<b>I. Solids at High Pressure.....</b>	<b>1</b>
1. Magnetic Fields in Solids.....	1
1.1 Introduction.....	1
1.2 Feebly Paramagnetic Metals.....	5
1.3 Antiferromagnets.....	11
1.4 Ferromagnets.....	17
1.5 Paramagnetic Ions in Crystals.....	25
1.6 Ferrimagnets.....	28
2. Electric Fields in Solids.....	29
2.1 Crystalline Electric Field Gradients.....	29
2.2 Higher Moments of the Crystalline Fields.....	39
2.3 The Isomer Shift.....	44
3. Relaxation, Diffusion, and Hindered Rotation in Solids	48
3.1 Nuclear Relaxation in the Alkali Metals.....	48
3.2 Diffusion and Hindered Rotation in Solid Hydrogen.....	55
3.3 Nuclear Relaxation in Other Solids.....	57
<b>II. Liquids and Gases at High Pressure.....</b>	<b>62</b>
1. Magnetic Fields in Liquids and Gases.....	63
1.1 Chemical Shifts in Octahedral Cobalt Complexes and Xenon.....	63
2. Relaxation and Diffusion in Liquids and Gases.....	71
2.1 Liquids: The Hydrocarbons and Water.....	71
2.2 Gases: Hydrogen, Methane, Ethylene, and Xenon.....	78
<b>Appendix. Experimental Methods.....</b>	<b>86</b>
<b>Index .....</b>	<b>99</b>
