

CONTENTS

Part I

The Statistical Mechanical Basis of the Boltzmann Equation, By JOHN G. KIRKWOOD and JOHN ROSS.	1
Statistical Mechanics and the Boltzmann Equation, By MELVILLE S. GREEN	8
Statistical Mechanical Foundations of the Boltzmann Equation, By R. BROUT	15
Discussion I	19

Part II

Irreversible Processes in Weakly Coupled Systems, By I. PRIGOGINE and R. BROUT	25
Gravitational Forces and Dynamic Friction, By R. BALESCU	33
Discussion II	37

Part III

Le principe de localisation, Par J. YVON.	41
The Statistical Mechanics of the Steady State. By H. N. V. TEMPERLEY	45
Discussion III	62

Part IV

On Thermal Conduction in Insulating Solids. By D. K. C. MACDONALD	63
The Transport of Energy and Matter in a Dense Two-Component Mixture of Hard Spheres. By H. C. LONGUET-HIGGINS, J. A. POPLE, and J. P. VALLEAU	73
Molecular Dynamics by Electronic Computers. By B. J. ALDER and T. WAINWRIGHT	97
Équivalence physique entre la loi de l'entropie croissante et le principe des actions retardées. Par O. COSTA DE BEAUREGARD.	132
Discussion IV	136

Part V

The Autocorrelation Function of the Intermolecular Forces. By E. EISENSCHITZ and R. E. TURNER	141
--	-----

Diffusion in Velocity Space and Transport Phenomena. By MORIKAZU TODA	148
Random Motion of a Heavy Particle Substituted in a One-Dimensional Crystal Lattice. By ROBERT J. RUBIN	155
A Generalization of a Problem of Rayleigh. By G. E. UHLENBECK and C. S. WANG CHANG.	161
Discussion V.	168

Part VI

On the Theory of the Transport Properties of Para-Ortho Mixtures in the Gas Phase. By E. G. D. COHEN and M. J. OFFERHAUS.	169
Solution of the Boltzmann-Hilbert Integral Equation. By C. L. PEKERIS.	173
On a Mathematical Treatment of Diffusion in Gas Mixtures. By G. KLEIN	177
A Solution of the Boltzmann Equation for Electrical Discharges. By TARO KIHARA.	180
Discussion VI	184

Part VII

Statistical Theory of Asymmetric Fission. By MARIA GOEPPERT MAYER	187
On the Theory of Transport Phenomena in Solids. By D. TER HAAR	192
Discussion VII.	198

Part VIII

Possibilité d'une théorie moléculaire de la turbulence et limites de validité de l'équation de Navier-Stokes. Par DANIEL MASSIGNON	199
Comparison Between Molecular and Turbulent Diffusion Processes. By F. N. FRENKIEL	204
Discussion VIII	215

Part IX

The Approach to Equilibrium in Quantum Statistics — A Perturbation Treatment to General Order. By LÉON VAN HOVE	219
The Boltzmann Equation in Quantum-Statistical Mechanics. By SYU ONO	229

Correspondence Principle in Quantum Statistics. By N. G. VAN KAMPEN	239
Mise en équilibre d'un petit système couplé à un thermostat. Par J. YVON.	242
Discussion IX	246

Part X

Bemerkungen zu einigen neueren Ergebnissen der Theorie starker Electrolyte. Von HANS FALKENHAGEN	251
A Kinetic Theory of the Viscosity of Liquid Helium II. By R. M. MAZO and J. DE BOER	261
Transport of Momentum and Energy by Phonons in Fluids. By R. EISENSCHITZ	266
Discussion X.	271

Part XI

On the Statistical Basis of Onsager's Reciprocal Relations. By S. R. DE GROOT and P. MAZUR	275
Le concept de temps dans le principe d'Onsager. Par SATOSI WATANABÉ	285
A Note on the Domain of Validity of the Principle of Minimum Entropy Production. By MARTIN J. KLEIN	311
On the Definition of Entropy in Magnetic Resonance. By PAUL H. E. MEIJER	319
On the Principle of Least Dissipation. By H. WERGELAND.	324
On the Principle of Minimum Entropy Production. By HERBERT B. CALLEN.	327
Fluctuations and Irreversible Thermodynamics. By LASZLO TISZA and IRWIN MANNING	334
Cyclic Processes in Irreversible Thermodynamics. By I. PRIGOGINE and R. BALESCU	343
Discussion XI	346

Part XII

Theory of the Vibrational Relaxation of Diatomic Molecules. By ELLIOTT W. MONTROLL	351
Discussion XII.	362

Part XIII

Viscosity and Heat Conduction of Gases (and Liquids) in the Neighborhood of the Condensation Region. By A. Michels.	365
Application of Kirkwood's Formalism to Heat Conduction in Compressed Argon. By J. V. SENGERS and S. MACHLUP.	376
The Thermal Conductivity of Imperfect Gases. By F. G. WAELBROECK	382
Measurements on Thermal Diffusion Combined with Ordinary Diffusion in Gas Mixtures. By A. VAN ITTERBEEK.	387
Discussion XIII	394

Part XIV

Diffusion in a Quasi-Crystalline Liquid. By G. CARERI and A. PAOLETTI	399
Mesure de l'effet Soret dans les solutions ioniques. Par J. CHANU	402
Thermodiffusion près du point critique de dèmixtion. Par G. THOMAES	412
Diffusion of Tracers Through Solids. By K. COMPAAN and Y. HAVEN	414
The Soret Effect. Part 3. Demonstration of Positive Soret Coefficients in Aqueous Solutions of Some Electrolytes. By C. C. TANNER	419
Author Index	425
Subject Index	429
