

CONTENTS

<i>Editorial Advisory Board</i>	<i>ii</i>
<i>Preface</i>	<i>v</i>
<i>Contributors to Volume IV</i>	<i>iv</i>
1. Recent Advances in the Hydrodynamics of Metallurgical Processing —by Y. Sahai and R.I.L. Guthrie	1
2. Swirling Flow and Heat Transfer in Coiled and Twisted Pipes —by K. Nandakumar and Jacob H. Masliyah	49
3. Convective Heat Transfer in Internal Gas Flows with Temperature-dependent Properties —by Donald M. McEligot	113
4. Modelling of Radiation Transport and Energy Absorption in Photoreactors —by Orlando M. Alfano, Roberto L. Romero and Alberto E. Cassano	201
5. Transport Processes in Thermal Plasmas —by Maher Boulos and Pierre Fauchais	274
6. The Thermal Conductivity of Dispersions and Packed Beds —by Stuart W. Churchill	394
7. Application of Perturbation and Matching Techniques to Solve Transport Phenomena Problems —by Juan C. Gottifredi and Elio E. Gonzo	419
8. Electrostatically Augmented Particulate Removal Devices for High Temperature and High Pressure Applications —by S.C. Saxena, R.F. Henry and W.F. Podolski	465
9. Numerical Analysis of Multiphase Flow in Porous Media at Negligible Capillary Pressure —by K.H. Johnson, R.W. Lewis and K. Morgan	506
<i>Author Index</i>	<i>603</i>
<i>Subject Index</i>	<i>615</i>
