PART B

THE THEORY OF LINEAR GRAPHS WITH APPLICATIONS TO THE THEORY OF THE VIRIAL DEVELOPMENT OF THE PROPERTIES OF GASES

by G. E. UHLENBECK and G. W. FORD

Chapter I. INTRODUCTION TO THE THEORY OF GRAPHS	. 123
Chapter II. EXPANSION OF THE PROPERTIES OF A GAS IN POWERS OF TH	ΉE
FUGACITY	. 128
1. The Physical Assumptions	. 128
2. The Connection with the Theory of Labeled Graphs	. 130
3. A General Theorem for Graphs with Labeled Points	. 131
4. The Ursell Development and the Mayer Equations	. 134
5. The Expansion of the Distribution Functions	. 139
6. The Equivalence of the Mayer Equations with Other Forms of the	he
Equation of State	. 144
Chapter III. The Virial Expansion of the Properties of a Gas.	. 149
1. The Formal Elimination Problem	. 149
2. A General Theorem for Labeled Connected Graphs	. 152
3. Proof of the Theorem of Mayer and Other Applications	. 155
4. The Virial Expansion of the Distribution Function	. 160
Chapter IV. THE COUNTING PROBLEM FOR FREE GRAPHS	. 167
1. Introduction: the Theorem of Pólya	. 167
2. Examples	. 169
3. Further Examples: the Counting of Free Trees.	. 173
4. The Number of Free Graphs of p Points and k Lines .	. 177
Chapter V. REMARKS ON THE INTEGRAL PROBLEM; THE GAUSSIAN MOD	el 182
1. Introduction	. 182
2. The Gaussian Model and the Notion of the Graph Complexity	. 184

PART C

SOME TOPICS IN QUANTUM STATISTICS: THE WIGNER FUNCTION AND TRANSPORT THEORY

by H. Mori, I. Oppenheim and J. Ross

1.	INTRODUCTION	217
2.	QUANTUM MECHANICAL DESCRIPTION OF A SYSTEM	. 218
	2.1. Definitions and Basic Theory	. 218
	2.2. Theory of Scattering	226
	References	234
3.	Equilibrium Systems	235
	3.1. Specification of the System	. 236
	3.2. Time Averages, Phase Averages and Ergodic Theory	. 238
	3.3. Ensembles and their Construction	. 240
	3.4. Ensemble Density Matrices and Wigner Distribution Functions	. 244
	References	. 246
4.	Non-Equilibrium Systems	247
	References	255
5.	TRANSPORT IN GASES: THE DISTRIBUTION FUNCTION METHOD FOR	ł
	Gases at Low Density	. 256
	5.1. Preliminaries	. 256
	5.2. Derivation	259
	5.3. Discussion	269
	References	. 269
