phase Transitions . . . . .	G. G. Emch, H. J. F. Knops and E. J. Verboven	301
Statistical-Mechanical Theory of Condensation Phenomena . . . . .	Kazuyosi Ikeda	304
Weyl Problem and Surface Effects of Ideal Quantummechanical Gases . . . . .	R. Ebert and E. Hilf	307

### Relativistic Theory

Work and Heat in Special Relativity . . . . .	P. T. Landsberg and K. A. Jones	310
On Relativistic Statistical Thermodynamics . . . . .	R. Balescu	313
Relativistic Thermodynamics . . . . .	N. G. van Kampen	316
