

# Contents

Foreword . . . . .	vii
Preface . . . . .	ix
Introduction to Volume 11 . . . . .	xiii
Grouping of Materials and List of Figures and Tables . . . . .	xix

## Theory, Estimation, and Measurement

<i>Notation</i> . . . . .	1a
<i>Viscosity of Gases and Gas Mixtures</i> . . . . .	3a
1. Introduction . . . . .	3a
2. Theoretical Methods . . . . .	3a
A. Introduction . . . . .	3a
B. The Mean-Free-Path Theories . . . . .	4a
C. The Rigorous (Chapman–Enskog) Theories . . . . .	4a
a. Pure Monatomic Gases . . . . .	5a
b. Multicomponent Systems of Monatomic Gases . . . . .	5a
c. Nonpolar Polyatomic Gases and Multicomponent Systems . . . . .	5a
d. Pure Polar Gases and Multicomponent Systems . . . . .	7a
e. Quantum Effects . . . . .	8a
f. High-Temperature Calculations . . . . .	9a
g. High-Density (or Pressure) Calculations . . . . .	11a
h. Magnetic- and Electric-Field Effects . . . . .	13a
i. Critical and Rarefied Gas Regions . . . . .	13a
3. Estimation Methods . . . . .	14a
A. Introduction . . . . .	14a
B. Pure Gases . . . . .	14a
C. Multicomponent Gas Systems . . . . .	19a
a. Method of Buddenberg and Wilke . . . . .	19a
b. Method of Saxena and Narayanan . . . . .	19a
c. Method of Hering and Zipperer . . . . .	19a
d. Method of Dean and Stiel . . . . .	20a
e. Method of Strunk, Custead, and Stevenson . . . . .	20a
f. Method of Ulybin . . . . .	20a
g. Sutherland Form and Rigorous Kinetic Theory . . . . .	20a
h. Method of Saxena and Gambhir . . . . .	21a
i. Method of Gambhir and Saxena . . . . .	21a
j. Method of Saxena and Gambhir . . . . .	21a
k. Method of Brokaw . . . . .	22a
l. Viscosity from Thermal Conductivity Data . . . . .	23a
m. Viscosity from Interdiffusion Data . . . . .	23a
D. Sutherland Coefficients . . . . .	23a

4. Experimental Methods . . . . .	24a
A. Introduction . . . . .	24a
B. Various Methods of Measurement . . . . .	24a
a. The Capillary-Flow Method . . . . .	24a
b. The Oscillating-Disk (Solid-Body) Method . . . . .	27a
c. The Rotating-Cylinder (Sphere or Disk) Method . . . . .	28a
d. The Falling-Sphere (Body) Method . . . . .	29a
e. The Less-Developed Methods: Based on Ultrasonic, Shock Tube, and Electric Arc Measurements . . . . .	30a
<i>Viscosity of Liquids and Liquid Mixtures</i> . . . . .	33a
1. Introduction . . . . .	33a
2. Theoretical Methods . . . . .	33a
A. Introduction . . . . .	33a
B. The Simple Theories . . . . .	33a
C. The Reaction-Rate Theory . . . . .	35a
D. The Significant-Structure Theory . . . . .	36a
E. The Cell or Lattice Theory . . . . .	37a
F. The Statistical-Mechanical Theory . . . . .	38a
G. Correlation Function Theories . . . . .	40a
H. Theories for Liquids of Complicated Molecular Structures . . . . .	41a
3. Estimation Methods . . . . .	41a
A. Introduction . . . . .	41a
B. Procedures Based on the Principle of the Corresponding States . . . . .	41a
C. Semitheoretical or Empirical Procedures for Pure Liquids . . . . .	42a
D. Semitheoretical or Empirical Procedures for Mixtures of Liquids . . . . .	43a
4. Experimental Methods . . . . .	44a
A. Introduction . . . . .	44a
B. The Capillary-Flow Viscometers . . . . .	45a
C. The Oscillating-Disk Viscometers . . . . .	45a
D. The Falling-Body Viscometers . . . . .	45a
E. The Coaxial-Cylinder Viscometers . . . . .	45a
F. Other Types of Viscometers . . . . .	46a
References to Text . . . . .	93a

### Numerical Data

<i>Data Presentation and Related General Information</i> . . . . .	123a
1. Scope of Coverage . . . . .	123a
2. Presentation of Data . . . . .	123a
3. Symbols and Abbreviations Used in the Figures and Tables . . . . .	124a
4. Convention for Bibliographic Citation . . . . .	125a
5. Name, Formula, Molecular Weight, Transition Temperatures, and Physical Constants of Elements and Compounds . . . . .	125a
6. Conversion Factors for Units of Viscosity . . . . .	125a

*Numerical Data on Viscosity* (see pp. xix to xxv for detailed listing of entries for each of the following groups of materials) . . . . . 1

1. Elements . . . . . 1
2. Inorganic Compounds. . . . . 67
3. Organic Compounds . . . . . 97
4. Binary Systems . . . . . 235
  - A. Monatomic–Monatomic Systems . . . . . 237
  - B. Monatomic–Nonpolar Polyatomic Systems . . . . . 285
  - C. Monatomic–Polar Polyatomic Systems . . . . . 342
  - D. Nonpolar Polyatomic–Nonpolar Polyatomic Systems . . . . . 350
  - E. Nonpolar Polyatomic–Polar Polyatomic Systems . . . . . 501
  - F. Polar Polyatomic–Polar Polyatomic Systems . . . . . 540
  - G. Metallic Alloy Systems . . . . . 573
5. Ternary Systems . . . . . 579
  - A. Monatomic Systems . . . . . 580
  - B. Monatomic and Nonpolar Polyatomic Systems . . . . . 581
  - C. Nonpolar Polyatomic Systems . . . . . 584
  - D. Polar Polyatomic Systems . . . . . 592
6. Quarternary Systems . . . . . 593
  - A. Monatomic and Nonpolar Polyatomic Systems . . . . . 594
  - B. Nonpolar Polyatomic Systems . . . . . 595
7. Multicomponent Systems . . . . . 599
  - A. Monatomic and Nonpolar Polyatomic Systems . . . . . 600
  - B. Monatomic, Nonpolar Polyatomic, and Polar Polyatomic Systems . . . . . 607
  - C. Nonpolar Polyatomic and Nonpolar Polyatomic Systems . . . . . 608
  - D. Nonpolar Polyatomic and Polar Polyatomic Systems . . . . . 624
