## VOLUME 1

### KEYNOTE ADDRESS

Opportunities in Applied Heat Transfer Research	
<i>W. Thielbahr</i>	1

### THERMOPHYSICAL PROPERTIES

Liquid Phase Activity Coefficients from Isothermal Total Pressure Measurements	
<i>D. W. Yarbrough, K. T. Yoo, and K. Dema</i>	11
Thermal Diffusivity and Specific Heat of Commercial Aluminum and Aluminum Copper Alloys from 400 to 850°K	
<i>M. M. Mebed, H. A. Khalek, and M. A. Abd Elnaiem</i>	21
The Electrical and Thermal Conductivity of Aluminum and Aluminum Copper Alloys from 400 to 850°K	
<i>M. M. Mebed, H. A. Khalek, and M. A. Abd Elnaiem</i>	29
A Contribution to the Thermal Properties of Rocks at High Temperatures	
<i>M. M. Mebed</i>	37

### MEASUREMENT TECHNIQUES

Some Techniques for Improving Accuracy of Temperature Measurements within Solidifying Melts	
<i>A. S. Bogdanovsky</i>	53
The Application of Thermistor Anemometers to the Measurement of Velocities of Liquids in Free and Forced Convection Flows	
<i>K. A. Kroos and T. G. Keith</i>	83
Measurements of Flowrates under Transient Conditions Using a Differential Pressure Transducer	
<i>B. L. Bhatt and G. L. Wedekind</i>	93

Performance of Turbine Flow Meter Handling Water and Water-Solid Mixture

*M. A. Rayan and H. Mansour* 103

Determination of H Radicals (ESR Spectroscopy) Temperature and OH Radicals (IR Spectroscopy) Distributions in Oxy-Fuel Flames Burning at Atmospheric Pressure

*M. A. N. Kadirgan, A. Chatalic, and B. G. Brégeon* 117

Visual Observations of an Incipient Round Jet

*E. Rincón, M. Sen, and J. G. Cervantes* 135

## TURBULENCE

An Analytical Solution to the Turbulent Diffusion Equation with Mean Vertical Wind

*G. D. Catalano* 143

The Effects of Extended Pressure-Strain Models on the Calculations of Complex Turbulent Flows

*R. M. C. So* 153

On the Effects of Buoyancy in Turbulence Modeling of Shear Flows

*S. Z. Ahmad and I. K. Madni* 171

Two-dimensional Analytical Solution of Turbulent Shear Flows in Woodburning Stoves

*H. S. Samuel* 195

## FORCED CONVECTION

Similar Solutions for Flows along a Semi-infinite Plate with Variable Surface Temperature

*H. Chuang* 217

Heat Transfer in Unsteady Stagnation on Point Flow with Variable Wall Temperature

*N. S. Al-Baharna, V. M. Soundalgekar, S. Q. Fakhro, and T. V. Ramana Murty* 223

Effects of Suction and Free-Convection Currents on Oscillatory Flow Past and Infinite Porous Vertical Plate

*N. S. Al-Baharna, V. M. Soundalgekar, and S. Fakhro* 229

Couette Flow with Part of the Space Filled with Porous Medium

*C. Y. Liu, K. A. R. Ismail, and L. R. Carrocci* 257

Effect of Rotation on Convection Heat Transfer between Vertical Concentric Cylinders

*M. A. Elhifny, M. M. Sorour, and M. A. Teamah* 267

Effects of an Agitator Rotated in a Cylinder by a Circulating High Prandtl Number Fluid on Heat Transfer

*G. E. Geiger and C. K. Kouassi-Lenoir* 283

**k- $\epsilon$  Model in Two-dimensional Recirculating Flows***S. Sampath and V. Ganesan*    **295****Numerical Analyses of Thermal Convection Heat Transfer in a Fluid Fueled Marine Nuclear Reactor: The Effects of Numerical Pathologies and Viscous Dissipation in Generating Non-laminar Flows***A. Rice*    **307****NATURAL CONVECTION****Natural Convection Heat Transfer from an Isothermal Sphere***B. Farouk*    **347****Natural Convection between Vertical Concentric Cylinders***M. M. Sorour and M. A. Teamah*    **365****Thermal Stability of Steady Motion Resulting from Internal Uniform Energy Sources***A. H. Shaaban and M. N. Özisik*    **379****The Thickness of a Liquid Film Falling Laminarly down a Vertical Plate***A. Doniec*    **389****RADIATION/CONVECTION****P-N Approximation: Gray and Non-gray Radiative Heat Transfer***Y. Bayazitoglu and A. Yücel*    **401****Radiative and Convective Heat Transfer Interactions in the Three-dimensional Compressible Hypersonic Turbulent Boundary Layer on a Sharp Cone at an Angle of Attack***G. N. Kumar and R. I. Vachon*    **419****Simultaneous Convection and Radiation in Participating Laminar Flow between Parallel Plates***C. A. Schmidt, Y. Yener, and M. N. Özisik*    **443****Cellular Convection in a Fluid Layer between Two Porous Plates with Non-uniform Volumetric Heat Sources***M. A. Hassab*    **457****HEAT TRANSFER ANALYSIS****Numerical Prediction of Transient Single-Blow Responses in Fluid-Solid Heat Exchange via an Integro-Differential Formulation***P.-C. Lu and Z.-H. Yang*    **471**

**Theoretical Analysis of the Constant-Width Annular Fin with Variable Thermal Conductivity and Internal Heat Generation**

*L. Arias de Velasco, S. Aroca, and C. González*     **489**

**MELTING AND SOLIDIFYING**

**Convective Coupling of a Solid-Liquid Interface in an Internally Heated Vertical Cylinder**

*M. E. Glicksman and J. Mickalonis*     **505**

**Onset of Convection in a Vertical Melted Ice Layer with Variable Viscosity**

*M. A. Hassab*     **517**

**Theoretical and Experimental Investigation of Solidification (Fusion) of PCM around Vertical Cylinders**

*K. A. R. Ismail, C. Y. Liu, and R. F. Miranda*     **539**

**An Analysis of Convection in the Two-Phase Zone of Solidifying Alloys**

*A. L. Maples and D. R. Poirier*     **551**

**VOLUME 2**

**TWO-PHASE FLOWS AND HEAT TRANSFER**

**Heat Transfer to Gas-Solid Suspensions Flowing Turbulently in a Vertical Pipe**

*T. A. Özbelge and T. G. Somer*     **577**

**The Characterization of a Gravity Assisted Heat Pipe with Internal Two-Phase Parallel Flow Throughout**

*V. A. Cundy and L. N. Ha*     **599**

**Using the Energy Spectrum Method to Calculate the Two-Phase Frictional Resistance**

*Z. Z. Lin and Z. H. Lin*     **613**

**Two-Phase Flow Measurements with Herschel Venturis**

*Z. H. Lin*     **625**

**A New Correlation for Heat Transfer during Flow Boiling**

*S. G. Kandlikar and B. K. Thakur*     **635**

**Soviet and Chinese Research Works on Vapor-Liquid Two-Phase Flows**

*Z. H. Lin*     **651**

**TWO-PHASE FLOW INSTABILITIES**

**Effect of Heat Transfer on Density-Wave Oscillations—A Finite Difference Analysis**

*K. M. Akyüzlü and T. N. Veziroğlu*     **671**
