

CONTENTS

Preface	vii
The Boltzmann Award 1986	xi
Conference committees	xiii
Contents	xiv
From dynamical systems to statistical mechanics and back	
D. Ruelle and Ya.G. Sinai	1
Towards a scaling theory of drag reduction	
P.G. de Gennes	9
Hamiltonian and phenomenological models of microemulsions	
B. Widom, K.A. Dawson and M.D. Lipkin	26
Decay of metastable and unstable states: mechanisms, concepts and open problems	
K. Binder	35
Recent developments in the theory of pattern formation	
J.S. Langer	44
Multifractal structure of clusters and growing aggregates	
A. Coniglio	51
Diffusion limited aggregation and its response to anisotropy	
R.C. Ball	62
Some rigorous results for random and quasi-periodic potentials	
T. Spencer	70
Rigorous renormalization group at work	
K. Gawedzki	78
Symbolic dynamics and systematics of periodic windows	
B.-L. Hao	85
How do oscillating fronts form?	
P. Collet and J.-P. Eckmann	96
Equilibrium structure and rigidity of alumina polymers	
D.W. Schaefer, R.A. Shelleman, K.D. Keefer and J.E. Martin	105

CONTENTS

xv

Pattern growth and fluid displacements through porous media R. Lenormand	114
Fractal viscous fingering: experiments and models J. Nittmann	124
Transition of growth from dendrite to aggregate Y. Sawada	134
Kinetics in chemically reactive liquids F.H. Stillinger	142
The two-dimensional Coulomb gas: a fixed ion model and the dynamic characterization of the dielectric–plasma transition J.P. Hansen	150
Quantum statistics of Coulomb systems: thermodynamic functions and phase transitions W. Ebeling, W.D. Kraeft, D. Kremp and G. Röpke	160
Universal conductance fluctuations in disordered metals P.A. Lee	169
The Aharonov–Bohm effect in normal metals–non-ensemble averaged quantum transport R.A. Webb, S. Washburn, C.P. Umbach, F.P. Milliken, R.B. Lai-bowitz and A.D. Benoit	175
Localization of light: the quest for the white hole A. Lagendijk, M.P. van Albada and M.B. van der Mark	183
Crystallization of amorphous metal–insulator mixtures G. Deutscher and Y. Lareah	191
Experimental studies of the dynamics of fluid phase transitions in two dimensions C.M. Knobler	198
Shear flow problems in critical binary mixtures A. Onuki	204
Some exact results for polymer models D. Dhar	210
Levy walks with applications to turbulence and chaos M.F. Shlesinger, J. Klafter and B.J. West	212
Conformal invariance and critical behavior J.L. Cardy	219

Rigorous studies of critical behavior	
M. Aizenman	225
Microscopic origin of hydrodynamic equations: derivation and consequences	
J.L. Lebowitz	232
A model for crystallization: a variation on the Hubbard model	
E.H. Lieb	240
Some open questions in the elasticity of polymer networks	
J. Bastide and F. Boué	251
Kinetics of phase transition in polymer gels	
T. Tanaka	261
Effective rigidity of membranes	
L. Peliti	269
Liquid structure and short-range forces between surfaces in liquids	
J.N. Israelachvili and H.K. Christenson	278
Phase transitions and metastable states in the presence of random fields	
R.A. Cowley, R.J. Birgeneau and G. Shirane	285
On the Ising model in a random magnetic field	
J.Z. Imbrie	291
Formation of quasicrystals	
L.A. Bendersky and R.J. Schaefer	298
Origins of quasicrystal ordering	
C.L. Henley	306
Spin glasses theory	
G. Parisi	312
How to measure self-generated complexity	
P. Grassberger	319
Lattice gas automata for fluid mechanics	
D. D'Humières and P. Lallemand	326
A critical phenomenon approach of biogenesis	
C. Tsallis and R. Ferreira	336
Spin slips and lattice modulations in holmium: a magnetic X-ray scattering study	
J. Bohr, D. Gibbs, D.E. Moncton and K.L. D'Amico	349

CONTENTS

xvii

Exotism around the smectic A state in associated liquid crystals F. Hardouin	359
Molecular tail lengths, dipole pairings, and multiple reentrance mechanisms of liquid crystals J.O. Indekeu and A.N. Berker	368
Synchrotron X-ray studies of liquid-vapor interfaces J. Als-Nielsen	376
Systematic density expansion of transport properties of random lattices M.H. Ernst	390
Fractons S. Alexander	397
What statistical mechanics has to say to computer scientists P.W. Anderson	405
Hierarchical model of memory V.S. Dotsenko	410
Aggregation phenomena and fractal structures M. Kolb	416
Special purpose computers in statistical physics H.J. Herrmann	421
List of contributors	428
Analytic subject index	429
