

CONTENTS

CONTRIBUTORS	v
PREFACE	vii
INTRODUCTION	xiii
1. History of Radical Trapping	1
F. O. RICE	
References	12
2. Radical Formation and Trapping from the Gas Phase	15
B. A. THRUSH	
I. Introduction	15
II. Gas Phase Production and Reactions	19
III. Examples	28
References	38
3. Techniques of Electrical Discharge for Radical Production	47
THOMAS M. SHAW	
I. Introduction	47
II. Production Mechanisms	48
III. Recombination	50
IV. Typical Electrical Discharge Techniques	50
V. Detection and Measurement of Radicals	63
References	64
4. Radical Formation and Trapping in the Solid Phase	69
GEORGE C. PIMENTEL	
I. Introduction	69
II. Diffusion in Solids	73
III. Production of Free Radicals in the Solid State	79
IV. Concentrations of Free Radicals	105
V. Summary	107
References	110

5. Low Temperature Equipment and Techniques.....	117
F. A. MAUER	
I. Introduction.....	117
II. Design of Research Cryostats.....	121
III. Vacuum Equipment and Techniques.....	140
IV. Gas-Handling Equipment.....	142
V. Liquid Refrigerants.....	143
VI. Temperature-measuring Equipment and Techniques.....	145
VII. Operating Techniques.....	157
VIII. Closing Remarks.....	164
References.....	164
6. Optical Spectroscopy of Trapped Radicals.....	169
D. A. RAMSAY	
I. Introduction.....	169
II. Historical Background.....	170
III. Experimental Methods.....	172
IV. Luminescences in Solids.....	176
V. Absorption Spectra of Trapped Radicals.....	186
VI. Discussion.....	202
References.....	206
7. Electron Spin Resonance Studies of Trapped Radicals.....	213
C. K. JEN	
I. Introduction.....	214
II. Elementary Principles of Electron Spin Resonance.....	214
III. Experimental Techniques.....	225
IV. Trapped Inorganic Radicals As Studied by ESR.....	228
V. Trapped Organic Radicals As Studied by ESR.....	239
VI. Effects of Matrix Environment on ESR Spectra of Radicals.....	248
VII. Conclusions.....	252
References.....	253
8. Chemical and Physical Studies of Trapped Radicals.....	257
JAMES W. EDWARDS	
I. Introduction.....	257
II. Detection and Measurement of Free Radicals in the Gas Phase by Mass Spectrometry.....	258
III. "Active" Nitrogen.....	259
IV. Hydrogen-Nitrogen Radicals.....	278
V. "Active" Oxygen.....	284
VI. Hydrogen-Oxygen System.....	287
VII. Reaction of Hydrogen Atoms with Solid Olefins at Low Temperatures.....	292
References.....	293

9. X-Ray Diffraction Studies and Their Crystal-Chemical Implications	301
H. S. PEISER	
I. Expectations from X-Ray Diffraction Studies.....	301
II. The X-Ray Equipment.....	303
III. From Basic Theory.....	306
IV. Disorder in Crystals.....	311
V. Sites for Trapped Radicals.....	314
VI. Some X-Ray Diffraction Observations.....	318
VII. Conclusion	325
References	326
 10. Free Radical Trapping—Theoretical Aspects.....	 327
J. L. JACKSON	
I. Introduction.....	327
II. A Microscopic Theory—Forbidden Transitions of Nitrogen Atoms.	329
III. A Static Statistical Theory—The Statistics of Isolation.....	335
IV. A Dynamic Statistical Theory—Chain Reactions of Trapped Nitro-	
gen Atoms	337
V. Conclusion	344
References	346
 11. Trapped Radicals in Astrophysics.....	 347
BERTRAM DONN	
I. Introduction.....	347
II. Chemistry of Interstellar Matter.....	348
III. Chemistry of the Solar System.....	354
References	360
 12. Trapped Radicals in High Polymer Systems.....	 363
H. MORAWETZ	
I. Introduction.....	363
II. The Determination of the Rate Constants for Radical Reactions in	
Polymerizing Systems	364
III. The Gel Effect.....	367
IV. Heterogeneous Polymerization	371
V. Radicals Trapped in Bulk Polymers	374
VI. Initiation of Graft Polymerization by Trapped Radicals	379
VII. Radical Polymerization in the Solid State	381
References	382

13. Trapped Radicals in Propulsion	387
MAURICE W. WINDSOR	
I. Introduction and History	387
II. Rocket Fundamentals	390
III. Free Radicals as Energy Sources	394
IV. Other Exotic Methods of Propulsion	404
References	408
14. Trapped Radicals in Radiation Damage	411
R. S. ALGER	
I. Introduction	411
II. Characteristics of Radiation Damage	415
III. Radicals and Holes in Simple Compounds	418
IV. Radicals in Polymers	426
V. Damage Theories	432
VI. Control of Radiation Damage	434
References	435
15. Trapped Radicals in Biological Processes	439
C. H. BAMFORD AND A. D. JENKINS	
I. Introduction	439
II. The Mechanism of Biological Oxidation	440
III. Unpaired Electrons in Natural and Irradiated Biological Materials	458
IV. Carcinogenesis	468
References	470
16. Chemical Utilization of Trapped Radicals	475
D. E. CARR	
I. Introduction	475
II. The Generation of Free Radicals in Trappable Form	477
III. Utilization of Trapped Free Radicals in the Study of Catalytic and Noncatalytic Conversions	480
IV. Combustion	490
V. Aerodynamic Chemistry	493
VI. Solid Catalysts	495
References	497
