<i>Translator's Note</i> . . . . .		vii

## PART I: CLASSICAL THERMODYNAMICS

1. FORMULAE ARISING OUT OF THE EXISTENCE OF THE EQUATION OF STATE AND INDEPENDENT OF THE TWO PRINCIPLES OF THERMODYNAMICS . . . . .	3
2. CONSEQUENCES OF THE PRINCIPLE OF EQUIVALENCE . . . . .	8
3. CARNOT'S PRINCIPLE: CONSEQUENCES . . . . .	15
4. APPLICATIONS OF THE TWO PRINCIPLES . . . . .	23
5. FREE ENERGY: THERMODYNAMIC POTENTIAL FOR A PURE SUBSTANCE OR A SYSTEM OF INVARIABLE COMPOSITION . . . . .	35
6. APPLICATIONS OF THERMODYNAMIC POTENTIAL TO MAGNETISM AND TO ELECTRICITY . . . . .	40
7. THERMODYNAMICS OF SYSTEMS OF VARIABLE CHEMICAL COMPOSITION: CONDITIONS OF EQUILIBRIUM: PHASE-RULE . . . . .	50
8. ELEMENTARY APPLICATIONS TO SOLUTIONS: OSMOTIC PRESSURE . . . . .	63
9. THE CAPILLARY LAYER . . . . .	69
10. OBSERVATIONS UPON THE ACCOUNT GIVEN OF THE PRINCIPLES OF THERMODYNAMICS . . . . .	74
11. GASEOUS MIXTURES: DILUTE SOLUTIONS . . . . .	78
12. NERNST'S THEOREM: CHEMICAL CONSTANT . . . . .	94

## PART II: THERMODYNAMIC PROPERTIES OF MATTER

13. MECHANICAL PROPERTIES OF FLUIDS . . . . .	111
14. JOULE-KELVIN EXPANSION OF REAL GASES: APPLICATION TO THE LIQUEFACTION OF GASES . . . . .	130
15. THE SPECIFIC HEAT OF CONDENSED FLUIDS IN RELATION TO THE EQUATION OF STATE . . . . .	136
16. EQUILIBRIA BETWEEN CONDENSED STATES OF THE SAME SUBSTANCE . . . . .	149
17. PECULIAR PROPERTIES OF HELIUM AT LOW TEMPERATURES	158
18. BINARY SYSTEMS . . . . .	170

<b>PART III: TECHNICAL THERMODYNAMICS</b>		<b>PAGE</b>
<b>CHAP.</b>		
19.	THERMODYNAMICS OF GAS FLOW . . . . .	191
20.	THE ALTERNATING STEAM ENGINE . . . . .	210
21.	INTERNAL COMBUSTION ENGINES . . . . .	220
22.	STEAM TURBINES: COMPRESSORS . . . . .	229
23.	GAS TURBINES: THE TURBO-PROPELLSION UNIT: JET PROPULSION . . . . .	239
24.	LOW TEMPERATURES: PRODUCTION OF COLD AND THE LIQUEFACTION OF GASES . . . . .	247
25.	EXPLOSIVES . . . . .	264
26.	THE POSSIBILITIES OF NUCLEAR ENERGY . . . . .	270
 <b>PART IV: RADIATION: STARS</b>		
27.	THERMODYNAMIC STUDY OF RADIATION . . . . .	287
28.	EQUILIBRIA WITH ANNIHILATION OR CREATION OF MATTER OR OF RADIATION . . . . .	306
29.	THE THERMODYNAMICS OF THE STARS . . . . .	315
 <b>PART V: KINETIC THEORY</b>		
30.	FIRST RESULTS: CLAUSIUS VIRIAL: MAXWELL DISTRIBUTION OF VELOCITIES: BOLTZMANN'S INTEGRAL EQUATION . . . . .	339
31.	THE GAS NOT IN EQUILIBRIUM . . . . .	367
32.	DEEPER STUDY OF A GAS IN EQUILIBRIUM . . . . .	400
33.	SURFACE TENSION ACCORDING TO THE KINETIC THEORY OF GASES . . . . .	436
34.	OTHER DEVELOPMENTS BASED ON THEORY RELATIVE TO THE EQUATION OF STATE . . . . .	461
35.	FLUCTUATIONS OF THERMODYNAMIC QUANTITIES . . . . .	479
36.	MECHANICAL THEORY OF THE SOLID . . . . .	498
37.	STATISTICS OF LONG CHAIN MOLECULES . . . . .	508
 <b>PART VI: STATISTICAL MECHANICS</b>		
38.	BASES OF CLASSICAL STATISTICS . . . . .	519
39.	FUNDAMENTALS OF QUANTUM STATISTICS . . . . .	532
40.	STATISTICAL THERMODYNAMICS . . . . .	548
41.	SPECIFIC HEAT OF SOLIDS: THEORY OF EINSTEIN: THEORY OF DEBYE . . . . .	579
42.	BOSE-EINSTEIN GAS: DEGENERATION: CORRELATION WITH LIQUID HELIUM . . . . .	593
43.	THE FERMI-DIRAC GAS: FREE ELECTRONS IN METALS: THERMIONIC EMISSION . . . . .	599
